COW TESTING ASSOCIATIONS DOUBLE THE INCOME PER COW.

Several instances are on record in Ontario and Quebec where members of cow testing associations, who are systematically weighing and sampling the milk from each individual cow in the herd, have been enabled to increase the yield of milk per cow tremendously. Mere weighing and sampling, of course, has not increased the yield, but it has been the most important factor in the general improvement; it has shown that lots of cows were not worth keeping, it has shown that others could profitably consume more feed, it has shown the owners that they must study each cow to make her do her best, it has shown them that most cows will respond readily to better care and attention and will earn more money if given the opportunity. It means good money in any farmer's pocket if he will have a little patience and act on the information gained from the records. One man is now getting from his twenty cows an income of four hundred and eighty dollars per year more than he was three years ago. A smaller herd in 1904 brought in only \$23.80 per cow, but last year the owner received \$58.00 per cow, in other words he is now getting more than double the previous income per cow. Ottawa, September 1909.

Our New "Modern" A. A. Waterman Fountain Pens

we believe are equal in mechanical construction, to the best pen made. In addition to this, they have the following undeniable advantages. 1 They are self-filling, filled in a twinkling. 2 As there is no joint they cannot leak and soil the fingers as many good pens do. 3 The act of filling also cleans the delicate ink channels and prevents clogging. We have the best \$1.00 pen on the market.
