ANNUAL MEETING NATIONAL COUNCIL OF WOMEN

HALIFAX, N. S., June 9.—Resolutions urging that it be made illegal for a husband to invest his earnings in mining or other stock or in speculations without his wife's full knowledge and consent, that it be made illegal for a husband to attach his name to a bond for security without the wife's full knowledge and consent, that adultery be recognized as a crime, that capital punishment be abolished, that international disputes be settled by arbitration and that endeavor be made to cultivate more friendly relations with the United States, will be discussed at the thirtieth annual meeting of the National Council of Women of Canada which meets at Halifax June twenty to twenty-seven.

The resolution concerning stocks, speculations and bonds, states that "marriage is or should be a partnership in which a wife should share her husband's earnings in the home," and will be moved on behalf of the Women's Council of Welland, Ontario; that concerning adultery, on behalf of the Toronto local council; those concerning capital punishment, International disputes and relations with the United States, on behalf of the Ontario Woman Citizen Association, the council of Portage la Prairie, and the Provincial Council of New Brunswick, respectively.

Other resolutions to be discussed ask that in vital statistics, including census returns, persons born in Canada of native born or naturalized Canadian parents be recorded as Canadians. (To be moved on behalf of the Kitchener and Waterloo local council); that "Whereas during the late autumn weeks of navigation on the Great Lakes, great danger is endured by sailors and intense anxiety experienced by their families," the Federal Government be urged to request to set by statute a definite date for the close of navigation, "say November 30," to apply to all kinds and sizes of vessels, (Owen Sound local council); that the Federal Government be asked for more careful supervision of dance halls, theatres and other places of amusement, and that women be placed on Boards of Censorship of motion pictures wherever possible, (Ottawa local council); that "realizing that the Dairywomen's Association is using every means to induce the Government to forbid the continuance of the manufacture and sale of oleomargarine," the National Council of Women ask the local councils to bring pressure to bear on their members of parliament, "That this nourishing article of diet" be not banned from manufacture, sale, or use, in Canada. (Ottawa local council).

Several resolutions relating to the League of Nations and International peace will be introduced on behalf of the Brandon Council. These would urge the Dominion Government to consider the sending of Canadian Women as delegates to the League of Nations, would request the publication more fully and widely of available information concerning the activities of the League of Nations; and would ask the Dominion Government to consider fixing a day for the celebration of International Peace, preferably November eleven.

Resolutions concerning internal organization of which notices have been given include one by Miss Dayfoot, Georgetown, that hereafter the President of the National Council should be from the east, centre, and west of Canada alternately. Another, by Mrs. E. M. Murray, Halifax, would limit the term of office of National President and Vice Presidents to one year, so as to allow a more widespread representation for these offices. The Toronto council will offer an amendment to limit the term of these offices to two years. A motion by Mrs. W. G. Kerby, Calgary, would provide "that the retiring President shall become a member of the executive committee by right of service, with vote when present and shall carry the title of Past President; this action to be retroactive." The Montreal council will move that "in view of the changes that have taken place during the last few years the future policy and executive machinery of the National Council of Women be discussed."

A resolution to be moved on behalf of the Toronto Council reads: "Whereas the great distress occasioned in Ontario through the restriction of coal shipments from the United States has again demonstrated the dangers attending its economic dependence for fuel on that country, and "Whereas ample supplies of coal of good quality for heating purposes can be found in Nova Scotia and Alberta and could be made available in Ontario by an efficient and cheap system of rail and water transportation; and "Whereas it is for the general benefit and advantage of the whole Dominion that its national resources should be developed as rapidly as possible and to the greatest possible extent.

"Be it resolved that the National Council of Women urge the Federal Government to investigate thoroughly the whole situation and ascertain whether means can be devised to supply Ontario with coal for heating purposes from the Nova Scotia and Alberta fields, thus materially reducing the volume of imports from the United States into Canada."

