

Danger in Every Cough

Never neglect a cough no matter how slight it may be. Cough indicates that there is inflammation in a dangerous place. Don't let it stay and develop. You are not safe until it is gone. Take JAMIESON'S White Pine and Tar just as soon as you begin to cough. A few doses will do you then. It cures old and severe coughs too, but it takes longer. Price 25 cents

GERMAN YACHTS CONDEMNED AS PRIZES OF WAR

LONDON, Oct. 28.—The racing yacht Germania, which on two occasions won Emperor William's Cup at Cowes, was condemned in prize court today as a prize of war. The Germania which was captured at Cowes at the outbreak of the war, was the property of Lieutenant Dr. Gustave von Bohlenund Halbach, head of the Krupp works.

Three other German yachts captured at Cowes—the Lasca II, Stella Maria and paula III.—also were condemned.

Poultry Notice

Beginning October 1st, I will buy Fowl and Chickens dressed and undrawn. All shipments promptly attended to. J. D. JENKINS Charlottetown

ANTI-GERMAN UNION TO HELP ENGLAND

The Anti-German Union, having for its slogan "No German labor, no German goods, no German influence, Britain for the British," has been formed in London, with offices at 346 Strand. The president is the Earl of Euston and the list of vice-presidents includes the names of many well-known titled personages. The union has been formed to unite British-born men and women without respect to party, class or creed, with the following aims and objects:

- 1. To foster national ideals and to keep alive the patriotic spirit of the people. 2. To defend British freedom, rights, and privileges against German aggression. 3. To defend British industry and British labor against German competition. 4. To fight against German influence in our social, financial, industrial and political life.

German Influences

"It is German and not Austrian or Turkish influence that has poisoned the national life and is hampering the efforts of our gallant sailors and soldiers; because their blood and our tears will have flowed in vain unless we now unite all parties, classes and creeds against the enemy within our gates; after peace is signed it will be too late."

"The Germans still hold positions of trust in Government departments, in Parliament and on the Privy Council; Germans, instead of Britons, are executing many Government contracts. Thousands of enemy aliens are still at large even in prohibited areas; cotton for explosives still reaches the enemy and is not even yet declared contraband; Germans still dominate our financial and business houses; Germans trade under English names. Mysterious fires and explosions still occur in our dockyards, manufacturing and warlike establishments."

"A united nation would not tolerate the disloyal 'Stop the War' campaign of the Independent Labor Party and the Union of Democratic Control. Neither strikes nor exorbitant war profits would be allowed, nor should we hear the disgraceful cry 'Let the Germans come, we shall be as well off as ever.' A resolute and united nation would not contemplate with resigned apathy the return of enemy labor and goods after the war."

The Union's Policy

"The union proposes by issuing publications, by holding meetings, by the personal efforts of members and through the public press to strengthen the hands of the Government to cope with these evils and to urge upon it the adoption of the following policy:

- (1) To expound the folly of granting peace on terms so easy as to make it possible for the German again to disturb the peace of Europe. (2) To advocate that Germans and their property throughout the Empire should be seized and held as security for the humane and reasonable treatment of British prisoners in Germany, as Magna Charta enjoins and the rules of International Law permit.

"(3) To enforce strictly existing laws and Orders-in-Council for the registration of aliens, where necessary making them more stringent; and to prohibit Germans from changing their names for trade or other purposes. (4) So to amend the naturalization laws as to exclude persons of German birth from membership of the Privy Council and of either House of Parliament from holding public offices, and from the enjoyment of civic or other honors or titles, and to enact that British Consuls in future be British subjects. (5) To seek out and expose all German and pro-German plots and conspiracies against British interests."

"Commercial and Industrial. (1) To discourage and if possible, prevent the employment of German labor in this country, either by a tax or employers of German labor or by other suitable measures. (2) To encourage the sale of British-made goods, and for this purpose to form a register of traders who are members of the union who will undertake not to buy or sell German-made goods, or to employ German labor if British goods or allied labor are available, and who will display outside their premises the badge of the Anti-German Union. (3) To enforce the acts restricting alien immigration."

