

NOTICE

If you have horses in poor condition from the effects of distemper or from any other cause, where the coat is dry and dirty looking and they have no ambition. And they do not improve on the feed that they are getting.

Administration Notice
Estate of Tom Jim, Chinaman.
Notice is hereby given that the death of the said Tom Jim late of Charlottetown, Restaurant Keeper, has been proved in the Probate Court and application is made to the Probate Court by Hum Kin of the City of Montreal, who claims to be a brother of the said deceased, to file the will of the deceased and grant administration of the estate of the deceased the said Hum Kin and in order that provision may be made for the payment of the debts of the said Tom Jim in this province all creditors of the said Tom Jim deceased are requested to furnish me at once with their claims against the said Tom Jim.

AUCTION SALE

I am instructed by Harry C. Stewart, Mt. Herbert, (5 miles from Charlottetown) to sell by public auction on Wednesday, January 28th, 1920 at 12 o'clock noon, all his stock, crop and farming implements consisting of:
One general purpose horse, 15 year old; one general purpose mare, 13 year old; one general purpose mare, 4 year old; 8 head of cattle, five now milking and six to fresh in the spring, 10 brood ewes, 1 ram, 1 brood sow, 3 fall pigs, 40 hens.

SUFFERED DAY AND NIGHT

The Tortures of Dyspepsia Relieved By "Fruit-a-tives"

LITTLE BRAS D'OR, C. B.
"I was a terrible sufferer from Dyspepsia and Constipation for years. I had pain after eating, belching gas, constant headaches and did not sleep well at night. Finally, a friend told me to try "Fruit-a-tives". In a week, the Constipation was corrected and soon I was free of pain, headaches and that miserable feeling that accompanies Dyspepsia. I continued to take this splendid fruit medicine and now I am well, strong and vigorous". ROBERT NEWTON.
50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid by Fruit-a-tives Limited, Ottawa.

LOSE YOUR FAT KEEP YOUR HEALTH

Superfluous flesh is not healthy neither is it healthy to diet or exercise too much for its removal. The simplest method known for reducing the overweight body is to take four pounds a week in the Marmalade Method, tried and endorsed by thousands of Charlatans. Prescription Tablets, containing exact doses of the famous prescription, are sold by mail at \$1 for a large case or if you prefer you can obtain them by sending direct to the Marmalade Company, 84 Woodward Ave., Detroit, Mich. They are harmless and leave no wrinkles or blemishes and are popular because effective and convenient.

Tenders for Sand

Sealed Tenders will be received at the City Clerk's Office up to noon Friday, January 29th from any party or parties willing to enter into a contract to supply the City of Charlottetown with 1000 tons of Holland Cove and Keppock Sand from Hillsborough Bay, during the coming Summer, each Tender to be accompanied with a certified cheque or cash deposit to the amount of \$50.00 as a guarantee.

W. W. CLARKE, City Clerk

FOR SALE

The undersigned offers for sale his farm of 88 acres, in one mile from Murray River, is about half cleared, balance partly covered with firewood and timber. For particulars apply to: PETER MATHESON, Murray River.

To Fox Breeders

As I have not the time to attend to it and have a limited supply of Lesages Boneless Horse meat on hand I will clean it up at 4 1/2 cents per lb cash. This is less than the cost and is your opportunity if you order now. P. A. FARQUHARSON, Prowse Block.

AUCTION SALE

I am instructed by Mr. M. J. Power to sell on the premises of the late John Fogarty, (deceased) in Glenfanning, Kings County, on Monday, February 22nd, 1920 at 12 o'clock noon, the following stock, crop and implements: 2 horses, 6 cows with calf; 1 sheep, 2 brood sows, 3 pigs, 50 hens, 1 binder, 1 hay rack, 1 mower, 1 truck wagon, 1 buggy sleigh, 1 single sleigh, 1 spring tooth harrow, 2 sets spike harrow, 2 single plows, 1 gang plow, 2 sets driving harness, 2 sets cart harness, 2 cooking stoves, 1 cream separator, 5 tons of hay, 5 tons straw and a lot of articles too numerous to mention. Should the day prove stormy, sale will take place the first fine day. Sale positive. No reserve. Terms of sale—All sums under \$10.00 cash. Over that amount 10 months credit on approved joint notes.

