

THURSDAY.

The death of Mrs John Flynn, which occurred at her home 50 Douglas St., Charlottetown, on July 31st, 1913, has caused widespread regret wherever she was known. The deceased was a daughter of the late Mr. Patrick Cairns, and was born at Newton, Lot 26, 58 years ago. She had been in ill health for the past two years, but death came very unexpectedly. The late Mrs. Flynn was a woman of splendid character, sympathetic, affectionate, and of kind disposition. To know her was to love her. She leaves her husband, two daughters, and two sisters. Her funeral took place Saturday morning to the pro-cathedral, thence to the R. C. Cemetery. The pall-bearers were Capt. T. White, Messrs John Garret, William Power, Albert White, Walter Young, and Joseph Gaudet.

A TOURING PARTY.—A tourist party of Americans, the Gillespie-Kingsfords consisting of twenty-one persons, principally ladies, arrived in the city from St. John, N. B., by the express on Tuesday night and are remaining until the morning. They spent yesterday in "doing the sights." Among the places of interest they visited were the Experimental Farm and the J. R. Dennis fox ranch. The visitors had from New York, New Jersey, Philadelphia and Boston, and they are making a tour of the Maritime Provinces. They have already toured New Brunswick and from there they are going through Nova Scotia, for which they are to leave this morning by the Picton boat, Northumberland. One and all they have expressed great delight with the island, to which it is the first visit of most of them.

WOMAN SUFFERED TEN YEARS

From Female Ills—Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Belleville, N.S., Canada.—"I doctored for ten years for female troubles and did not get well. I read in the paper about Lydia E. Pinkham's Vegetable Compound and decided to try it. I write now to tell you that I am cured. You can publish my letter as a testimonial."

Another Woman Recovers. Auburn, N. Y.—"I suffered from nervousness for ten years, and had such organic pains that sometimes I would lie in bed four days at a time, could not eat or sleep and did not want anyone to talk to me or bother me at all. Sometimes I would suffer for seven hours at a time. Different doctors did the best they could for me until four months ago I began giving Lydia E. Pinkham's Vegetable Compound a trial and now I am in good health."

The above are only two of the thousands of grateful letters which are constantly being received by the Pinkham Medicine Company of Lynn, Mass., which show clearly what great things Lydia E. Pinkham's Vegetable Compound does for those who suffer from woman's ills.

If you want special advice write to Lydia E. Pinkham Medicine Co. (containing full directions) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

Table Silver. Grace, beauty and quality are all combined in silver articles marked 1847 ROGERS BROS. This brand, known as "Silver Plate that Wears" is made in the heaviest grade of plate. There are many designs from which to choose. Sold by Leading Dealers.

Tobacco Habit. Dr. McTaggart's tobacco remedy removes all desire for the weed in a few days. It is a vegetable medicine, and only requires touching the tongue with it occasionally. Price \$2.00.

Liquor Habit. Marvellous results from taking his remedy for the liquor habit. Safe and inexpensive home treatment; no hypodermic injections; no publicity, no loss of time from business, and a cure guaranteed. Address or consult Dr. McTAGGART, 75 Yonge Street, Toronto, Canada.

SUDDEN DEATH! from Heart Disease, by the slight exertion of climbing stairs, hurrying or lifting, comes to thousands. Most of these sudden deaths might be prevented if the victim only knew their true condition and took prompt and proper treatment. We will gladly send to you the FREE TRIAL PACKAGE of Dr. Fuller's Heart Cure. ABSOLUTELY FREE OF CHARGE. Also Illustrated Book that explains Heart Disease and how it can be cured. Have you Palpitation, Fluttering or Skipping Beats? Shortness of Breath? Sinking Spells? Nervousness? Dizziness? Dropsy? If you have any one of these symptoms, write now for the full free treatment and book. We are Heart Specialists. Fill out coupon below and send to: Dr. Fuller's Heart Cure Co., 280 Madison St., New York, N.Y.

