

ELECTRIC "BULBS" MAY LOOK ALIKE BUT

Only MAZDA LAMPS Can Give You the Best Results

"I WANT SOME BULBS." How often this request is made; yet to purchase electric lamps without specifying the make is like buying the proverbial pig in a poke.

For instance, two lamps may look exactly alike, yet one may have a fine film of moisture on the inside, while the other is perfectly dry. The first lamp will have a much shorter life than the dry lamp.

Two gas-filled lamps may look identical, yet one may contain a rare and costly gas known as argon, while the other will be filled with the cheaper, and much less efficient, nitrogen.

By always specifying Edison Mazda Lamps, you are assured of receiving the latest scientific development in incandescent lighting.

Near you is an Edison Mazda Lamp store, recognizable by the yellow and blue cartons. There you will obtain real information about good lighting.
