

JEWISH COUNCIL PROTEST

Adopt Resolution Denouncing the Russian Minister of Justice

DENVER, Oct. 25, (Special)—The Central Jewish Council of Denver, has adopted resolutions denouncing the Russian Minister of Justice and the Public Prosecutor in the province of Keif as eliminators of the entire Jewish race in the case against Bellis.

This charge of "ritual murder" against Bellis, the resolutions say, is one of the "most ancient and vicious methods of prosecution practiced against the Jews, and was long ago declared by leading Christians as a foul and Satanic falsehood."

PARTY OF MOHAMMEDANS GOING TO SYDNEY.

MONTREAL, Oct. 23—A party of thirty of forty people whom the attendants at the C.P.R. immigration quarters believe to be Mohammedans from Asia Minor, left Montreal on their way from Calgary to Sydney, N. S.

WOMEN ASK LAW TO KILL MORMONISM.

WASHINGTON, Oct. 23—Legislation prohibiting polygamy and abolishing the Mormon church in the United States was asked of President Wilson today by the Methodist Woman's Home Missionary Society.

SICK, SOUR STOMACH, INDIGESTION OR GAS

"PAPE'S DIAPEPSIN" MAKES UPSET STOMACHS FEEL FINE IN FIVE MINUTES.

Wonder what upset your stomach— which portion of the food did the damage—do you? Well, don't bother. If your stomach is in revolt; if sour, gassy and upset, and what you just ate has fermented into stubborn lumps; head dizzy and aches; belch gases and acids and eructate undigested food; breath foul, tongue coated—just take a little Pape's Diapepsin and in five minutes you wonder what became of the indigestion and distress.

Millions of men and women today know that it is needless to have a bad stomach. A little Diapepsin occasionally keeps this delicate organ regulated and they eat their favorite foods without fear.

No Flour Made From One Wheat Only Is Good For BOTH Pastry And Bread.

Western Wheat makes a strong bread flour which, however, lacks flavor.

Ontario wheat makes the best full flavored pastry flour. This is because of the peculiarities of the wheat itself. Ontario wheat is rich in nutriment and flavor but lacks strength or strong baking qualities. Western Wheat has the strength without the flavor or pastry making qualities.

"Beaver" Flour is a scientific blend of both, giving you all the flavor and nutriment and pastry making qualities of Ontario wheat with the added strength of the Western Spring Wheat.

DIVERTED LAW NOT A REMEDY

LONDON, Oct. 25, (Special)—The textile section of the London Chamber of Commerce yesterday appointed a committee to organize opposition to the bill prohibiting the importation of plumage to Great Britain.

The chairman declared that prohibitory legislation merely would divert trade in other countries and would not save the life of a single bird.

EARLIEST SNOW IN FIFTY YEARS.

LOUISVILLE, Ky., Oct. 20—A light fall of snow was recorded this morning in eastern and southern Kentucky. Trenton reported a fall of two inches and in several other places the ground was covered with one inch or more. The earliest fall of snow previously recorded in this State, was October 27, nearly fifty years ago.

BAD WINTER, SAYS MAINE FORECASTER.

PASSADUMKEAG, Me., Oct. 22—Prof. Carl M. Anderson, who has a wide reputation in this section of the State as a weather forecaster, says that the latter part of October will be marked with severe disturbances, heavy rains and gales. November will come in bright, but a cold wave will set in by the 15th and there will be plenty of snow and fine sleighing for Thanksgiving.

The latter part of the month will be real wintry weather cold with northeast snow storms. December will be a cold and stormy month with blizzards and much bad weather of the coast. The new year will open with a mild spell in January, followed by heavy snowfalls and will finish up with cold wave and high winds. It will be cold through February and March. The snowfall for the winter will come in scattered storms and will be heavy.

STEAMER BERLIN SAVED SIX MEN.

NEW YORK, Oct. 21.—Six shipwrecked mariners were brought to port by the liner Berlin to-night from Mediterranean ports. They were picked up in the open sea early this morning, when their vessel, the schooner Marjorie Brown, which had sprung a leak, was about to sink.

