Mother and Her Baby Are Relieved of Eczema

Mrs. Peter A. Palmer, Salt Burn, Sask., writes:

"Dr. Chase's Ointment has completely relieved me of eczema and piles. I also used this Ointment for my baby, who broke out in eczema. A few applications were all that was necessary in her case. Dr. Chase's Ointment has been worth a hundred dollars to me—before using it I had spent a great deal more than that in unsuccessful treatment from do-ctors. We have also used Dr. Chase's other medicines, the Nerve Food having restored my health after suffering from severe nerve trouble when a girl."

NOT A REFUSE DUMP.—The use of Brighton Shore as a dump for refuse was complained of last summer by the people in the vicinity and this year it appears more refuse is being dumped there. Near the Brighton approach to Victoria Park also some old tin cans and other stuff has recently been deposited. These public places are much frequented by visitors and it is regrettable that they should be made an eyesore.

IN MEMORIAM

In loving memory of our dear husband and father Mr. Joseph McRae, who died May 19, 1922.

Days of sadness still come o'er us. Secret tears do often flow. But memory keeps him ever near us. Though he died a year ago.

He suffered much, he murmured not. We watched him day by day. Until at last with broken hearts, We saw him fade away. Inserted by his wife and family.

In loving remembrance of Mrs. Alfred Roberts, who died May the 20th, 1922.

A precious one from us is gone. A voice we loved is stilled. A place made vacant in our hearts, Which never can be filled.

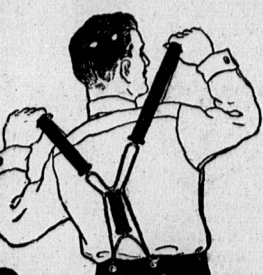

Oh times our thoughts do wander. To a grave not far away. Where they layed our darling Clara.

Just one year ago today. Inserted by her friends.

Billy Sunday Must Have Met Babe And Benny

American League

NEW YORK, May 21—Wonders will never cease in sportdom. Billy Sunday, lightweight champion, admits that dabbling in Wall Street wiped away a snug little fortune of better than a quarter of a million.

Leonard, however, says that he has replenished his bank roll until it is as fat as it ever was and that he is going to keep it in that condition.

"I am through with Wall Street I was cut out to be a boxer, not a stock broker. Those wise guys of Wall Street lefuted me out until they had me lighter financially than my ringside weight. No more dabbling in stocks for me, nothing worse than gold bonds for mine."

In four years Babe Ruth has been cut loose from at least a quarter of a million. Unlike Leonard, Ruth has seldom dabbled in stock. He has come in first that finished last. Incidentally, the bookmakers got some of Leonard's money.

"No more race horse staff for mine," says Babe, "I'm through. This is to notify all touts to withhold their information as to who will win but won't."

THE CONSTRUCTION OF THE HOTBED

(Experimental Farms Note.) Many of our most popular vegetable crops such as tomatoes, eggplant, peppers, celery, and of our best flowers, are of southern origin and require a longer growing season than this climate permits. By starting such plants in the hotbed from six to eight weeks earlier than it is safe to plant, out-doors and later transplanting to the open, the required growing season may be obtained. Furthermore, by the use of the hotbed such vegetables as radish, lettuce, cabbage and cauliflower may be started early and thus reach development much sooner than if the seed were sown in the open.

The only really satisfactory location for a hotbed is one with a southern exposure, protected from north and west winds and unshaded to admit a maximum amount of sunlight. It may be made either above or below ground as desired. The former requires more manure, the latter more labour to construct. If above ground, the bed should be situated where there is no danger of water standing at any time; if below, the situation should be naturally well drained, or drainage would have to be provided. With the latter type, the soil should be removed to a depth of about eighteen inches and the cavity should be at least two feet wide and longer than the frame to be used. This operation is best done during the previous autumn, as it is often quite practical to start a hotbed before the frost is out of the ground to a depth of 18 inches. With the above-ground type the site merely requires levelling, which may be done in the spring as well as at any time.

The frame may be made of inch and a half or two inch lumber. The most convenient size is six feet wide and of the required length to use one or more sash three feet wide. It should be fast from ten to twelve inches high at the front and, if six feet wide, sixteen to eighteen at the back. This slope allows rain water to run off easily and, as the hotbed should face south, a greater degree of sunlight is obtained than if the top were level. The sash must fit snugly and the frames be so constructed that they can be raised or lowered as ventilation is needed.