THE FARMERS

We are prepared to buy any quantity of live and dressed hogs paying the highest market prices. Our buyers will buy at the following stations on the following dates until further notice:
Everett Wedlock, Hunter River January 14th and 28th.
John Whitehead, Kensington January 7th, 14th and 28th.
Louis Nuttall and T. H. Smith, Albany, January 14th and 28th.
Major McDonald, Summerside, January 14th and 28th.
Perley Drake, Vernon Station, January 14th and 28th.
Bert Brown, York, January 14th and 28th.
Alex. D. Martin, Grand View, January 14th and 28th.
Every day at Charlottetown Plant.

The Woman Who Loved and Earned

BY JANE PHELPS
A Modern Story of Home and Business

ROBERT DINES AT MARION HOVEY'S CHAPTER XXXV.

Robert was spending the evening with Marion Hovey. I had not told his aunt, simply said he would not be at home for dinner. Many people would think I should not have felt any jealousy, because Robert so frankly told me where he was going. But I visualized them sitting at dinner in the Hoveys' cozy dining room. Marion all in white—she wore black for her father when she went out, but Murphy had told me that she thought it too depressing for the other children to see her in black at home; so she had decided to wear white in the house.

But I could not control my thoughts, and so I visualized the little dinner party, white dress and all. Then I imagined them when dinner over, they repaired to the living room and after Robert had smoked his cigar, bent over the papers she did not understand; their heads close together, his dark one and her fair one. Finally I could not endure sitting home any longer so I proposed to Aunt. "Suppose we go out too. Would you like to go to the motion picture?" I knew she loved the cinema pictures and would not object to go every night if she were invited.

There was one thing I could not become accustomed to in Robert's aunt; yet I have since learned there are many people like her: If I said I wanted to go anywhere, she invariably objected. But if I asked her if she would like to go, she always seemed willing, even when she said I should not go. So I asked her if she would like the motion picture, because I thought I might be diverted, and forget that Robert was spending the evening with Marion Hovey. "Yes, we'll go to the Rivoli to-night," she returned.

I made no objection to her choice and we hurried away. But although the picture was a good one it did not bring me the diversion I had hoped it would; neither did it help me to forget Robert and Marion Hovey. I found myself wondering what they had for dinner. Then disgusted I compelled myself to look at the picture. Again after a while I wondered if they were reading to each other, as she had told me once that Marion read so well he often asked her to read something for him. I was exasperated, almost hated myself because I was unable to put such thoughts from me and enjoy the pictures as often caused others to do. I often smiled, it was so hearty, and I comforted myself that she at least was pleased and happy; so would not be so difficult to talk to if Robert remained late. We had gone alone to each other, as she had told me a little after 9 o'clock. As usual never retired before 11. I would have two hours in which to entertain her, alone if Robert did not come in.

My mind rehearsed the talk in the best one we have seen this year. "Hart is wonderful! I like him better than Douglas Fairbanks or any of the fellows who do Wild West pictures." "I am glad you like it." Aunt subsided, and I went on thinking. It seemed that every perturbed thought came into my mind. I even wondered when Aunt Felicia was going home, and figured how much it had cost to entertain her all the weeks she had spent with us. I was ashamed of myself, but somehow seemed unable to control my thoughts.

I was glad when the show was over, and rose with alacrity. Aunt fumbled with her wraps, and the crowd for the second show came in before we were out of our seats. To my surprise Robert was at home when we reached the board. I saw him that something had happened. But I would not question him before his aunt, so waited until after she had left us before I asked him what brought him home so early; and what happened to make him look so glum, and disappointed.