Capt. J. T. Walker, of the schooner, had his crew of five with him in a small boat hitched to the sailing craft's stern as the liner opportune came up. All were taken safely on board the Berlin after a sharp struggle with the waves, which were running high. The boat's crew had only one pair of oars left, the others having been washed away, and the men had all they could do to pull from their ship to the steamer's side. The schooner sank 15 minutes after the Berlin left the scene of the rescue.

The schooner Marjorie Brown was a four-masted vessel of 1211 tons gross and was bound from Newport News to Providence, with a cargo of 2,000 tons of soft coal. During the gale of last night the vessel began leaking, and it is believed the cargo of coal worked into the pumps, which were clogged and rendered useless.

INTERVENTION NOT JUSTIFIED

America Has no Right to Interfere in Mexican Problem

BUENOS AYERES, Oct. 25, (Special)—La Prensa, in commenting on the Mexican problem, says:

The proposal to interfere with the affairs of Mexico shows that the United States does not fully respect the sovereignty of the Latin-American States. The American interests in Mexico do not justify intervention. The United States need not entertain relations with General Huerta, but has no right to interfere. It is to be regretted that the American government does not follow the policy recommended by Mr. Barrett and Mr. Bacon.

BE THANKFUL FOR LOVE.

We have all known what it is to come home so tired that we can hardly drag one foot after the other when our nerves are on edge, and we feel like screaming if anyone speaks to us. But then comes the soothing influence of all the home means; the rest and peace wrapped up in that one word; the love that meets us at the threshold in the person of the mother, the wife or of the child who throws her arms around our neck and innocently pretends all the doings of the day—the sweetest music of welcome. We feel a load lifted from tired heart and brain at once, and take courage again. We have come back out of the heat and the toil, among pitiless strangers in an unforgiving world, to the refuge love provides. But suppose it was not the way. Suppose after a day of drudging labor we came home to brawling discord. Suppose we were met with scowls and frowns instead of loving looks. When you think of what your home evening might be in the absence of affection and sympathy, be thankful for the love that is at the door with out stretched arms to take you in.

"THANK YOU, DRIVER."

Notices to the public are usually made with little regard to politeness. The wayfarer is likely to meet with a warning or a caution couched in strong, but curt terms. However, in London, Eng., there is one instance where the regard for the passenger is taken for granted and is acknowledged. At the hospital just opposite the entrance to the East India docks and the Blackwall Tunnel—under the Thames—notice boards are set up asking the drivers for the sake of those who are ill within, to walk their horses past the building. That is a common enough request, but what gives it a peculiar interest there is the carter, having complied or not with the modest demand, is confronted at the other corner of the building by another board, saying, "Thank you, driver."

APPLE MARMALADE

Peel, core and quarter apples until you have two pounds, place them in a jar with four ounces sugar and one ounce of butter, and stand the jar in a saucepan containing boiling water, or when more convenient, in a cobb oven. Cook until soft, and pass through a fine sieve. This is nice for filling turnovers or other pastries.

PARIS SURGEON'S TRAGIC DEATH

PARIS, Oct. 25, (Special)—The noted surgeon, Justice-Championniere, dropped dead from acute angina pectoris while reading before the committee of the Academy of Sciences a paper on the Pre-Historic Trepanning. The paper was written for delivery at the annual fete on Saturday of the Five Academies of the Institute of France.

Dr. Lucas-Championniere was born in 1843. He was a member of the Academy of Medicine. His father was the founder of the Journal of Medicine and Surgery. He himself was an ex-president of the Society of Surgery.

SON THANKS FRANCE FOR MORGAN HONOR.

PARIS, Oct. 23—J. Pierpont Morgan called at the French Foreign Office and thanked the foreign minister for the military honors rendered by the French government to his father's memory, and Minister Pichon for a gold medal bestowed in recognition of his father's extension of the Leon Blanc Hospital at Aix les Bains.

SIR HENRY WOOD BREAKS ALL THE PRECEDENTS IN ENGLAND.

