

STOCK QUOTATIONS

Morning Stock Letter

NEW YORK, Sept. 18—In a radio speech last night Premier Blum of France upheld Russia which was an answer to Hitler's speech condemning the Russian Policies, Spanish Reds seem to be making headway against the Loyalists, Domestically, there is very little news of importance. The southeast coast is fighting a hurricane. Commercial Credit is planning to issue \$30,000,000 15 year 3-14 percent bonds. Yesterday's market probably won't be for itself and we would look for some extension of the rally although it will probably be a few weeks before market proves itself in either direction. We would expect the copper stocks to do better again today.

NEW YORK, Sept. 18—The Journal of Commerce this morning carries a first page story stating that gasoline stocks are not considered unmanageable by leading oil men and that crude stocks despite high production this summer are the lowest since 1922. It is our opinion that oil equities, which are selling for the most part, substantially under the year's highs are attractive purchases in view of indicated current earnings and possibilities of increased dividends to avoid the surtax payers. Our recommendations would be: Std. Oil of New Jersey, Socony Vacuum, Continental Oil and Gulf Oil.

TORONTO—Preston East Dome—Management announce that in answer to their enquiry the following telegram has been received from the property. "Absolutely nothing minewise to account for the market action. All headings in ore, Construction program proving satisfactory. Hoist and compressor on foundations. Expect to turn on power about Oct. 1st. Dome have drills set up on our north boundary."

Toronto—Moneta Porcupine—While the number 5 diamond drill hole at Moneta did not show commercial gold values, the core revealed similar structural conditions as encountered in the previous holes drilled along the general line of strike. The hole was brought 100 feet northwest of number 4 hole which returned a value of \$17. per ton across 25.5 feet of core at a depth of 310 feet. Number 6 drill hole is now being put down 100 feet southwest of number 1 hole to test the mineral zone.

Hard Rock—Reported Hardrock is drifting west from old shaft at 450 foot level on 401 vein. Last assay run \$47. across two feet. New three compartment shaft now down 150 feet station being cut at this level and cross cut will start shortly. New shaft in ore all way and bulk samples across 17 feet assays \$11.47.

composition resembling a raft porcelain. These materials generally had a blue or a green glaze. Metal was very rarely employed for Scarabs, but gold, electrum and bronze Scarabs are known, and a few of amber and glass.

The last Scarabs certainly known are Ptolemaic. They are funerary, without real bases and were made of diorite or other hard stones, hematite, and falence.

That, in brief is the history of Scarabs, the objects next to mummies, chiefly associated with Egypt, and its peculiar charm. Valuable Beethoven "First". Seventeen first editions of works by Beethoven were discovered recently in Budapest by the Hungarian collector, Patal. He purchased them from a second-hand book dealer for a few pennies and had great difficulty in preventing the dealer from erasing the corrections and notes made on the margins by Beethoven himself.

Patal sent photographic copies of his discoveries to Austrian and German musical authorities who agreed that the handwriting was Beethoven's and that the finds were, therefore, of great value.
