What's Wrong With The Liberal Party?

(Continued from Page 4) The Hon. John Bracken who feel sure will, if his party is elected to govern Canada, make every effort to do so as truly economic-democracy for all the people, irrespective of nationality, class or creed.

I would like to emphasize the futility of any agency of production, whether it be labour, capital or management, deliberately attempting to establish itself permanently in any position of superiority. Superficially, it might appear that a certain aggressive labour union have done this at the moment, but already the fatal reaction—loss of volume of production—creating unemployment is developing. The best way to raise wages is to raise productivity. There can be no possible substitute for hard work and the fact that many industrialists complain of their efficiency per worker being lower than it was in 1929-39 is the situation that must be remedied if we are to have prosperity. It is an inevitable law that when prices rise to a certain point, the buying power of the average person becomes greatly lessened and essentially the demand shrinks rapidly, thereby creating unemployment with its consequent evils. It cannot therefore be too strongly stressed that our labour leaders as well as management should press this fact with a view to doing everything humanly possible to attain 100 per cent per worker efficiency.

MRS. WILBUR YOUNKER Although an invalid for a number of years the many friends of Mrs. Wilbur Younker were shocked at her sudden passing at Kingston on January 22nd, 1947.

About in her wheel chair every day, taking a great interest in friends, radio and flowers she showed greater patience and stronger faith in the Christian life.