LONDON, October 23—Sir Henry Wood, director and conductor of the Queen's Hall orchestra for symphony concerts, has broken all English precedents by engaging four women violinists and two women viola players for the forthcoming season. Sir Henry says:

"For years I have felt that women were being unfairly treated by the orchestral world. There are hundreds of exceptionally talented women violinists without any professional outlet for their genius. The violin is woman's ideal musical instrument, and the average cultured woman violinist is superior to the average man. What is more important, the average woman musician is much more enthusiastic than the average man. The women in my orchestra will be paid the same amount as the men. My chief hope is that every other professional orchestra will follow the lead we have taken."

LOAN SHARK MUST SERVE SIX MONTHS IN JAIL FOR USURY

NEW YORK, Oct. 23—Daniel H. Tolman, known to many cities in the United States and Canada as "King of Loan Sharks," must serve six months in jail for usury. The Supreme Court so decided today in denying his appeal from conviction on October 9 of having violated the law in charging a bond of \$5 for a \$10 loan for three months.

CANNED PUMPKIN

Peel the pumpkin, take out the seeds, and cut it into cubes half an inch square. Make a syrup of a scant cup of sugar to a quart of water; bring to a fast boil and take off the scum. Put in the pumpkin cubes and cook tender, but not until they break. When a straw will pierce them easily they are ready to be canned. Have the cans ready in a pan of boiling water. Take up the pumpkin with perforator or a split spoon and fill the jars. Pour in the syrup, boiling hot from the kettles until the jars are brimming full and seal at once. You may season with cloves or cinnamon if you like, while in cooking or when the jars are opened for pie making. Then flavor to taste.

A SIMPLE PLAN TO INSURE A NIGHT'S REST

Now that the fall days are here, with their attendant high winds, the annoying flapping of the window shades more annoying and more destructive of sleep than a certain flapping in a bedroom.

Physicians say that the window of the sleeping room should be raised slightly from the bottom and lowered slightly from the top, to insure a circulation of air. This will invariably cause the curtains to flap if there is even the slightest wind, and, besides this, unless the curtain is raised entirely to the top, there cannot be a very free circulation.

Now, both of these drawbacks can be obtained if a second pair of curtain fixtures is fastened on the window sides, six or eight inches below the regular pair. It is but a moment's work to lift the curtain from the regular set and place it upon the second set. Then the window may be lowered from the top as far down as the extra set of fixtures, the curtain will not flap and still you have the use of the regular set to cover the window.

A great many of the most modern houses are now being constructed with this extra set of fixtures, not only in the sleeping rooms, but also in the sitting room, dining room, etc. For those housekeepers, however, who do not have them already in the houses it is a very simple matter to have them put on. They cost only a few cents and almost any one can fasten them up, especially as they do not fit closely into the corners like the regular fixtures and, therefore, are not difficult to fasten.

It is not alone at night that this little device is of convenience. Frequently in the daytime when the sun is strong and a person does not want it shining directly upon her and yet needs all the light she can get it will be found to be a great convenience. The curtain can be slipped on the second pair in an instant and the space at the top will admit an enormous amount of light into the room while the occupant can sit in the shade caused by the curtain, which still screens the central, or main part of the window.

GABY AGAIN TO FRONT

London Clergyman in Arms Against Palace Theatre Sketch

LONDON, Oct. 25, (Special)—Consternation has been caused at all the London music halls and theatres in which eccentric or "Oriental" dancing forms part of the performance by the action of the Bishop of Kensington and other clergymen in protesting against the sketch entitled "A La Carte," in which Gaby Deslys is appearing at the Palace Theatre.

The Lord Chamberlain has taken notice of the complaint and has warned the manager, Alfred Butt, that if public morality is outraged further his license for stage plays will be cancelled. Mr. Butt contends that there is nothing improper about it.

LOWELL WOMAN IS BURNED TO DEATH.

LOWELL, Oct. 23—Mrs. Emily M. Reed, seventy-eight, of No. 243 Westford street, Lowell, died of burns received while building a fire at her home early today.

STIFF SENTENCES.

VANCOUVER, B. C., Oct. 23.—Judge Hovey to-day passed sentence on more than two score Nanaimo rioters. The maximum sentence was two years. Many union officers will spend the next year in jail.

