LAME?

FULL OF TWINGES?

These signs say...
"STOP Muscle Fatigue!"

• Doing prolonged or violent work these days? Your muscles are bound to feel it. When pain strikes, put on Sloan's Liniment to help restore your aching muscles. Your muscle structure is extensive and muscles work on oxygen. By putting on Sloan's Liniment, you help stimulate the blood supply around the used muscles. The new blood brings vital oxygen, and sweeps away old blood, heavy with fatigue acids. Stabbing muscle pain disappears faster when you apply Sloan's Liniment. 2Y

SLOAN'S LINIMENT

English Pub Aids Soldier Hospital Patients To Health

(By The Canadian Press)
SCOTCHMEN IN ENGLAND, Feb. 16—Many a wounded Canadian serviceman has helped find his way back to health through the doors of a little English pub. Situated near a large military hospital it is the first place many Canadian wounded men visit after the front and Italy visit after they are allowed out of bed. The confidence they gain here is voted by doctors and nurses one of the best of the hospital's convalescent aids. The place itself is a country house with the front turned into a bar. It is homey, with big fireplaces, and the proprietors seem to take a special pride in making the "up-patient" of the hospital welcome.

One Saturday night a Nova Scotia youth—who didn't want his name used "because the folks 'at worry" was told he could go for a walk outside the hospital for the first time. He had practised with his crutches in hospital corridors but wasn't too keen on being seen by strangers. It took persuasion to convince him a visit to the pub would do him good. He made it to the short hill with ease, stepped through the door which was held open for him, then suddenly lost his confidence when faced by a roomful of people.

A nursing sister said: "Why, it's nice to see you out—won't you have a drink?" Next thing the boy knew he was arguing about the battle for Caen as though he hadn't a worry in the world.

After awhile he asked to be allowed to buy the drinks. No one said anything about how he could get the glasses from the bar to the table while on crutches or offered to help. They just gave their orders.

He ordered the drinks and, by making separate trips and holding each glass carefully between his thumb and first finger while his other finger gripped his crutch, made it. Afterwards he looked to see if anyone had noticed or

Official List of Casualties

ROYAL CANADIAN AIR FORCE OVERSEAS

Missing On Active Service After Air Operations

Barnes, Richard Herbert, FO, St. James, Mar.

Fratt, Harold Kenneth, FO, North Bay, Ont.

Johnson, Herbert Lee, WO, Amagoo, Arkansas, U. S. A.

Milner, Allan Ralph, Fl.-Lieut., Vancouver, B. C.

Small, James Gordon, F.-Sgt., Moncton, N. B.

Sulik, Otto Hugo, F.-Sgt., Toronto, Ont.

Previously Missing On Active Service — New For Official Purposes

Baran, Michael, FO, Hamilton, Ont.

Beach, Roy Bernard, WO, Toronto, Ont.

Cameron, Douglas Newlands, FO, Winnipeg, Man.

Cornwall, George William, FO, Dauphin, Man.

Lunney, Vernal Norwood, FO, Winnipeg, Man.

Taylor, Glen William, FO, Grafton, Ont.

Wilson, Sidney Albert, FO, Guelph, Ont.

Dagworthy Injured On Active Service

Malcom, Donald Andrew Charles, Fl.-Lieut., New Glasgow, N.S.

Dangerously Ill

Allman, Kenneth Gordon, FO, Toronto, Ont.

Seriously Injured On Active Service

Anglin, William George, FO, Belleville, Ont.

Bain, James Hepburn, Fl.-Lt., Medicine Hat, Alta.

Forbes, Gordon Ross, Fl.-Lieut., Ottawa, Ont.

Harding, John Robert, D. F. C., FO, Windsor, Ont.

Hibbert, William Reginald, FO, Stouffville, Ont.

Orser, Claude Allen, Pte., Hartland, N. B.

EARLY DAYS AT HARVARD

The first scholarship fund at Harvard was donated by Lady Moulson of London in 1648.

Laughed at his clumsy manoeuvring. No one had paid the slightest attention.

"You know, I'm a pretty agile guy" and the nurse claimed that was the first joke she had heard the hospital with his leg missing below the knee.