The Toronto council after several resolutions relating to social subjects. They read: "Whereas the home the family, and the sanctity of the marriage relationship are fundamental factors in true nationhood and anything which tends to destroy these in undermining the whole fabric of society, and "Whereas it is a well known fact that adultery is destroying homes and causing untold misery and "Whereas adultery is not at the present time a crime in the eyes of the law. "Therefore at the present time it is not possible to imprison those 'found in' a house of prostitution without giving them an option of a fine.

Therefore be it resolved that the National Council of Women do petition the Federal Government to amend the Criminal Code by adding the words "or both" to Section 229.

"Whereas the unlicensed, unsupervised boarding and rooming house constitutes a grave moral danger to our social life. "Therefore be it resolved that the National Council of Women do urge upon local councils the necessity of studying the problem in their own locality, if possible making a survey of the situation, with a view to working out a plan of remedying existing conditions."

There will be moved on behalf of the Medical Alumnae of Toronto University the following: "Whereas the Dower Act does not adequately protect the rights of the wife with regard to real property in the possession of her husband. "Therefore be it resolved that Provincial Governments be requested to establish by legislation the principle of 'community of interest' between husband and wife with regard to all real property acquired by them as a result of their common labor and effort and that this be recognized during cohabitation, in separate and in the joint name of either. The husband shall have the management of community property but shall be restricted as to selling or mortgaging real estate or leasing same for more than one year without the concurrence of his wife."

The Calgary council will have the following moved: "Be it resolved that the whole question of marital relations be discussed by the National Council of Women and that the National Council ask that a commission be appointed to thoroughly examine all laws relating to marital relations in Canada."

The resolution of the Provincial Council of New Brunswick concerning relations with the United States reads: "Be it resolved that the National Council of Women recommend to the local councils that they take a more active interest in the aims and objects of such bodies as the Sulgrave Institute, and further, that they endeavor to cultivate more friendly relations with United States councils—looking towards that much desired objective, a league of the two great English speaking countries, Great Britain and the United States."

The program of the meeting includes the following: President's address—Miss C. E. Carmichael. Tribute to the memory of Lady Taylor—Mrs. W. E. Sanford, Hamilton.

"The Betterment of our English Speech"—Miss Archibald, Acadia Seminary, Wolfville, N. S. Address on Art—Miss Elizabeth Nutt, Principal Victoria School of Art and Design, Halifax. Address by Brigadier General W. S. Hughes, Superintendent of Penitentiaries, Canada. Address on the League of Nations—Professor H. F. Munroe, Dalhousie University, Halifax. Address on Mothers' Allowances—Mrs. Adam Shortt, Vice Chairman of the Ontario Commission. Committee reports will include the following: Education, Mrs. C. A. Walsh, New Westminster; Citizenship, Mrs. W. H. Becker, Toronto; Housing, Mrs. A. E. Cole, Port Arthur; Fine and Applied Arts, Mrs. Dignam, Toronto; National Recreation, Mrs. Forbes Reid, Edmonton; Household Economics, Mrs. J. C. MacIver, Toronto; Films and Printed Matter, Mrs. T. N. Andrews, Port Arthur; League of Nations, Mrs. S. E. Clement, Brandon; League of Nations Society in Canada, Mrs. C. H. Thorburn, Ottawa; Equal Moral Standard, Dr. M. Patterson, Toronto; Public Health, Mrs. Ninian Smillie, Ottawa; Mental Hygiene, Mrs. S. Stead, Halifax; Immigration and Colonization, Mr. C. E. Whitton, Ottawa; Conservation, Mrs. Gordon Hewitt, Canning; Soldiers Dependents and Pensions, Mrs. Muldrew, Ottawa; Taxation, Mrs. E. M. Murray, Halifax.

Other reports to be presented include: National Conference of Education and Citizenship, Mrs. Harry

THUNDERSTORM MADE TO ORDER IN LABORATORY
 PITTSFIELD, Mass., June 8.—From manufactured clouds over a miniature village artificial lightning of 2,000,000 volts was produced today in the high voltage engineering laboratory of the General Electric Company's plan here. In September, 1921, a demonstration of the workings of 1,000,000 volts was given, but today's feat was said to surpass any previous accomplishment in high voltage.

