ENGLISH FISHERMEN READY FOR AMERICAN ANGLERS

Several of Yorkshire's champion sea anglers have already been employed to conduct parties of visiting Americans.

The annual report of the British Sea Anglers' Society records the capture by members of some notable fish including five tunnies of 735 pounds 630 pounds 591 pounds, 560 pounds and 392 pounds caught in local waters last summer.

Probably the largest tunny caught and recorded was hooked in Nova Scotia waters and weighed 758 pounds or 23 pounds more than the prize catch off Scarborough.

WILMOT VALLEY

A few more days of fine weather will soon see some of the land ready for work, as the past week has dried up the wet places considerably. We are not very much behind last year, as there is practically no frost in the ground.

We are glad to report that Mrs. Edward Clark, who was ill last week, is very much better.

Mr. Darius Hogg is still suffering from a sore knee. At present he is visiting his sister, Mrs. James Clark, North Bedeque.

The Young Peoples' Society of the North Bedeque United Church is getting up a concert. Good talent is always available in this group and this concert promises to be no exception. Watch for date later.

The three-act play "Take My Advice," being re-enacted by Excelsior Division, Sons of Temperance, is progressing nicely, and this energetic organization hope to have it ready in the near future.

Several of the farmers from this locality attended the sale in Albany of Mrs. Henry Lowther on the 21st instant.

Messrs. Harry and Bruce Curtis were visitors to Charlottetown on the 16th instant, on business.

Mr. James McMurdo, Kelvin, attended a meeting of the United Church Congregation in Kensington on the 21st instant.

Most of the potatoes around here have been pretty well disposed of and some of the farmers are very busy hauling their supply of fertilizer for this summer's crop. While the past season's experience as regards price was not of the best, yet we look forward to better prices for the coming season. Perhaps it is because these words "Hope springs eternal in the human breast" are very true.

The roads have quickly assumed their summer here in this locality. Most of the snow having disappeared very quickly and cars once more on their annual travels. It does one good to see the warm days of spring approaching, to feel that mother earth comes back to us in all her freshness of green verdure. Let us appreciate these wonderful blessings of ours more fully every ensuing day.

Among those from Wilmot Valley and vicinity who attended the Social Service Council meetings in Charlottetown recently were Rev. J. W. A. Nicholson and J. Austin Jardine and G. Emerson Huestis, the latter two representing the Sons of Temperance of the Province. These meetings were both helpful and inspirational.-W.

GREAT FUEL FOR GRATES

for chilly evenings when the old grate fire warms you up cozily and restful. Here's the ideal fuel CANNEL COAL. If you have never tried this coal, we suggest that you order some today and enjoy a real fire.

FACTORY MIXED FERTILIZERS

Experience has shown that larger and more uniform yields can be produced by using Factory Mixed Fertilizers, which increased yields pay many times over for the additional cost of the Mixed Fertilizers are compared with the cost of straight Chemicals which are mixed at home.

The percentage of farmers who have gone back to mixing their own chemicals after having used Mixed Fertilizers is practically negligible, which is surely sufficient proof that there must be something in the argument that Factory Mixed Fertilizers are BETTER and worth the additional cost.

When we advocate the use of Mixed Fertilizers we feel we are working in the interests of the farmers, otherwise we could not recommend them as the success of the farmers on Prince Edward Island means our success.

After making allowance for plant overhead, interest on our investment, and additional labor involved, our net profit on Mixed Fertilizers is practically the same as our net profit on straight Chemicals. You will see, therefore, that it is not with the idea of material gain that we strongly recommend every farmer on Prince Edward Island who is not already using Mixed Fertilizers to try them out this year.