Three men and two boys were sentenced to serve two years in the penitentiary; twenty-three were given imprisonment for one year and were fined \$100 each, and eleven were sent to jail for three months and had to pay a fine of \$50 each. All sentences dating from the time of arrest.

The sentences to serve two years were:

J. J. Taylor, vice-president of the British Columbia Federation of Labor, and vice-president of the Ladysmith Local of the United Mine Workers of America; Samuel Guthrie, president of the Ladysmith Union; Paul Deonnik, a leader, and two boys, John Morgan, son of a prominent mine foreman, who was also given a jail term, and William Simpson, Jr., son of a mine contractor.

Taylor and Guthrie pleaded guilty to having taken part in the disturbance, and gave as their excuse that they headed processions of the union miners which led to disturbing the peace.

A sentence of one year in jail and \$100 fine was imposed upon John A. Scott, J. H. Armstrong, Carl Axel, George E. F. Saugman, William Baul, George Bauld, George Baumgartner, Samuel Brightman, James Colley, Robert Cossar, Peter Calaska, H. H. Langdon, Duncan McKenzie, secretary of the Ladysmith Union; Joseph Meirs, Jr., James Marshall, Charles Mortimer, Steve Merus, Steve Puy-anich, George Porter, William Stackhouse, formerly a lieutenant in the United States army, and a prominent business man of Ladysmith; Martin Stogor, James Wallace, Robert Walshaw and Charles Yogle.

THE ADVENT OF THE UMBRELLA

The threatened strike of New York umbrella makers serves to draw attention to the origin and history of this very useful article. Umbrellas were described in early dictionaries as "a portable penthouse to carry in a person's hand to screen him from violent rain or sun." Umbrellas appear in the carvings at Persepolis. Niebuhr saw a great Arabian prince returning from a mosque, he and each member of his family having a large umbrella carried overhead. Old Chinaware shows the Chinese shaded by umbrellas. They were first used in America in Baltimore, brought from India in 1712. It is said that the first person who commonly carried an umbrella in London was the benevolent Fomas Hanway, who died in 1788. John McDonald, a footman, who wrote his own life, said that he had "a fine silk umbrella, which he brought from Spain," but he could not with any comfort to himself use it, the people calling out, "Frenchman! why don't you get a coach?" The hackney coachman and chairmen were clamoring against their rival. The footman says he persisted for three months till they took no further notice of this novelty. Foreigners began to use theirs, and then the English.

Granulation of the Eyelids

Is Cured by Dr. Chase's Ointment—Scores of Uses for the Great Soothing, Healing Ointment.

Most people know Dr. Chase's Ointment best as a cure for eczema and itching piles. Nor is this to be wondered at when you think of the remarkable record made in this class of cures.

But there are scores of other uses for this ointment, which are only discovered when it is kept constantly at hand. Mrs. Martin, 13 Carroll street, Toronto, formerly of Bowmanville, Ont., writes: "We have used Dr. Chase's Ointment for years, and found it invaluable in treating skin irritations and all sorts of burns and wounds. In fact, we would not be without it in the house. It is a most excellent treatment for granulated eyelids, from which I suffered without finding anything to help me. Wherever there is itching of the skin or sore that refuses to heal you can use Dr. Chase's Ointment with full assurance that it will prove entirely satisfactory. 60 cents a box, all dealers, or Edmanson, Bates & Co., Limited, Toronto.

CROY WEDDING IS POSTPONED

BERLIN, Oct. 25, (Special)—Rumors are in circulation in Berlin, and perhaps have reached America, that the wedding of Miss Nancy Leishman and the Duke of Croy has been "indefinitely postponed."

Inquiries in quarters in Berlin, which must know the truth, do not elicit any confirmation of such reports. Ambassador Leishman, as late as the end of last week, wrote to Irwin B. Laughlin, secretary of the American embassy in London, asking him to go to Geneva for the ceremony on October 28, and to be one of the official witnesses at the wedding.

TAILOR-MADE.