FREE TRIAL PACKAGE AND BOOK COUPON. My Age is: Name: Address: Summer Complaints Kill Little Ones. At first slight of illness during the hot weather give the little ones Baby's Own Tablets, or in a few hours they may be beyond cure. These Tablets will prevent summer complaints if given occasionally to the well child and will promptly cure these troubles if they come on suddenly. Baby's Own Tablets should always be kept in every home where there are young children. There is no other medicine as good and the mother has the guarantee of a government analyst that they are absolutely safe. The Tablets are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

WEDDING BELLS.—At noon on July 30th, 1913, at the home of G. H. Crosby, Elkhorn, Manitoba, Miss Eva W. Davison, only daughter of F. W. and Mrs. Davison, Bedeque, P. E. I., was united in marriage to Mr. Wilbur W. Crosby, only son of Mr. G. H. Crosby. The ceremony was performed by Rev. Mr. Shier, pastor of the Methodist Church in Elkhorn. The bride and groom left by the afternoon train for Fleming, Sask., where a reception was held at the home of Mrs. E. A. Anderson. The bride was the recipient of many valuable presents, cut glass, sterling silver, etc., besides substantial cheques. The young couple will reside in Regina.

WEDDING BELLS.—A very pretty wedding took place in the Convent Chapel at Rustico on Tuesday, July 29th, when Mr. Theodorica Doucet and Miss Janie Doucet were united in marriage by their pastor, Rev. J. Chaisson, D.D. The bride, one of the most popular young ladies of Rustico, was attended by her sister Maggie, while Mr. Sylvester Doucet, brother of the groom, acted in the capacity of best man. During the ceremony, appropriate hymns were sung by the bride's friends who assembled to show their interest in the happy event, and when the bridal party had left the chapel the strains of the wedding march, beautifully rendered, these friends hastened forward to offer their wishes for long life and happiness. After the ceremony the party drove to the home of the bride, where later in the day a large number of friends and relatives assembled to enjoy themselves, and to do justice to the good things which had been provided for their refreshment. The unusually large number of valuable presents received amply testifies to the popularity of the happy couple.

REMINISCENT.—Mrs. David Hunter formerly of Alberton and now a resident of Charlottetown returned a few days ago from a visit to her childhood home in Belfast. The visit brought up some interesting reminiscences. Mrs. Hunter is a descendant of Dr. McCaulay who came to Prince Edward Island in 1803 on the ship Polly and settled in Belfast. During a visit to a neighbor, whose great grandfather also came out in the same ship, she saw a number of apple trees that were brought as seedlings from Scotland by the immigrants. They were planted and bore fruit four years afterwards and have been bearing continuously ever since, the sole living things that now survive of the precious cargo brought by the first immigrant ship to that section of the Island. The bark of the trees is somewhat roughened and shows signs of age but still they bear fruit of excellent quality. Mrs. Hunter was unable to classify the trees as to variety but suggested that samples of the fruit be brought to the Seel Fair for the experts to classify and also on account of their historic value.

Mr. M. D. Jones, of the College of Agriculture University, of Maine, has just completed the second round of lectures on "The Materials which Plants use in the Manufacture of Starch." The work consisted of a demonstration, which is intended to show that the plants take up water from the soil and carbon dioxide from the air, and the presence of sunlight unites these two materials in such way as to form starch. He explained how in carbon dioxide and water the three elements, carbon, hydrogen, and oxygen were found and that in starch were also found these three elements. Mr. Jones urged that the fact of how the animal kingdom was entirely dependent upon the plants for their food, and that should the sunlight be withheld from the face of the earth we would all soon perish with starvation.

THE NUPTIAL KNOT.—At the new German United Baptist Church, on July 30th, at 4.30 p. m., there was solemnized the marriage of Mr. Earl S. Graham, of Halifax, and Miss Vera Mae, second daughter of Mr. Allister De Long, of Bross Corner, N. S. The nuptial knot was tied by Rev. E. A. MacPhee, pastor of the Baptist Church, in the presence of a large assemblage of guests and friends. The happy couple were attended by the bride's sister, Miss Iona L. De Long, and Mr. I. Vincent Dexter, while little Miss Edna Craig, of Halifax, did the honor of flower girl. The bride presented a charming appearance, being gowned in white Duchess satin, trimmed with silk embroidered net, and carried a handsome bouquet of white carnations and asparagus ferns. Her going-away suit was a tailor-made navy blue serge, with black panama hat trimmed with ostrich plumes. The flower girl was dressed in white duchess satin with pink silk braid.

