ECZEMA IN FORM OF RASH Face Utterly Disfigured. Cuticura Heals.

"Some time ago eczema broke out on my face in the form of a rash. It continued to spread and become more unsightly week by week. The irritation caused me to scratch my face, which after a few weeks was utterly disfigured. The trouble went on for at least two months. A friend advised me to try Cuticura Soap and Ointment and I purchased a box of Ointment and a cake of Cuticura Soap and before they were used I was healed." VIII. FRED'S CHRISTMAS (Drawing: Fred)

The Spirit took Scrooge to the Christmas celebration of his nephew, Fred, little Fan's son. They were having the greatest time there. Fred and his wife and several guests. The whole party was acting like children, playing Blinkmen's Bluff, roasting chestnuts and talking about various things in general. Scrooge came in for his share of the talk and he was terribly sorry he hadn't accepted Fred's invitation to Christmas dinner.

But after all, the party wished Scrooge a Merry Christmas and the old man turned to the Spirit at his side and smiled, happily. They wandered about some more and then all of a sudden the clock struck twelve. Just why, Scrooge did not know, but it did, and the Spirit of Christmas Present disappeared. As this happened, Scrooge looked around and there it was, coming toward him.

(What was it? The answer comes tomorrow.) (Copyright, 1924)

World's Largest Chimes.

The largest chime of bells in the world embracing a peal of fifty-three bells, weighing over fifty tons without the framework, is being made in England for John D. Rockefeller, Jr., to be installed in the Park Avenue church, New York, in memory of his mother. It is a tribute to British skill and workmanship that, in spite of keen international competition, the contract for this carillon was secured by a well-known firm of London bellmakers. The largest carillon up to the present time has been that at Malines, in Belgium.

But the possibilities of the Soya bean are not limited to its value as a food. It is used extensively in the manufacture of glycerine, explosives of various kinds, water-proofing material, linoleum, enamels, varnish, soap, celluloid, printing ink, paint, and lubricating oil.