The first smart toilettes for spring wear are usually of the coat and skirt type. Not the ordinary tailor-made which is such a boom for dull days, but a glorious edition in moire or satin or brocade, which will not be out of harmony with the most up-to-date millinery. Just no the supreme smartness of brocade suggests a coat of the short, fussy type, either satin broche or a velvet brocade on satin or crepe de chene, with a short skirt corresponding with the groundwork. The coats (says the lady) have three-quarter sleeves, with bread turn-up cuffs, which with the facings are mostly of the plain material. The back has simulated pleats or folds, and the lace ruffles and buttons are features of interest. Large buttons of satin nearly covered by crochet or tating in rich silk are delightful, and there are exquisite specimens in cut steel and jet or in dull silver with fine paste.

TO PREVENT THE "SHINE" ON SERGE OFFICE SKIRTS.

For the business woman who each day presides at a desk and uses a smooth-faced office chair, and who soon finds her serge skirt getting that inevitable "shiny look," which sponging and pressing never utterly eradicate, there is nothing better than this simple advice:

Always keep on the chair seat a covering of thin, rough leather. This leather seat against the cane or wood will prevent all friction when turning or getting up and down, and the skirt will keep its original finish unimpaired.

One of my friends, after her skirts have become shiny, has another way of removing the "shine." She takes either very fine sandpaper or emory-paper and gently rubs the shiny surface. This roughs up the material; if done gently it will not harm it at all.

CHIEF CAUSE OF CANCER IS RAW FOOD, HE SAYS.

Prof. Metchnikoff of Paris announced this week a discovery in connection with the search for a cancer cure which in his opinion is even more important in its consequence than Noguchi's discovery of the rabies microbe. The scientist who is responsible for the latest progress of the medical science is Prof. Fibiger of Copenhagen.

Prof. Fibiger after a long series of studies has been able to reproduce true cancer experimentally. Prof. Metchnikoff explained that tumors which heretofore have been inoculated in rats and mice in experimental work have been grafted on the animals. But these grafted cancers do not possess all the characteristics of true cancers, which can only be found in the experimental cancer which is given directly to a rat by the Danish bacteriologist.

Two facts stand out prominently from the experiments of Prof. Fibiger: First, a convincing proof that cancer is a microbe disease, and, second, that it is transmitted externally. Prof. Metchnikoff points out that the cancer which Fibiger studied among rats is one of the forms of the disease most not to be feared, as it bears a very marked resemblance to human cancer. In discussing these experiments the noted French scientist said:

"It has been my unswerving belief for the last fifteen years that cancer penetrates into the body by means of raw food. The frequency of cancerous growths on the face has become a thing of the past since the use of soap has become more general in the country districts. This hygiene of the face should be applied to our digestive tubes, as it is from them that all the evils come. Hereditary cancer is a myth. If cancer finds several victims in the same house and in the same family it is because their hygiene is equally bad.

"The only and sure way to protect oneself from cancer is to eat nothing raw. The precautions are elementary and do not cause great inconvenience. Take, for instance, the case of fruits, or to be more precise, bananas. Because bananas are protected by a thick skin many people imagine that the skin is free from microbes. Now it is a well known fact that in order to ripen bananas must be affected by air germs which reach the pulp of the fruit after traversing the peel protecting it. And that is the reason why, at my home, bananas are always scalded. I plunge them for a minute into boiling water and the fruit loses none of its exquisite flavor.

"All knives and forks and spoons used in my household are passed through the flames of a Bunsen burner, and I toast my bread to destroy the microbes which might have settled on the surface of the loaf. I have barred all raw vegetables from my meals. I never eat strawberries and I advise those who like them to plunge the berries for a minute or two into boiling water."

THE AUSTRALIAN RECIPROCITY

London Paper Hears Western Men Urging Speedy Adoption

LONDON, Oct. 25, (Special)—"Traveler" writes in the Standard that in Western Canada practical men are combining to urge upon the Government at Ottawa the desirability of hastening an era of reciprocal trade arrangements with Austria and other British dominions. "We are sure that they will receive an intelligent and sympathetic hearing by Canada's brilliant Minister of Trade," the Standard states.

SURVIVOR TELLS STORY OF SYDNEY WRECK.