FRIDAY. PRIZE WINNER.—Mrs. William Howard, Cornwall, was one of the prize-winners in the literary contest "Why I Like Summerside." The contest was under the auspices of the Summerside Improvement Association. FUNERAL YESTERDAY.—The funeral of the late Mr. John McGee took place yesterday morning. The members of the Laborer's Protective Union of which he was a member attended in a body. After service in the Pro-Cathedral the remains were laid to rest in the R. C. Cemetery. At the Cathedral a Requiem High Mass was celebrated by Father McQuaid who also conducted the funeral services at the church and grave. Many citizens will learn with regret of the death of Mrs. Wellner, widow of Mr. W. T. Wellner, Charlottetown, which sad event occurred yesterday morning after a protracted illness. Since the death of her husband several years ago, Mrs. Wellner had been in delicate health and the end was not unexpected. She was a most estimable citizen and enjoyed the affection and esteem of a very large circle of friends and acquaintances. There are left to mourn, two sons, Mr. W. T. Wellner, Jewell, Charlottetown, and Lloyd Wellner, a student at Sackville, and two daughters, Mrs. (Dr.) Reid, Charlottetown, and Mrs. Roland Rattenbury, Winnipeg. To the bereaved the Guardian tenders sincere sympathy.

trimming, and carried a basket of pink and white carnations. The bridesmaid was becomingly attired in pink silk, with cream lace trimming, and carried a bouquet of pink carnations. The elegant and costly presents received testify to the high esteem and great popularity of the bride. Amid the congratulations and best wishes of their many friends, Mr. and Mrs. Graham left for P. E. Island where they will spend part of their honeymoon, on return from which they will reside in Halifax. (The officiating clergyman above re in this province).

With reference to the freight rates and other matters in connection with the P. E. Island Railway he had had a very satisfactory interview with Mr. Guitelin and arranged with him for a conference to be held in Moncton, probably next week, when Prince Edward Island's interests will be well represented. He has every reason to believe that these things will be straightened out to the satisfaction of all concerned. Mr. Nicholson had also seen Mr. Miller, head of the contracting firm who are building the Carleton Point railway pier. Work on this contract is already in hand, the plant and equipment for building being already in course of transportation to the site. It is the intention to proceed with the work as rapidly as men and material can push it.

It is the intention of the Department of Public Works to call for tenders at once for the public works provided for in the estimates last session. Among these are the following: Wharves at North River, Rocky Point, Wood Islands, Little Sands, and several others. Tenders for dredging at North Rustico were to have been opened on the 6th, but Mr. Nicholson had not learned the result. Mr. Nicholson enjoyed a pleasant chat with Hon. Premier Borden, who is again on duty, looking and feeling fine and hearty after his short holiday.

In connection with the Summer School for teachers, a public meeting was held last night in the assembly hall of the Prince of Wales College. There was a large attendance including a number of prominent citizens. The Hon. Murdoch McKinnon, Commissioner of Agriculture, presided. Those on the platform with him were the Premier, the Hon. J. A. Matheson, His Worship Mayor Lyons, Rev. Dr. Fuller, Dr. R. H. Campbell (Superintendent of education), Prof. T. Ross (Secretary of Agriculture), Principal Smith, of Chester, Mass., Principal Morehouse, of Amherst, N. S., Dr. S. R. Jenkins, Principal J. Landrigan, Principal J. D. Seaman, Mr. D. W. Hamilton, of Montreal, Inspectors Boulter, V. Crockett and D. J. Mullins and Mr. T. C. James.

The proceedings opened with an enjoyable chorus, and in the course of the evening two delightful solos were rendered by Miss Bremner, whose excellent singing was loudly applauded. The addresses were of a most interesting and encouraging description, and a fuller account of them will be given in to-morrow's Guardian. The Chairman called upon the Premier as President of the Board of Education to address the meeting.

ADDRESS BY THE PREMIER. The Premier congratulated the students on coming to the end of the first session of the Summer School and referred to the importance of the subjects which had been receiving attention, which were included in the comprehensive term of nature study. After referring to the fact that they had been favored with the most distinguished instructors in the various departments that could be found on the continent of North America, he stated that while the study of classics was splendid and valuable in itself, it resolved itself into a question as to whether nowadays they could devote sufficient time to that in their curriculum as now constituted. He felt that it would be generally admitted that that knowledge was of most worth that enabled them to make a living, and next that the knowledge which was of most worth was that which would enable them to live. There was no class of people of more importance to the community in working out these two

problems and presenting them to the rising generation than the teachers. (Applause). The people who had the power to influence the rising generation and bring them to realize the true value of life and the necessity for making the most of it were the teachers in the elementary schools, the teachers, who had it within them to lay the foundations upon which the future manhood and womanhood of the citizens would be built. The teachers were people of power and influence in the community for it was they who had the opportunity of taking charge of the children in their impressionable years and moulding them in whatever fashion they desired. He had never felt so much hope and so much courage as he had when he learned that over 250 teachers had enrolled themselves in this new venture of the Summer School. Their names would go down to posterity as the founders of the new school, a charter roll which would stand for all time as the men and women who had come into line with the great improvement which the new department in elementary education showed. (This was no less than to modernise our methods of teaching).