MANY AMERICANS FIGHTING WITH THE CANADIANS

OTTAWA, Oct. 28.—Judging from the steadily increasing number of communications which the minister of militia is receiving from the United States offering assistance either in money or personal service at the front the sympathy of the Americans for the cause of the Allies is finding a stronger practical outlet. In the ranks of the Canadians at the front there are now said to be several thousand men who came from the United States to fight. Some of them are former Canadians, but many of them are native citizens of the United States.

As an instance it may be noted that in the recent list of casualties among the "Canadians" there appeared the name of an American officer who was in charge of one of the companies which fought at Vera Cruz and fought in the Mexican Revolution. He was in the regular American army but got leave of absence and enlisted in Canada to fight against the Huns, although the American government, of course, was not cognizant of the fact. Hundreds of Americans are now coming across the line and joining the recruits in Canada.

The steady stream recently sent out that there would be a United States regiment enlisted in Canada is, for international reasons, a little wide of the mark, but as the minister of militia put it today: "We can't stop Americans coming over here and calling themselves Canadians, and saying they want to enlist with our forces."

CAREER OF EDISON READS LIKE NOVEL

This is the week of celebration of the unrivalled achievements in invention of Thomas A. Edison, who long ago won the title "The Wizard," and who, not content with resting upon his well-earned laurels, continues to produce new and revolutionary inventions which keep the world wondering as to what this marvellous man will accomplish next. The only safe prediction which can be made is that he will keep on wrestling from Nature some of her most closely-guarded secrets, enabling him to produce machines, appliances and chemicals which will add to the sum of humanity's comfort, convenience, pleasure and happiness, and lend a new stimulus to many varied industries.

There is especial interest for Canadians in the early career of Edison, for, although a native of Milan, Ohio, where he was born on February 11th, 1847, he stated his life career in the humble position of "news butcher" on the Canadian railway, the Grand Trunk, while his first position as a telegraph operator was at Stratford, Ont. Among the many life stories of great men who have risen to position and power from the most unpromising beginnings, by the exercise of their own gifts and energies and the seizing of opportunities, none is more romantic than that of Edison and it is curious to notice the interlinking of circumstances which started the young news agent on his remarkable career.

LABORATORY IN CELLAR.

At the age of ten, Edison had already given indications of the bent of his genius, as in 1857 he started a chemical laboratory in the cellar of his parents home, at Port Huron, Mich., so that it is likely that he would have sooner or later have followed the same course as was actually the case, but when at the age of twelve he started his work selling papers and candies on the G. T. R., between Port Huron and Detroit, he was brought into touch with the life of the railroad, which in turn served to introduce him to the profession of telegraphy, thus initiating him into the world of electricity, that mysterious fluid which has played so large a part in his almost numberless inventions. While running on the train, he installed in the baggage car a small printing plant, on which he set up and printed a little news sheet of his own. The Weekly Herald, this being the first newspaper ever printed on a train.

His entry into telegraphy was due directly to one of these incidents which is a favorite device of novelists. At the age of fifteen he saved from death under the wheels of his train the young son of J. U. Mackenzie, G. T. R. station agent at Mount Clemens, near Detroit, and the grateful father offered to teach the young news agent the principles of telegraphy, thus unwittingly doing Edison a greater service than any monetary reward could have been. As soon as Edison mastered the key, young Edison erected a telegraph line of his own from the Port Huron station to the village, and practiced on this in the local office.

ALWAYS EXPERIMENTING.

