Ladies' Rain Coats

The waterproofing of cloth fabrics by the "cravenette" process has doubled the usefulness of the ladies raincoat.

A few years ago raincoats were for rainyday use only—a glance proclaimed their identity and during fine weather they were simply useless, besides being non-porous they were stuffy and unhealthy.

In comparison the "Cravenette" of today is a wonderful improvement. The process of making the cloth waterproof does not change the appearance of the fabrics in the slightest and the garments are equally appropriate for sunshine or rain.

Our raincoats are justly considered to be Canada's finest make. The styles are up-to-date, embracing every length, shape, fabric and desirable color.

Three-quarter, seven-eighth and full length are all popular. Loose, Raglan styles are shown together with many belted and strapped effects. Colors include Fawns, Greys, Greens and mixed tweeds. Prices range from 5 75 to 13.75.

SPECIAL MAIL ORDER OFFER

As a special inducement to our mail order customers we offer this special bargain. Stylish 7-8 or full length raincoats of cravenette cloths, herringbone effect in medium grey shade has box pleats back, fancy cuff and is a high-class garment throughout, guaranteed to give satisfaction or your money back. Bust size 34. 42. Regular 10.25, prepaid to any address for 8.75.

The neighbors around there have lost horses before in a similar manner during a lightning storm.

There has been abundant evidence on the streets during the past few days to denote that a good deal of liquor is in circulation. THE BALANCE SHEET.

MONTREAL, July 18.—Not as an answer to its critics, or with the hope of satisfying the constant persistent demand for lower rates, but just as a matter of news, the interesting fact has been given out that the Grand Trunk has, within the past few years expended $15,000,000, in double tracking the main line from Montreal to Chicago, that they have now over a thousand miles of double line—the longest continuous double track under one management in the world.

At the same time they have been laying down 80 pound steel where in former days there was 65 and 72 pound rails. And now, having set a new and heavier standard, they are replacing the 80 pound steel with new rails weighing 100 pounds to the yard. In other ways they are bringing the system up to a standard which will make it, in all respects, a first-class, railway. Every new bridge put in is made to carry the heaviest load.

All this money, or the most of it, finds its way back to the pockets of the people, for the work is done largely in Canada, and the materials entering into the work, are largely the products of Canadian mills and Canadian hands.

and all over the vast system, from Niagara on the south, North Bay at the north—from Portland to Chicago, they are building new shops, round houses, stations and other buildings. In the double track alone the company have provided additional safety that no mere block system could secure. No doubt as business justifies other lines will be doubled tracked especially the lines leading down from the Great Lakes, the outlet for the wheat of the Northwest.

The small sum of 50 cents will take you to Murray River and return, where you will enjoy a glorious day's outing in the bargain. Children 25 cents. 7-21d1i.

"Big Value—"The Two Macs" are selling for twenty-five cents their own make of Effervescent Aperient Salts equal in quantity and quality to the imported at sixty cents. During the summer season it is unequalled for cooling and invigorating the system besides being a pleasant drink, quenching the thirst.
