**FAITHFUL SERVICE RECOGNIZED.**—On behalf of the residents along the mail route from Southport to Keppoch, Mr. J. P. Corrish called the other day on the mail courier, Mr. Matthew Aylward and presented him with a well filled purse in recognition of his faithful service. During the past seven years Mr. Aylward has carried the mail in all kinds of weather, summer and winter, and over all kinds of roads without missing a day. While the cost of living has steadily advanced and other public and private officials have had their wages increased, Mr. Aylward carried out his contract on the old wage schedule. To compensate for this, those whom he served so faithfully, paid him the complement of giving him part at least of what the department should have given him. With one accord they all wish to see him retain the position when a new contract is entered into, and at a rate of pay commensurate with the increased cost of everything that enters into the carrying out of the contract.

**RINGWOOD WOMEN'S INSTITUTE.**—This institute met at the home of Mrs. Ernest Currie, Rocky Point, July 29th, with six members present. After the regular business was transacted and some discussion by the members it was voted that the school room be thoroughly cleaned and renovated before school re-opens, with proceeds which were made at ice-cream festival amounting to \$32. The ladies spent the remainder of the afternoon in sewing and fancy work. The hostess served a very dainty luncheon. The meeting closed as usual to meet again at the home of Mrs. M. White, August 26th.

**BIG SHIPMENT OF FOX WIRE.**—One of the largest shipments of fox wire that has ever crossed the Atlantic arrived in Halifax on Thursday last by steamer from England. This shipment is consigned to the Rogers Hardware Co. Ltd. of Charlottetown P. E. I. and is composed entirely of the celebrated B. P. Brand English Fox Wire Netting, made by Rylands Ltd. of Wolverhampton, England. Advance information regarding this wire is that it is of the most exceptional quality, turned out of the very best material by skilled English workmen on perfect looms, coated and galvanized with the finest English zinc spelter. Mr. Geo. J. Rogers placed the order for this wire in January 1920 but owing to the enormous demand for wire materials of all descriptions it has only just arrived. 2017.

**SHOWERS.**—At the home of Mrs. Cameron McGregor, Graham's Road on Monday evening, July 19th, a miscellaneous shower was given by the young people of that district to Miss Gladys Brown, who was soon to become a bride. The gifts showered were handsome and useful and to show the good taste and judgment of the youths of that part. The company was royally entertained by Miss Ruth McGregor presiding at the piano. Games and social chat and the unpacking of gifts were much enjoyed as the verses that accompanied each one was not short of Bobby Burns wit. Ice cream and cake was served, after which the bride to be was bouced while others sang "She's a Jolly Good Girl" and each and all went home only delighted to know that another of the same was to take place the following week in their district.

There is power in silence. It gives such an impression of reserve strength, of business, of character, of weakness, or thoughtlessness, argues or strikes back, too impatient to let the course of events settle the right or wrong of a statement or course of action. The woman who chatters, who passes opinion upon all things from the course of a President to the proper feeding of the baby at the next house, who expresses comments on the neighbors' household furnishings and the style of their clothes, who is ready with small gossip and scandals, is the woman who will never carry much weight with others and who is apt to be generally shunned after her near-neighborhoods are found out. Many a friendship that might have enriched life is spoiled by just this settle other's lives. But the woman who is really busy, who is trying to enrich his own life and make the very most of it that she can, who is trying to inform herself on the many pressing questions of the day in which she must take an interest, if it would not be a "calico wife," is the woman who has no time for idle conversation or the discussion of the affairs of the neighborhood, or as from a better knowledge she can offer help of some kind. If more hours are lost in aimless discussion of trifles that would serve to put many a household on a more efficient working system that it now has been. None of a would want to be called brainless or even thoughtless. But not all of us are as afraid of really being a Let's learn to charge our mind only with the things which really count for broadened lives and kindness of heart.

Jewelry Store, 103 Grafton Street. (5) To the candidate standing next highest in each of the two districts we will give a \$35 Cabinet of Silver purchased from and on exhibition at W. W. Wellner's Jewelry Store, 103 Grafton Street. And ten per cent. commission to each and every active candidate who works up to the close of the contest and does not win prize.

# Apply Pepsin

Every Day to Your Teeth

All Statements Approved by High Dental Authorities

# To Fight Film

DENTAL SCIENCE has proved that the great tooth wrecker is a slimy film. You can feel it with your tongue. Most tooth troubles are caused by it. It clings to the teeth, enters the crevices, hardens and stays. And teeth will discolor and decay where that film stays, however much you brush them. That is why millions of tooth brush users fail to save their teeth. It is the basis of tartar. That film is what discolors — not the teeth. It holds the acid in contact with the substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

Millions of germs breed in it. They, with tartar, are the chief cause of pyorrhea. Scientists have for years sought ways to combat that film, but the methods proved inadequate. Then one man, after extensive research, applied activated pepsin — a digestant — to the film. And many clinical tests seem to clearly prove that he solved this great film problem.

We ask you to see for yourself. This pepsin method is employed in Pepsodent, and we offer a 10-Day Tube. See what it does when you use it. See the results in ten days. It will show you a way to clean your teeth as you never have cleaned them before.

# See How They Glisten

Analysis shows that the film is albuminous. Pepsin digests albumin. The object in Pepsodent is to dissolve the film, then to constantly combat it. But pepsin alone is inert. It must be activated, and the usual agent is an acid harmful to the teeth. So pepsin long seemed forbidden. Now a harmless, activating method has been found. And that method, used in Pepsodent, makes efficient pepsin possible.

Able authorities have proved Pepsodent by convincing clinical tests. It has been adopted, and is now endorsed, by leading dentists everywhere. It does what nothing else has done, and everyone should use it. We urge you to prove it yourself. Ask us for a 10-Day Tube. Look at your teeth and see what it does. See how they glisten. Do this for your sake and your children's sake. Learn the way — the only way — to cleaner, safer teeth.
