Another of Its Good Points

The three materials which enter largely into the construction of the Enterprise Monarch Range, made by the Enterprise Foundry Co., Sackville, N. B., are steel plates, asbestos and iron castings. Each is the best in its proper place. The steel plates cannot be cracked or broken. They allow the heat to pass to oven thus making it hot almost as soon as the fire is started. Fitted with hot water or copper tank as desired. See it at Fennell & Chandler's Charlottetown or Brace, McKay & Co's., Summerside.