Women Made Young

Bright eyes, a clear skin and a body full of youth and health may be yours if you will keep your system in order by regularly taking

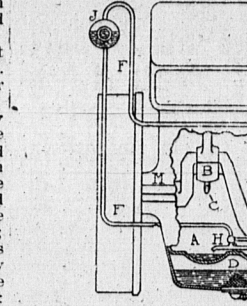

The world's standard remedy for kidney, liver, bladder and uric acid troubles, the enemies of life and looks. In use since 1896. At all druggists, 50c a box. Look for the name Gold Medal on every box and accept no imitation.

HINTS FOR The Motorist

BY ALBERT L. CLOUGH

SPLASH LUBRICATION OF ENGINES

An automobile engine being fully enclosed and liquid tight, if sufficient oil were placed in the crankcase, so that the connecting-rod ends should dip into it at each revolution, lubricant would be splashed over all the internal parts so long as operation was continued. However, as there is some oil lost by passing up the cylinders, entering the combustion spaces and escaping through the exhaust the level of lubricant in the crankcase would fall, unless replenished the connecting-rods would dip less and less deeply in the oil and the splat-

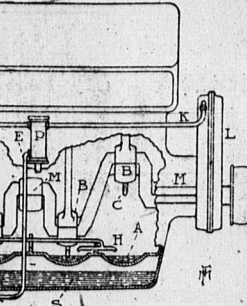

tering action would gradually grow less until it failed entirely, although at the beginning it might have been so energetic as to end in overfilling. Furthermore, if an engine thus lubricated were driven up a steep hill, most of the oil would flow to the rear of the crankcase, and the connecting-rods of the rear cylinders would dip too deeply and splash too energetically, while those of the front cylinders might not reach the oil at all and failure of lubrication in these cylinders would ensue. Moreover, the oil splashed by the rods would be near the surface of the supply and as this dripped back from the parts upon which it was thrown, it would be hot and would tend to remain upon the surface of the oil pool from whence it came, with the result that the lower portions of the oil in the crankcase would be comparatively stagnant and cool, while the upper oil would become hot and thin. In other words there would be a poor circulation of the lubricant. Then, too, all carbon and metallic particles formed in the operation of the engine would remain in the oil and be likely to be splashed onto the bearing surfaces again and again.

In order to make use of the splash principle of lubrication, at the same time to do away with the objections above referred to, the constant-level circulating system of splash lubrication has been devised. The principal objects attained by it are the maintenance of a constant level of oil in the crankcase, irrespective of the total amount of oil carried in the engine and the variation of the engine from a horizontal position; to insure the circulation and equal participation in lubrication of the entire body of oil carried and to secure the separation of harmful solid matter and its exclusion from the surfaces to be lubricated. In the accompanying diagram is shown in simplified form, such a system, in which circulation of the oil is effected by means of a pump.

The sump or oil reservoir contains most of the engine supply and its being exposed to the cold air rushing under the car, conduces to cooling it. The supply or suction pipe E of the pump draws its supply from the sump through the fine metal-gauze strainer D, which catches solid impurities. From the pump P, a part of the oil is forced through the delivery pipe F, out through the branch delivery pipes H, one of which is provided for each cylinder into the splash-basins A, one of which is located directly under each connecting-rod. On its way through E the oil passes through oil indicator J, where it can be observed by the operator as evidence that the system is working properly. Delivery pipe K furnishes the balance of the oil pumped to the timing-gear case L, from which it drains back after lubricating the gear faces and bearings. The rate of delivery of oil to the splash-basins is kept not only full but overflowing; this implies that the connecting-rods B at all times dip into oil to the same depth no matter how much or how little oil there may be in the engine (assuming enough

to fill them) and irrespective of the up-hill or downhill slant of the car. On the tip of each connecting-rod is carried a tubular splash-rod or dipper C through which oil is forced into the connecting-rod bearing at each revolution and by which oil is thrown or splashed all over the interior of the engine so energetically that the entire space is filled with a heavy fog or mist of oil, which settles upon all parts and after lubricating them, drips down into the sump from which it is again lifted by the pump and fed to the oil troughs to be broken up into fine particles by the connecting-rods. As oil supply pipe E draws from the bottom of the sump a supply of oil is assured to the splash-basins so long as any oil remains in the engine and this is sure to be the coolest oil not that which has just been heated by passing over the bearing surfaces and thus a circulation is continually kept up in which all the oil takes part. The oil spray enters the cylinder into the valve-chests and their pistons and some of it is

