Movie Films of Hungry Russians

LONDON, Aug. 2.—The Daily Telegraph tells how the skipper of an American steamer with a cargo of films of everyday scenes in Petrograd by concealing a cinematographic camera on the captain's bridge and taking photographs through loopholes in the protecting canvas. Some of these photographs, it is stated, will produce a sensation, especially those showing several hundred famished people who discharged of Bolshevik overseers they worked from early morning to late at night and were then locked up under guard until the next morning. They were fed principally on a disgusting liquid called soup, each portion being accompanied by a small piece of bread.

The well-fed American sailors took compassion on them, and threw bread, sugar and other food to them. This led to fierce struggles, the poor starving wretches falling over one another in the struggle for a piece of bread or sugar. The Bolsheviks heard about the film, and sent agents aboard to claim it, but the American captain declared that his ship was under the protection of the Stars and Stripes and threatened to shoot any Bolshevik who tried to issue orders on board.

Home Made Bread

Home made bread is without doubt the cheapest and most healthful food that can be produced for human consumption. It is the most completely digested solid food in the world, over 90% of it being transformed into health and strength. It yields nearly twice as much nourishment as rice or potatoes, and is ten times as nourishing as an equal value of meat. No bread is more truly wholesome or more perfectly satisfactory than that baked at home in which Royal Yeast Cakes are used.

ROYAL YEAST CAKES

It was known many years ago that yeast is an excellent thing for constipation, anemia, boils and pimples. Lately eminent scientists have been investigating the matter thoroughly and their conclusions point to the fact that the beneficial effect of yeast has not been overrated. The yeast treatment is very simple and economical—and altogether harmless.

Before each meal eat a Royal Yeast Cake, or take a cake dissolved in water or fruit juices. The scientific investigators say that the curative elements in yeast are the vitamins and nuclein which it contains. It is certainly well worth a fair trial by those who suffer from any of the ailments mentioned above.

Men Harnessed To Plows In Parts Of Mexico

Not An Uncommon Sight on Account of the Scarcity of Beasts of Burden

MEXICO CITY, Aug. 4.—Men harnessed to plows and engaged in sturdy cultivation of the soil is not an uncommon sight in the state of Morelos, according to travellers in that region.

Beasts of burden are scarce in that state and the small farmers have met the situation by taking their places. The result is that bountiful crops are being grown there. Morelos, incidentally, is being watched with interest here, inasmuch as the government's scheme for apportionment of small tracts of land to laborers and the reversion of large haciendas to their original owners—various municipalities—as being carried out there.

According to reports the scheme is working out well and a single district will produce this year more than \$600,000 (pesos) worth of rice. Sugar cultivation has been abandoned temporarily because of lack of machinery which was dismantled and destroyed during various revolutionary periods and has not been restored.

It is stated, however, that two large sugar mills are to be erected in the state which will meet all needs when the crops are harvested within the next 18 months. Morelos is known as one of the richest states in the republic but agriculture has been retarded because, until recently, it was owned practically in toto by 22 landlords who are said to have failed to cultivate the land to the best advantage.

Alleged Bandits Before Truro Court

TRURO, August 4.—The five alleged auto bandits, arrested at Stewiacke on Sunday night, were up before Justice Crowe in the Police Court this morning. They were remanded until Friday morning at ten o'clock. The case will be watched with interest by thousands of citizens. While at first it was supposed that this group had a duplicate in North Colchester and Pictou Counties, the conviction is growing in police circles that they have bagged the whole gang.

PICTOU, August 4.—The net of evidence is slowly tightening around the four youths accused of creating the bandit scare in Pictou and Colchester Counties, and who are at present in the Truro Jail. Today David Morrison, Chief of Police of Pictou, found some goods supposed to have been stolen from Young's store at Millville on the night of the disastrous fire at that place. The goods, consisting of several rolls of linen, have been identified by Mr. Young and several members of his family, by private marks which he himself had placed on them. They were found in the house of William Hayes, whose wife is a sister of one of the accused. The Chief feels that this is strong evidence that the youths now held are responsible for the Millville disaster as well as the minor affairs throughout the County. It was reported today that, while the accused had pleaded guilty to the thefts in other parts of the County, they had stated that they were entirely innocent of the larger crime.

Further evidence is expected to be forthcoming in the course of a few days.