Mobile Laundries For Overseas

A FORWARD R.C.A.F. AIRFIELD IN HOLLAND. No longer need members of mobile Canadian units in the Tactical Air Force hanker for chocolate soap and clean, rational laundry work, or scrub their shirts and socks in their wash basins.

These are the eager customers of four mobile laundries, based at four airfields in Holland and France, and representing field service de luxe for 6,000 temporary gypsies. The machines, each weighing 20 tons and encased within a low-car trailer, are operated by crews of nine, with the specially-trained N.C.O.'s acting as shift-bosses.

Supervising their installation and original operation is B.J. Kenally, Ottawa, a textile and Laundry research machine with the National Research Council, on loan to the R.C.A.F. For the past 10 years Mr. Kenally has been engaged in studying chemical and industrial problems allied to clothing.

"Although these units were designed primarily to provide adequate, clean linen for soldiers in the field—no consideration was given to providing goods—these field units have been equipped with a battery of hand-irons which operate from the generator. This permits the ironing of handkerchiefs and collar and cuffs," he observed.

Each imposing, but remarkably compact machine not only washes, but dries everything from handkerchiefs to spectacle-wipers—an important consideration in Holland where a damp cloth stays that way for days.

"If there's no sunshine we just put on a little more steam," said the Ottawa man, operating the dryer. It consisted of two cylindrical tubes, with a steam coil providing heat at the top, and a fan blowing it to the bottom—drying 60 pounds of clothing in a quarter of an hour.

The entire laundry unit opened at the sides like the caravan of the old-time patent medicine salesman. Inside was a complete electrical motor generator to supply nearly a dozen motors operating washers and lights. A big 300-gallon tank occupied one-end of the van. It was unique for it represented what is probably the most economical way to heat water ever put on wheels.

A self-contained, oil-fueled boiler heats water for use in the washers and provides steam for the driers, but the exhaust gases from the motor of the generator are piped through the water tank to pre-heat the water. As if this did not represent economy, even the heat from the dirty water is reclaimed, by circulating used water in pipes past the fresh water as it is being drained.

Accessories to the unit include tubs, ironing connections to permit filtering and using cold and hot water, and attaching marquees to provide well-rooms in which bundles are tagged, sorted and numbered. If the airmen customers express the wish, local women can be provided with tables to mend, darn and replace buttons.

As may be imagined the business of handling more than 300 bundles of laundry each day is no simple matter. A confusion of unidentified quantities of blankets could develop into a confusion of unidentified shirts and mismatched socks, but for this method is ingenious, and simple.

Numbered sets of safety-pins are used, and the bundles are marked with numbers and initials. The method is ingenious, and simple.

The airmen operating the mobile laundries in units in Canada do not get overseas but now they are immensely proud of their work.

"They are all working like things in the morning and late in the night, fixing up this and that and putting the clothes and lines up," observed the supervisor.