Lightning flashed from the make-believe clouds, striking the village church steeple, the country store, and occasionally both at once. The sound of the thunder was realistic. In some tests even rain was produced. The Pittsfield laboratory said to be the most powerful in the world has pioneered in the development of power transmission since the construction of the first 15,000 volt lines was supervised here in 1891.

Transformers were used to "step up" a current of about 2,000 volts 1,000 times. In the million volt transformer more than 100 miles of wire was used.

The laboratory in which today's tests were conducted is a large brick building lined with steel to prevent any disturbances from reaching outside and causing possible damage to the factories.

In these tests it was determined, according to the experimenters, that a tubular transmission cable six and one-half inches in diameter would be of sufficient size to retain this enormous current, and that transmission towers 160 feet high, with wires 30 feet apart, would be necessary to carry the current.

Despite the fact that lightning travels at the velocity of light, 186,000 miles per second, engineers at the Pittsfield plant have been able to measure the shape of the flash and determine its pressure. It was to reach a better understanding of these problems that the miniature village and artificial lightning were designed.

DOMINION TO GET 500,000 AUSTRIANS, NEWSPAPER SAYS
 LONDON, June 8.—The Daily Express gives prominence to a statement that Canada "may fill her vacant lands with Austrians, although this plan of dumping half a million

allens into the Dominion has not reached its final stage owing to financial difficulties." The Canadian authorities in London do not appear at all perturbed at the prospect, the Express says, and it adds that the emigration department in London in the last few days has been in correspondence with Sohr, a former Austrian consul who is responsible for the scheme.

Sohr has been in negotiation for some time with the Canadian Pacific Railway Company since the restrictions on former enemy emigrants have been removed, the newspaper continues, and he intends to go to Canada to prosecute his scheme with the authorities there.

The emigration department in London informs the Canadian Press that too much importance should not be attached to the article in the Express. Any emigrants that Sohr may offer will be dealt with individually under the ordinary regulations, the department says, but the Dominion certainly will not accept more than she requires.

OTTAWA, June 8.—The Immigration Department has received no notification of any intention to bring 500,000 Austrians to Canada. It is pointed out that each of the immigrants would have to satisfy the department's officers in Europe of his ability to meet the restrictions imposed before he could be admitted to the Dominion.

Piccadilly Secret
 LONDON, June 8.—Secrecy surrounding the reconstruction of Piccadilly circus is as great as that which preceded the coming of the tank. It is London's prize "hush-hush" scheme.

The most important fact is that a committee of the Westminster City Council met in private and considered a scheme which, it is understood, will be put before the council meeting on Thursday next week. The proposals will then be made public.

One plan is the network of underground passages suggested by the underground in connection with the Tube railways. Electric House is silent on this proposal at present, as it has to be considered by Parliament and the Westminster City Council in relation to the completed reconstruction. No information is available, either regarding Harrods plans for the rebuilding of the Swan and Edgar corner.

Will the picturesque fountain and statue of Eros be removed? It has been stated that it will be transferred to Leicester Square, but the chances are that it will remain in the circus, and that the roadway to the west will be widened by throwing back the front of Swan and Edgar's building.

It is understood that the bank building on the north side will be modified so as to reveal to the circus the main entrance to the Regent Palace Hotel.

Concentrated Nourishment

Grape-Nuts supplies iron and phosphates from the natural grain; its splendid well-rounded nutriment and easy digestibility are wonderful builders of health and energy.

And highly concentrated! The scientific process by which Grape-Nuts is made, enhances the value of wheat and malted barley as food. Ready to serve right from the package. Order from your grocer to-day.

THE BODY-BUILDER
 MADE IN CANADA

Bad Breath

Is Usually Due to Constipation

When you are constipated, not enough of Nature's lubricating liquid is produced in the bowel to keep the food waste soft and moving. Doctors prescribe Nujol because it acts like this natural lubricant and thus secures regular bowel movements by Nature's own method—lubrication.

Nujol is a lubricant—not a medicine or laxative—so cannot gripe. Try it today.

Nujol

A LUBRICANT—NOT A LAXATIVE
