TURF BILL DEFEATED.

ALBANY, July 21—The Gittins bill to relieve directors of racing associations from liability from gambling carried on on race tracks was defeated in the assembly last night 63 to 53. The measure passed the senate yesterday and its enactment probably would have meant the revival of horse racing in New York state. A motion to reconsider the vote by which the bill was defeated, was made and laid on the table.

DETECTIVE BURNS ON DAVID RUSSELL CASE.

MONTREAL, July 24.—Before Judge Montreal, Detective Burns had something to say about the David Russell case. He said it would be shown that the manager of a local Detective Agency had devised one of the most audacious plots of modern times. A plot which had for its purpose the incarceration of David Russell in an insane asylum. Burns stated that the evidence would involve a leading physician of Montreal, who without seeing Russell prescribed a sleeping potion for him without Russell's knowledge. He also mentioned a letter to an agent of the New York Detective Agency, in which he stated that Russell's mental condition when he had not seen Mr. Russell for months.

WRECK STRIPPED STREETS.

CARLETON, Wales, July 21—Five hundred Lancashire Fusiliers arrived here today and occupy the buildings in the dock district. There was rioting by the shipping strikers throughout the night. The streets were strewn with wreckage and the hospitals are filled with the victims of mob violence.

Efforts are being made to open negotiations between the shipping men and the strikers, in the hope of reaching a settlement.

RETURNS PER COW MILK AND BUTTER FAT.

OTTAWA, July 19—Out of 2,400 cows tested last month in Ontario for members of cow testing associations, 895 of them, or over one third of the total number recorded, gave yields of over 1000 pounds of milk and 33 pounds of butter fat. Many cows gave over 40 pounds of fat. In sharp contrast are some low average yields, from all cows included in three or four associations, of less than 25 pounds of fat. With butter fat valued, only at 20 cents per pound, this means that good cows are earning \$3 per month more than poor cows. If this average is multiplied by a milking period of ten months, it follows that there is actually a difference in the income from two such cows of as much as \$30 in the season.

These astonishing differences are only brought to light and to the apprehension of owners when they begin to record weights of milk and to take samples for testing. If cows are viewed from a right perspective (a the palace. After the death of the

WIPE WOUNDS.

My mare, a very valuable one, was badly bruised and cut by being caught in a wire fence. Some of the wounds would not heal, although I tried many different medicines. Dr. Bell advised me to use MINARD'S LINIMENT, diluted at first, then stronger as the sores began to look better, until after three weeks, the sores have healed, and best of all, the hair is growing well, and is NOT WHITE as is most always the case in horse wounds.