ENCOURAGEMENT. The premier proceeded to give some words of encouragement and a warning to the teachers who attended the school. They were not to go away, with the idea that they had learned everything in this first course. They had only made a beginning, and when they returned to their schools they were not to be discouraged if they did not meet with all the success which their enthusiasm anticipated. They must remember that in very many cases the best teachers felt that their efforts fell far short of their wishes for attainment. The most successful teachers in after life were very often those who at the commencement suffered most in this respect. He reminded them that our people as a whole were very conservative in their ideas. After all, what our people dreaded most were new things, innovations. They must make progress slowly in innovation, but they could rest assured in this, that though opposition were offered at the outset, when they were sure that the new introductions they were making would stand the test of time in the end they would have the reward of seeing them generally accepted. It was necessary that they should have patience, that patience which the Gods loved. The system of teaching changed as the world changed and progressed; there were the theories and application, and the best teacher was he who took advantage of his opportunities and adapted himself to the new conditions. If the teachers took a broad view of life and advantage of the varied interests to widen their outlook, the education afforded to the rising generation

MOYSE—JENKINS.—A pretty wedding ceremony was celebrated at Central Bedeque, Wednesday, Aug. 6th, when Miss Edna Barrie, eldest daughter of Mr. and Mrs. Thomas Moyses, was united in marriage to Mr. Wallace N. Jenkins, of Victoria, B. C. This marriage service was performed by Rev. H. Johnson at 5 o'clock p. m. on the lawn where a beautiful arch of evergreens and flowers was erected in which hung a large bell of leaves and flowers and red autumn berries. On a carpet of roses, and under this perfumed bower the knot was tied. Lohngrin's wedding march was played by Miss Mary Schurnan as pianist, who later rendered numerous selections as the banquet proceeded. After an informal reception the guests repaired to the banquet room where the wedding cake was cut with the usual ceremony. The bride looked very beautiful in a handsome wedding gown of cream crepe de chene and carried a large sherry bouquet of sweet peas. About forty of the nearest relatives were invited, some of whom came from New York, Boston, Vancouver and other distant points. The bride is a graduate of Prince of Wales College, and also attended Mt. Allison Ladies' College, Sackville, N. B. She is an accomplished vocalist and pianist, and is deservedly popular among the younger set and will be much missed in church and social activities. Mr. Jenkins is also a graduate of Prince of Wales College and is a gold medalist from the McDonald school. He is at present engaged teaching in the Boys' Central School, Victoria, B. C., and is very popular and successful. The groom's gift to the bride was a gold necklace with pendants set with clusters of pearls. The other gifts included cheques from the fathers of the bride and groom respectively, also cheques from a number of friends besides an innumerable list of useful and costly articles from friends far and near. The bride and groom left Thursday morning by the Empress for their long trip across the continent to Victoria where they will be at home after Sept. 1st, at 3730 Aquith Ave.

Mr. Donald Nicholson, M. P., returned last night from a short visit to Ottawa. Asked by a Guardian representative as to the "news from the Capital", Mr. Nicholson stated that, at the outset, he desired to forestall a probably erroneous impression that might be created by an "interview" with him in Ottawa, on fox ranching, a telegraphic report of which appeared in Wednesday's Guardian. It was true, he stated, that he had interviewed Dr. Torrence, the Veterinary Inspector General, and represented to him the necessity of inquiring into the sanitary conditions of fox ranches in Prince Edward Island. He did this on the suggestion of a number of well-informed foxmen in the province, not because foxes had died, as stated by the interviewer, but to prevent them dying, as ranches long occupied by foxes are liable to breed disease. He considered that the greatness of the fox industry warranted this and Dr. Torrence not only agreed with him, but promised to send a competent inspector to make a thorough investigation. Mr. Nicholson either thought not stated that there is any cause of alarm nor any undue mortality among P. E. Island foxes, but he thinks the safety and permanence of the fox business demands that every precaution be taken to safeguard the health of the valuable animals and he was pleased to say such precautions are now about to be taken.

With reference to the freight rates and other matters in connection with the P. E. Island Railway he had had a very satisfactory interview with Mr. Guitelin and arranged with him for a conference to be held in Moncton, probably next week, when Prince Edward Island's interests will be well represented. The Chairman called upon the Premier as President of the Board of Education to address the meeting.