At the age of 16 he was installed by the Grand Trunk as operator at Stratford station, and for the ensuing five years he worked there and in various cities in the Middle West, all the time studying electricity and making experiments for the improvement of the telegraphic appliances. His perseverance brought its reward, for in 1868 he secured his first patent, and shortly afterwards he went into business as a manufacturer. From that time onward his biography is an inspiring record of achievement over apparently insuperable obstacles. Edison's patented inventions number over 900, and it would take three or four columns of newspapers space to enumerate them all. Among the most important are machines for quadruplex and sextuplex telegraphic transmission, the carbon telephone transmitter, the microtometer for detection of small changes in temperature, the megaphone, the electric car, the phonograph, the incandescent lamp and light system, the kinesiograph, kinetograph, and kinetophone, the three latter being the basis of the huge moving picture industry, which has made thousands of millions of dollars and amusement to millions. An evidence of Mr. Edison's indomitable spirit is found in the fact that ten months after a portion of his plant was destroyed in the greatest fire in the history of New Jersey, he has rebuilt a group of gigantic factories that are capable of 100 per cent. increased production in Diamond Disc phonographs and records.

Today, at the age of 68, he is successfully devoting his unique genius to the task of supplying the world with some of the chemical substances (thermo practical monopolies with Germany and Austria, the supplies of which have been cut off by the war.

IS AN IDEAL FOOD FOR CHILDREN. It aids the digestion of other food.

APPALLING WORK OF ITALIAN ARTILLERY

UDINE, Italy, via Paris, Oct. 23.—News of the great Italian offensive along the Isonzo front is being brought down by the wounded, and the men of the convoys, which are escorting Austrian prisoners, have passed through Udine, which gives some idea of the magnitude of the operations. The fall of Gorizia and of Riva is believed imminent.

All the soldiers agree that the artillery preparations preceding the offensive, lasting three days, was appalling. "If it was an inferno for us," said a wounded gunner, "how much worse was it for those yonder, where the shells burst!"

The Italian soldiers assert, with pride, that they are now reaping the benefit of a systematic destruction of the Austrian observatory points on the mountain peaks, mastered after fierce struggles during the past months and the lack of which, they say, has greatly decreased the accuracy of the aim of the Austrians. The men say that six months of warfare has enabled them to understand the tricks of their opponents.

Austrians Caught by Latin Ruse

When the Italian artillery prepared the way for an infantry attack on the entrenchments, the soldiers declare, the Austrians would retire. When the artillery ceased firing, with the purpose of allowing infantry to cover the ground between the opposing position the Austrians would re-occupy their entrenchments with double force. When finally the Italians discovered the tactics they adopted a ruse to catch the Austrians.

After the artillery had ceased firing, the Italians, according to the soldiers, permitted an interval of time to elapse, sufficient for the Austrians to return to their trenches. Then they re-opened fire with their artillery, and later charged, and when the infantry reached the trenches they were literally filled with the bodies of dead Austrians.

TRIED BOTH

The Widow—If you married again I suppose you would want a woman of intellect? The Widower—Yes, but just about medium. The Widow—Medium? The Widower—Yes. My first wife was a strong-minded woman and my second was a weak-minded woman, and one's about as bad as t'other.

IMPORTANT

Relatives of soldiers returning from the front are asked to communicate with the Secretary of the Patriotic Society at Charlottetown, Captain T. Edgar McNutt, intimating the date of expected arrival, cause of return and any other particulars in order that preparation may be made for a fitting reception.

GUARDIAN CLASSIFIED ADS.

One cent per word first insertion in this column, half cent per word each continuation. Cash must accompany order. Minimum charge Twenty-five cents.

MARRIAGES

DUMONT-TOOMBS.—At St. James Manse, Brighton, October the 30th, by Rev. Dr. Fullerton, Blanche Della, eldest daughter of George H. Toombs, of this city, to Albert Emile Dumont, of Montreal.

DEATHS

MUGFORD.—At Pleasant Valley, Lot 21, Oct. 29, 1915, J. John H. Mugford, aged 54 years.

WITHIN THE LAW.

"Within The Law" to be played by the Klark-Urban Company at The Prince Edward Theatre on Monday, November 8th, is the most successful play New York has seen in years. Two solid years at the Elting Theatre is its record. Its big success have the "punch" in them and the comedy relief is really comic, and, yes, even those old conventions of the stage are used again—vice is published and virtue is rewarded—but in a new way. 3717. 3700-10-30M61.