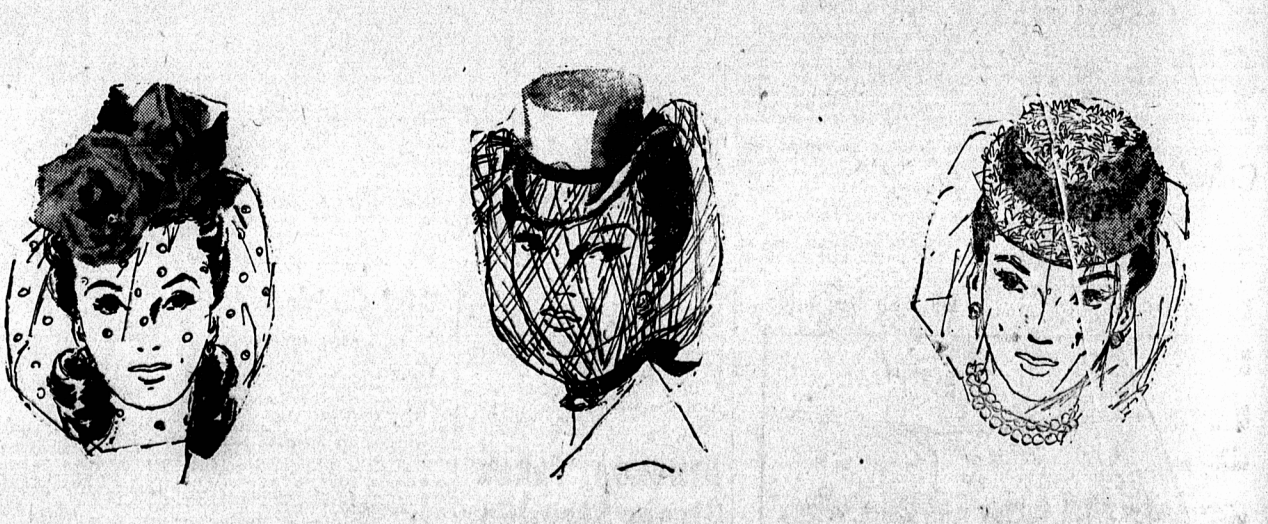

He added: "The men feel they are maintaining a high standard of cleanliness and are nothing give a man a lift as much as give a lift to put on a clean shirt and clean underwear. Yes they feel that in a humble way, they are helping to keep these 'bumboons flying' behind the men who fly them."

Enchanting for Spring!

Enchantingly feminine hats to catch all eyes thru Spring! And to add the exclamation point to every costume! Victoriana sailors provocatively veiled, new high-rise bonnets, new "dog-collar" sailors — flower charmers, homburgs, tiny pillboxes. Definitely modern ideas that keep you looking forward to Spring.

Canadians Entertain for Bombed Children

A BRITISH PORT — Even the Pied Piper would have taken a back seat to the crew of the Canadian Corvette Mimico who entertained children of this badly blitzed Italian town streamed into the local parish hall recently as guests of the Canadian Seaman at a post-Christmas party.

Originally planned to be held before Christmas, the party was postponed several weeks because of the ship's operational assignments. But the party was one of the most successful ever held here and will long be remembered by the town people.

Ranging in age from about two years to 10 years, the children were

turned over at the door of the hall to bury Canadian sailors who played with them, fed them and nursed them during five hilarious hours of screaming and yelling and cheering that rocked the old parish hall.

A vaudeville show was brought down from London to put on a special children's concert and the little guests left the party full of food and sweets — the likes of which they had never seen before in war-time Britain — and each with a present from Santa Claus in the person of the Coxswain Chief Petty Officer Sterling Jackson of Toronto, Vancouver and Fort William.

The party was the brainchild of the ratings aboard Mimico which had been visiting this port many months. The men clipped in and raised more than \$200 plus contributions of candies and goodies from their pockets and homes.

"All the credit for the success of the venture should go to the ratings," said Lieut. Francis Jones, of Montreal, Mimico's

Commanding Officer. "It was strictly their idea and they did all the work. The officers merely backed them up because it seemed to us like a pretty nice gesture."

The church vicar, at the close of the party, addressed the children and the ship's company and said the townsfolk would never forget "the kindness and generosity of you Canadian sailors who left no stone unturned in bringing joy to the tiny tots of this town. We will be forever grateful."

PLEASANT SPEAKING VOICE CAN BE GREATEST ASSET

A soft voice is indeed a lovely thing in a woman, while the voice that's strident, or too thin, or the worst liabilities a woman can have.

The thing about the bad voice is that it makes even the most beautiful woman irksome. Ebb's little deliberate effort to pitch her voice lower or to give a little more

richness to her vocal tones would make her ten times more attractive!

But, his the volume that most women should try to control. Your voice will be more attractive if you merely think about controlling it—if you avoid the loud laugh and the temptation to "sneer" your words to the farther corners. Speak softly and you're set.

LEATHER PATCHES

Most of us have heard of using the best part of an old worn out glove for patches but it's a new wrinkle to use the leather from handbags that have seen their best days. The heavier leather in larger pieces too, make fine reinforcements for the knees of children's snow suits.

HAVANA'S OLDEST

La Piñera, the old fort, is the oldest structure in Havana; it was built in 1536 under direction of De-

INCREASE WATER SUPPLY NAIROBI, Kenya — (CP) — A resolution that Nairobi's water supply must be increased to at least 10,000,000 gallons a day in order to meet the present and immediate future needs of the town was passed at a recent meeting of the town's municipal council.