ADDRESS BY THE PREMIER. The Premier congratulated the students on coming to the end of the first session of the Summer School and referred to the importance of the subjects which had been receiving attention, which were included in the comprehensive term of nature study. After referring to the fact that they had been favored with the most distinguished instructors in the various departments that could be found on the continent of North America, he stated that while the study of classics was splendid and valuable in itself, it resolved itself into a question as to whether nowadays they could devote sufficient time to that in their curriculum as now constituted. He felt that it would be generally admitted that that knowledge was of most worth that enabled them to make a living, and next that the knowledge which was of most worth was that which would enable them to live. There was no class of people of more importance to the community in working out these two

problems and presenting them to the rising generation than the teachers. (Applause). The people who had the power to influence the rising generation and bring them to realize the true value of life and the necessity for making the most of it were the teachers in the elementary schools, the teachers, who had it within them to lay the foundations upon which the future manhood and womanhood of the citizens would be built. The teachers were people of power and influence in the community for it was they who had the opportunity of taking charge of the children in their impressionable years and moulding them in whatever fashion they desired. He had never felt so much hope and so much courage as he had when he learned that over 250 teachers had enrolled themselves in this new venture of the Summer School. Their names would go down to posterity as the founders of the new school, a charter roll which would stand for all time as the men and women who had come into line with the great improvement which the new department in elementary education showed. (This was no less than to modernise our methods of teaching).

ENCOURAGEMENT. The premier proceeded to give some words of encouragement and a warning to the teachers who attended the school. They were not to go away, with the idea that they had learned everything in this first course. They had only made a beginning, and when they returned to their schools they were not to be discouraged if they did not meet with all the success which their enthusiasm anticipated. They must remember that in very many cases the best teachers felt that their efforts fell far short of their wishes for attainment. The most successful teachers in after life were very often those who at the commencement suffered most in this respect. He reminded them that our people as a whole were very conservative in their ideas. After all, what our people dreaded most were new things, innovations. They must make progress slowly in innovation, but they could rest assured in this, that though opposition were offered at the outset, when they were sure that the new introductions they were making would stand the test of time in the end they would have the reward of seeing them generally accepted. It was necessary that they should have patience, that patience which the Gods loved. The system of teaching changed as the world changed and progressed; there were the theories and application, and the best teacher was he who took advantage of his opportunities and adapted himself to the new conditions. If the teachers took a broad view of life and advantage of the varied interests to widen their outlook, the education afforded to the rising generation

MOYSE—JENKINS.—A pretty wedding ceremony was celebrated at Central Bedeque, Wednesday, Aug. 6th, when Miss Edna Barrie, eldest daughter of Mr. and Mrs. Thomas Moyses, was united in marriage to Mr. Wallace N. Jenkins, of Victoria, B. C. This marriage service was performed by Rev. H. Johnson at 5 o'clock p. m. on the lawn where a beautiful arch of evergreens and flowers was erected in which hung a large bell of leaves and flowers and red autumn berries. On a carpet of roses, and under this perfumed bower the knot was tied. Lohngrin's wedding march was played by Miss Mary Schurnan as pianist, who later rendered numerous selections as the banquet proceeded. After an informal reception the guests repaired to the banquet room where the wedding cake was cut with the usual ceremony. The bride looked very beautiful in a handsome wedding gown of cream crepe de chene and carried a large sherry bouquet of sweet peas. About forty of the nearest relatives were invited, some of whom came from New York, Boston, Vancouver and other distant points. The bride is a graduate of Prince of Wales College, and also attended Mt. Allison Ladies' College, Sackville, N. B. She is an accomplished vocalist and pianist, and is deservedly popular among the younger set and will be much missed in church and social activities. Mr. Jenkins is also a graduate of Prince of Wales College and is a gold medalist from the McDonald school. He is at present engaged teaching in the Boys' Central School, Victoria, B. C., and is very popular and successful. The groom's gift to the bride was a gold necklace with pendants set with clusters of pearls. The other gifts included cheques from the fathers of the bride and groom respectively, also cheques from a number of friends besides an innumerable list of useful and costly articles from friends far and near. The bride and groom left Thursday morning by the Empress for their long trip across the continent to Victoria where they will be at home after Sept. 1st, at 3730 Aquith Ave.

