FOX PELTING AND CLEANING

Our plant is now ready to pelt one hundred foxes and clean three hundred pelts per day. We know we do better work than most—probably better than any. We have six years experience and we are careful. We pelted and cleaned thousands of foxes last year and we did not have one single complaint. Try us at least once and you will see the difference. Our prices will be very low and in quantities still lower. Cleaning work will be done while you wait for it. Pelting, drying and cleaning usually takes a week.

HALLOWEEN PARTIES—Halloween passed off very quietly in Summerside, with a marked absence of any pranks of a harmful nature. Most of the children chose Friday evening to parade the streets in fancy costume and goblin faces, calling on goodnatured citizens who regaled them with apples, candy and cookies. The different groups of the C. G. I. T. held Halloween parties and enjoyed a good evening's fun, bobbing for apples, etc. Halloween refreshments were served before the children went home. The Young People of Trinity United Church celebrated Halloween with a social in Epworth Hall. Rev. Mr. Campbell and Mrs. Campbell were present. A program of vocal and instrumental music with readings, recitations and games made the evening a most enjoyable one.—S

Brings you release from back-tiring work

NEW HIGH-SPEED SOAP
 —does whiter washings with much less work and cost

Now comes a joyous relief for overworked women. The greatest soap makers in the world bring you a new soap discovery, Oxydol, that will lighten all your washing work because of its gift of richer suds. For suds, as experts have discovered, are the secret of a soap's washing power.

Old-type soaps give weak, insufficient suds. They cause gray, streaky, disappointing washings—and much needless, tiring rubbing. Oxydol is supercharged (with pure rich soap) for 50% more suds than other soaps in granulated form—livelier suds that outwash and outlast all others!

Richer suds mean less work for you
 Because its richer suds do more of the hard work for you, Oxydol speeds your work and saves your strength. As you know from experience, weak old-type suds quickly fizzle away to watery thinness... that's why they leave clothes gray and streaky.

When you buy soap, consider how much suds you are getting for your money—for it's suds you're really buying. If the suds fizzle away and fall back, the dirt falls also—back into your clothes. Rich Oxydol suds stand up—outlast all others—this is the real secret of Oxydol's success.

Now you can soak clothes snowy white
 There's no back-tiring rubbing with Oxydol. Its thick creamy suds float the dirt right out of things—quickly, easily.

Oxydol's suds stand up—keep working—until the last particle of dirt is routed.

Everything you wash in Oxydol comes out quicker, whiter, and sweet and fresh as a mountain breeze.

Oxydol likes hard water
 The minute you put dirty clothes or greasy dishes into soft water you harden that water, remember that whenever you wash anything.

Oxydol makes all water soft
 It gives 50% more suds in even the stubbornest hard water, or in soft water hardened by dirty clothes.

Amazing for dishes
 Dishes streaked with unsightly grease film result from weak watery falling suds.

Oxydol fairly whisks away each speck of grease from even the dirtiest dishes or pots and pans. You can dry dishes without wiping, if you prefer, when Oxydol is used because its suds leave no trace of clinging film.

Oxydol is kind to hands
 Your hands will tell you that Oxydol is safe for even your most delicate clothes.

For Oxydol is made from only the purest and finest of washing materials—as you would expect from the makers of Ivory Soap, who recommend it to you.

Mothers are enthusiastic about Oxydol for children's clothes and baby things—it leaves them softer, daintier, and whiter.

Ask your grocer today for the big-sized orange and blue package. Its rich longer-lived suds will save your strength and ease the hardest task of housekeeping. Try it once and you'll thank the day you learned its name.