SYDNEY, N. S., Oct. 23—Particulars of the shipwreck of last night were difficult to obtain this morning and it was with difficulty that news of any kind of the accident was obtained. After considerable search the only survivor, a man named Bennett, was located, and the reporter endeavored to get a straight account of the affair. Bennett refused to talk, but the scribe was able to worm a few facts from him. It appears, according to the story told by Bennett, that all hands were on deck at the time and the approach of the "abano" was noticed. The schooner endeavored to get out of the way but couldn't, the result being that the steamer crashed into her, striking her just ahead of the foremast. The schooner sank about three minutes after she had been struck, carrying down all her men. Bennett, upon coming to the surface, saw a piece of plank to which he clung, enabling him to keep afloat. For nearly half an hour he hung on to the plank, until finally picked up by the Douglas H. Thomas. Bennett feels keenly the loss of his captain and shipmates. Although up and around, he is in no condition to go over the events, and would much rather not talk about the accident at all.

WHEAT BARGE FOUNDERED IN LAKE ONTARIO.

KINGSTON, Oct. 23.—In this morning's storm the barge Ceylon, with wheat, from Port Colborne to Montreal, founded off Long Point, Lake Ontario. The crew were taken off by the tug Bartlett. The barge was owned by the Montreal Transportation Company. She shipped water and sank within an hour.

IMPORTANT TRIAL BEGUN IN GERMANY.

BERLIN, Oct. 23.—The trial of one of the directors and a former agent of the Krupp armament works, who are charged with bribing government officials to betray official secrets was begun to-day.

The proceedings to-day were uninteresting except for the disclosure by Maximilian Brandt, one of the accused, of his original instructions from the Krupp works to approach his former comrades in the German army and to entertain them at Krupp's expense in order to obtain, in advance, information as to contracts about to be given out by the German government.

MOTHER! IS CHILD'S STOMACH SOUR, SICK?

IF CROSS, FEVERISH, CONSTIPATED, GIVE CALIFORNIA SYRUP OF FIGS.

Don't scold your fretful, peevish child. See if tongue is coated; this is a sure sign little stomach, liver and bowels are clogged with sour waste.

When listless, pale, feverish, full of cold, breath bad, throat sore, doesn't eat, sleep or act naturally, has stomach-ache, indigestion, diarrhoea, give a teaspoonful of "California Syrup of Figs," and in a few hours all the foul waste, the sour bile and fermenting food passes out of the bowels and you have a well and playful child again. Children love this harmless "fruit laxative," and mothers can rest easy after giving it, because it never fails to make their little "insides" clean and sweet. "Keep it handy, Mother! A little given today saves a sick child tomorrow, but get the genuine. Ask your druggist for a 50-cent bottle of "California Syrup of Figs," which has directions for babies, children of all ages and for grown-ups plainly on the bottle. Remember there are counterfeits sold here, so always look and see that yours is made by the "California Fig Syrup Company." Hand back with contempt any other fig syrup.

Radway's Ready Relief

Mrs. L. Pittman, 710 E. 15th St., New York City, writes: "I can't say enough for a bottle of your Radway's Ready Relief with wonderful results. I have also used it like a charm for sore throat. I used it with great benefit for several ailments my children have had and recommend it to my friends."

NEURALGIA The Relief is the best counter irritant known, and therefore the best embrocation that can be used in Neuralgia. Rub it on the part affected, and keep it on for some time. It acts like a charm for sore throat. I used it with great benefit for several ailments my children have had and recommend it to my friends. RADWAY & CO., Montreal, Can.

"Beaver" Flour makes Cakes and Pastry with the lightness and delicacy of flavor of the choicest "Ontario Pastry Flour", and bread that is truly home-made in flavor with the large loaf derived from the strength of the Western Spring Wheat. It is the one flour that is equally good for bread and pastry—and best for both.

"Beaver" Flour is the original blended flour—the first and foremost in quality, strength and reliability. Be sure to specify "Beaver" Flour whenever you order.

Beaver Flour

C.F. Pooley, 6 1/2 Kent St., Halifax, N.S., Travelling Sales Agent