Mr. Donald Nicholson, M. P., returned last night from a short visit to Ottawa. Asked by a Guardian representative as to the "news from the Capital", Mr. Nicholson stated that, at the outset, he desired to forestall a probably erroneous impression that might be created by an "interview" with him in Ottawa, on fox ranching, a telegraphic report of which appeared in Wednesday's Guardian. It was true, he stated, that he had interviewed Dr. Torrence, the Veterinary Inspector General, and represented to him the necessity of inquiring into the sanitary conditions of fox ranches in Prince Edward Island. He did this on the suggestion of a number of well-informed foxmen in the province, not because foxes had died, as stated by the interviewer, but to prevent them dying, as ranches long occupied by foxes are liable to breed disease. He considered that the greatness of the fox industry warranted this and Dr. Torrence not only agreed with him, but promised to send a competent inspector to make a thorough investigation. Mr. Nicholson either thought not stated that there is any cause of alarm nor any undue mortality among P. E. Island foxes, but he thinks the safety and permanence of the fox business demands that every precaution be taken to safeguard the health of the valuable animals and he was pleased to say such precautions are now about to be taken.

With reference to the freight rates and other matters in connection with the P. E. Island Railway he had had a very satisfactory interview with Mr. Guitelin and arranged with him for a conference to be held in Moncton, probably next week, when Prince Edward Island's interests will be well represented. He has every reason to believe that these things will be straightened out to the satisfaction of all concerned. Mr. Nicholson had also seen Mr. Miller, head of the contracting firm who are building the Carleton Point railway pier. Work on this contract is already in hand, the plant and equipment for building being already in course of transportation to the site. It is the intention to proceed with the work as rapidly as men and material can push it.

It is the intention of the Department of Public Works to call for tenders at once for the public works provided for in the estimates last session. Among these are the following: Wharves at North River, Rocky Point, Wood Islands, Little Sands, and several others. Tenders for dredging at North Rustico were to have been opened on the 6th, but Mr. Nicholson had not learned the result. Mr. Nicholson enjoyed a pleasant chat with Hon. Premier Borden, who is again on duty, looking and feeling fine and hearty after his short holiday.

In connection with the Summer School for teachers, a public meeting was held last night in the assembly hall of the Prince of Wales College. There was a large attendance including a number of prominent citizens. The Hon. Murdoch McKinnon, Commissioner of Agriculture, presided. Those on the platform with him were the Premier, the Hon. J. A. Matheson, His Worship Mayor Lyons, Rev. Dr. Fuller, Dr. R. H. Campbell (Superintendent of education), Prof. T. Ross (Secretary of Agriculture), Principal Smith, of Chester, Mass., Principal Morehouse, of Amherst, N. S., Dr. S. R. Jenkins, Principal J. Landrigan, Principal J. D. Seaman, Mr. D. W. Hamilton, of Montreal, Inspectors Boulter, V. Crockett and D. J. Mullins and Mr. T. C. James.

The premier proceeded to give some words of encouragement and a warning to the teachers who attended the school. They were not to go away, with the idea that they had learned everything in this first course. They had only made a beginning, and when they returned to their schools they were not to be discouraged if they did not meet with all the success which their enthusiasm anticipated. They must remember that in very many cases the best teachers felt that their efforts fell far short of their wishes for attainment. The most successful teachers in after life were very often those who at the commencement suffered most in this respect. He reminded them that our people as a whole were very conservative in their ideas. After all, what our people dreaded most were new things, innovations. They must make progress slowly in innovation, but they could rest assured in this, that though opposition were offered at the outset, when they were sure that the new introductions they were making would stand the test of time in the end they would have the reward of seeing them generally accepted. It was necessary that they should have patience, that patience which the Gods loved. The system of teaching changed as the world changed and progressed; there were the theories and application, and the best teacher was he who took advantage of his opportunities and adapted himself to the new conditions. If the teachers took a broad view of life and advantage of the varied interests to widen their outlook, the education afforded to the rising generation

problems and presenting them to the rising generation than the teachers. (Applause). The people who had the power to influence the rising generation and bring them to realize the true value of life and the necessity for making the most of it were the teachers in the elementary schools, the teachers, who had it within them to lay the foundations upon which the future manhood and womanhood of the citizens would be built. The teachers were people of power and influence in the community for it was they who had the opportunity of taking charge of the children in their impressionable years and moulding them in whatever fashion they desired. He had never felt so much hope and so much courage as he had when he learned that over 250 teachers had enrolled themselves in this new venture of the Summer School.