scraped into the hollow wrist-pins lubricating their bearings in the connecting rods, which also receive a part of the splash which enters inside the pistons. Oil moreover is splashed into the collecting pockets over the main bearing M, and flows through passages and distributing grooves, so that the full length of the bushings is lubricated and the same collection and distribution of splashed oil takes place at the cam-shaft bearings, while some oil vapor escapes along the push-rod into the valve-seat compartment to lubricate the valve-stems. All oil, after doing its duty at bearings returns to the pump to be re-circulated.

Questions of general interest to motorists will be answered in this column, space permitting. If an immediate answer is desired, enclose self-addressed, stamped envelope. Address Albert L. Clough, care of our office.

NOX A COLD TABLETS

A safe and speedy cure for LaGrippe, Coughs, Colds, Headache, Neuralgia, Flu, and influenza. Breaks up a cold in a few hours. Get the genuine, at all drug stores, 25c per box. Sold at Post's Dispensary.

XMAS CLOSING AT ELMWOOD SCHOOL

A very entertaining and social evening was spent in Elmwood School on Monday, December 23, when the people of that District and many from the neighboring ones, assembled to attend the Semi-annual Christmas and closing exercises for Xmas holidays. The neat little school room presented a very attractive appearance being beautifully lighted and very nicely decorated with Xmas hangings, etc., and in one corner stood a tree, its graceful boughs being well laden with gifts.

The classes were examined in various subjects by the visiting teachers, Misses Mary Cavanagh and Mary Tierney of New Haven, Miss Agnes Trainor, teacher of Riverdale and Miss Marion McDonald, student of P. W. C. The prize for best attendance was awarded to Miss Mary A. Curly and the prize in a strongly contested "Spelling Match" was won by Eugene Egan.

On the conclusion, a nicely arranged programme was read by the chairman, Mr. Ephraim Costello, and needless to say, each number was splendidly performed. Following is the programme: Chorus; Welcome; Welcome Speech, Reta Costello; Recitation, Eugene Egan; Recitation, Morris Costello; Bag pipe selections by Mr. Malcolm McDonald; Dialogue, Getting Information, by Frank Egan and Milton Docherty; Recitation, Joseph Costello; Recitation, Rose McCloskey; Chorus; The Red White and Blue; Recitation, The Inventor's Wife by Marjorie Newman; Recitation, Pearl Costello; Bag pipes selections; Dialogue, A Wonderful Scholar, by Vera Trainor, Hazel Buchanan and Reta Costello; Recitation, Mary A. Curly; Song, Good Advice, by M. Newman, M. A. Curly, P. Costello M. Egan and R. McCloskey; Recitation, Mary Egan; Dialogue, Aunt Rachael in the City by Marjorie Newman and Hazel Buchanan; Reading, Aunt Jemima's Courtship by Reta Costello; Solo by Ement McCloskey; Chorus, Xmas Song by the pupils; Song by M. Egan and P. Costello. Santa (personated by W. Egan) then appeared and distributed the gifts and candy among which was a beautiful gift to the teacher, Miss Sadie Egan from the pupils. Complimentary remarks were made by Mr. P. Newman and others on the success of the examination and the splendid manner in which the entertainment part was performed. A hearty vote of thanks was tendered Mr. McDonald for his excellent instrumental music. The singing of the National Anthem then brought to a close a very profitable and enjoyable evening.

A Quinine That Does Not Affect the Head

Because of its tonic and laxative effect, LAXATIVE BROMO QUININE (Tablets) can be taken by anyone without causing nervousness or ringing in the head. There is only one "Bromo Quinine." F. W. GROVE'S signature on the box. 30c.

NOTICE TO FARMERS

Our agents will take delivery of live hogs at our usual buying points on Thursday, January 29th, and Thursday, February 12th. We want good stock for which we will pay highest market prices. See our agents before disposing of your hogs.
