The different committees gave satisfactory reports. The buying committee reported that they had put the pupils of the school to be put on a Christmas tree at the Christmas concert. It was also decided to have a grab bag at the next meeting. The programme committee then entertained with several entertaining numbers. The exchange of Christmas gifts among the members created great amusement as the gifts were hidden in different parts of the rooms creating much merriment. A committee of Mrs. J. C. Campbell, Mrs. Edwin Donald and Mrs. Duncan Sudbury were appointed to make out programmes for another year. The singing of the National Anthem brought this meeting to a close after which a bountiful and delicious lunch was served by the hostess assisted by Mrs. Marion Pickering, Miss Millie Cousins kindly invited the members to her home for the January meeting.

That Body of Ours

By James W. Barton, M.D.
TREATING OLD OR CHRONIC CASES OF ARTHRITIS — RHEUMATISM

The infected teeth and tonsils have been removed, the sinuses are in normal condition, the gall bladder has been drained, and yet the patient still suffers with rheumatic pains and stiffness of joints. Naturally he is discouraged and may believe that there is no hope for any relief or improvement.

As mentioned before, the fact that whatever was causing the rheumatism—teeth, tonsils—has been removed means only that no more poison can be manufactured by that particular part of the body, but some of that poison may still be in gall bladder, large intestine or elsewhere and some of it is carried by the blood to the already affected joints or soft tissues and so cause symptoms. Besides, the damage already done to the joint by the infection from the teeth and tonsils may be permanent, and even surgery or other treatment cannot give satisfactory results.

Dr. Bernard Wyatt, Tucson, Arizona, in Nebraska State Medical Journal states that the most important of all in the treatment of arthritis (rheumatism) is to explain the "long time" required for cure, otherwise the patient will become discouraged and stop treatment before the physician has had a far chance to carry it out.

Some of Dr. Wyatt's suggestions are:—

Removal of all infection present—teeth, tonsils, gall bladder. Constipation must be corrected by a bulky fruit and vegetable diet (Cov in starch—bread, sugar, potatoes), and the use of mild laxatives, enemas, and at the beginning of the treatment, colonic irrigations (high enemata).

Rest. It is harmful to keep on working a painful joint, but while in a warm bath, gentle exercise can be carried on without pain as the warm water acts as an anaesthetic and the wider open blood vessels carry away waste products manufactured by the exercise.

The patient should not be allowed to slump in any position he keeps; wrists and knees should be kept straight by splints and casts worn at night.

Heat in various forms, vaccines, blood transfusions, all have a place in the treatment. And last, but not

Health Insurance Scheme Favored
REGINA, Dec. 15 (CP)—In view of wide variations in the economic status of individuals and areas throughout Canada, a nationally subsidized scheme of health insurance is the most feasible way of providing the Canadian people with a adequate insurance itself. Dr. Uhrich said.

medical care at reasonable cost Hon. J. M. Uhrich, Saskatchewan minister of health, submitted today before the Rowell commission. Already in large sections of the province, a system of municipal doctors had been introduced in an attempt to spread the cost of such services over the community on a taxation basis, a form of health insurance itself. Dr. Uhrich said.
