NEGLECTED. The potatoes and other vegetables in a few of the school plots in Victoria Park have not been harvested, probably through the Etness of their owners or through some other cause. As the season is growing late it is suggested that if these are not harvested at once they be handed over either to the hospital or to some of the city's poor. No waste of foodstuff should be permitted and it is hoped this will be looked after at once.

PATHETIC CASE.—Mr. and Mrs. William Slingby, left Thursday for their home in Brantford, Ont. Mr. Slingby was engaged in work at the Soldiers Convalescent Home and during his stay here his little girl died. The embalming of the body of this child which was performed some weeks ago shows the progress that has been made in this line in recent years, the body and features of the little one maintaining as fresh and natural an appearance as in actual life.

Heat Your Curling Irons Instantly

—on train, on boat, in hotels, in camp, on motor trips, or at home, you can heat your "curlers" instantly, and without soot to soil your hair or your clothing.

—used in the Theroz Patented Burner (specially designed to hold curling irons, sad irons and cooking utensils), give you the quickest, safest, cleanest, most convenient and most economical heat ever discovered.

Theroz is made by an absolutely new and patented process, which converts a liquid into a solid cube (not a paste). The cube itself does not burn, but throws off a vapor which unites with the oxygen of the air in right proportions to make the hottest flame known to science.

SAFEST.—Theroz can't explode. It can't spill and set fire to anything. A burning cube dropped on the carpet can be smothered without burning the carpet.

CONVENIENT.—You can tuck a can of Theroz Fuel Cubes and a Theroz Burner in a corner of your bag and have it available anywhere.

ECONOMICAL.—Because it costs but two cents a cube and you burn only enough to heat what you want heated. If it doesn't require a whole cube blow it out and put it back in the can for future use.

CLEAN.—Because there is no soot. No smoke, no ash, no odor. No messy wicks. Nothing to get out of order.

June Air in January

Most any furnace will produce a dry heat—the kind used to dry lumber in a kiln. But that kind of heat will ruin the health of your family and destroy your furniture.

What month is the balmiest, healthiest, sweetest, most delightful of all the year? June, of course.

The Sunshine Furnace has been designed, developed and perfected to give to your home in January the same quality of air that you breathe out of doors in June.

The Sunshine Furnace by warming fresh air and charging it with the necessary exact degree of moisture, not only warms but ventilates your home with pure, soft, healthful air every moment of the day.

Above the fuel door of the Sunshine Furnace is a water pan designed with scientific exactness to vaporize into the warm air the precise quantity of moisture necessary to the health and comfort of your family.

In the Sunshine heated home there are no dry, hacking throats, no burning or wrinkling skins, no dust or gas—only pure, humid, balmy, healthful warm air.

Engineering Service Free. McClary's own heating engineers are at your service when you buy a Sunshine Furnace, to give you free expert advice on your home-heating requirements. Write to the nearest McClary Branch and ask for particulars about this service. A booklet, "Comfort in the Home," makes clear all the things you want to know about furnaces, and it is sent free on request.
