**Newest Solder Stronger Than Metals It Joins**

PITTSBURGH, March 18. (U. P.)—A solder stronger than the metals it will join has been developed by Peter Soffel, president of the Pittsburgh Metals Purifying Corporation, after three years of experiments and tests.

Soffel claims the new solder will add to the safety of airplane and Zeppelin construction and increase the demand for general aluminum products.

Tests, Soffel said, have proved that his solder joins aluminum and other "white" metals, more firmly than a single, whole piece.

White metals used in the manufacture of door handles and other parts of automobiles; zinc ware; magnesium and aluminum alloy products can be joined with the new solder as well as can aluminum, it is claimed.

Soffel says he is prepared to place the solder on the market under a trade name.

Burke F. Read, general manager of the company, collaborated with Soffel in the last 2 months of the laboratory work.

The solder is applied with a hot iron, or with an open flame, and requires no acid or fluxes, it is claimed.

Local soldering experts have approved the new solution, Soffel explained, in experiments carried out in local industrial plants.

**CATTLE IN GOOD SHAPE**

MARQUEZ, N. M., March 18.—Cattle throughout the state have wintered well and cattlemen this year will have some of the best feeders in years, according to reports made to Lee Evans, vice-president of the New Mexico Cattle Growers' association. Rangers are reported to be in good condition in New Mexico, he said.

**HUGE OCTOPUS CAUGHT**

MARSHFIELD, Ore., March 18.—An octopus, measuring nearly eight feet from tip to tip of its tentacles, was caught off the mouth of Sunset bay by John Walters of Marshfield. He placed it in a tub in his back yard and it displayed life the following morning. The same afternoon it still had slight suction in the suckers near the tips of its tentacles.

**FARMER MAKES QUILT**

BELOIT, Wis., March 18.—A pink and white "flower garden" patch work quilt which he is making for his sister keeps Andrew Rineheimer, 70-year-old farmer busy after chores are done. He can use a needle as well as a pitchfork or plow and has made dresses for children, aprons, shirts, and done fancy work.

**NEW ALMONY CLUB HEAD**

CHICAGO, Mar. 18.—Nathan Bulmash, 27, is the newly elected president of the Chicago Almony club with headquarters for 70 members at the county jail. W. H. Donald, 77, former president, was forced to resign due to the completion of his six months sentence. He announced he was \$846 in arrears in his alimony payments which he had sworn he would not pay and that he would soon return.

**JUDGE LOANS LAWYER \$1 FINE**

MEMPHIS, March 19.—When Judge A. B. Pittman fined Lake Hays, Memphis attorney, \$1 for contempt of court and then told him he could borrow the money to pay the fine, he never believed Hays would call on him for the loan. That is what happened, and the judge paid the fine.

**SUNDAY SCHOOL TEACHER 65 YEARS**

MEMPHIS, Mar. 19.—Judge J. P. Young, Memphis historian who is 84 years old, has been teaching Sunday school classes for 65 years. He has taught a girls' class at the Lamar Heights Presbyterian church here for the past 18 years.

**TROUSERS BECOME TORCH**

SISTERS, Ore., March 19. (U. P.)—Ray Stewart spilled gasoline on his trousers. Later he struck a match to light a lantern and his trousers burst into flames. Quick work on the part of W. J. Crawford and Charles Prusick saved him from serious burns.

**IT IS CRUELTY TO CHICKENS**

WINDSOR, Ont., Mar. 19.—Carrying chickens by their feet so that their heads hang down, contrary to the Ontario statutes. Two people recently were arrested at the market place here for an infraction of the law and fined \$5 and costs each.

**King And Queen Of Siam Will Travel Incognito During Visit To U. S.**

Ruler to Receive Medical Treatment and May Undergo Eye Operation at Johns Hopkins Hospital While Here.

SAN FRANCISCO, March 19 (U. P.)—The King of Siam, absolute ruler of the land of the white elephant, will visit the United States with his queen in about a month.

It will be one of the rare occasions on which a reigning monarch has visited this republic, although the King will travel incognito, rather than make an official state visit.

The ruler of Siam—which, in the native tongue, is called Muang Thai, or the "kingdom of the free"—is 37 and speaks English, having been educated in England. Although the exact itinerary of King Prajadhipok and Queen Rambabarni has not yet been worked out, it is known that they will arrive at Vancouver, the point of debarcation about mid-April.

**Travel as Prince and Princess**

Because the purpose of the trip is to allow King Prajadhipok to consult eye specialists at Johns Hopkins University, Baltimore, and possibly to undergo an ocular operation the royal party will travel as "Prince and Princess of Sukhothai."

Adoption of the incognito is by no means intended to keep secret the identity, or movements of the royal party, but is merely a diplomatic formality which permits them to travel without the necessity of attending the round of formal fetes and receptions which normally would accompany a diplomatic visit.

The incognito will be dropped only for a brief period when their majesties plan to visit President Hoover at Washington. For that occasion, the King and Queen will resume their official status. Details of the formal State reception are being arranged by Siamese and American officials at Washington.

**May Visit U. S. Cities**

Tentatively, His Majesty has taken a residence in the vicinity of New York, where he expects to recuperate following the anticipated operation. Following his convalescence it is probable that the King may spend some time in Canada. He may also visit various American cities, as plans call for a stay of several months on this continent.

During the absence of His Majesty from Siam, His Royal Highness Prince Paribatra will act as Regent.

The Adviser in Foreign Affairs to the Government of Siam, Raymond B. Stevens, will reach the United States in advance of the royal party, to aid other officials in planning details of the trip.

Stevens, with His Serene Highness Prince Amoradit Kridakara Siamese Minister to the United States, and Major Prasobri Chirapavati, Aide-de-Camp, will join the Royal party upon its arrival at Vancouver.

**The Royal Party**

The Royal Party will include: His Majesty King Prajadhipok and Her Majesty Queen Rambabarni, Their Royal Highnesses Prince and Princess Savasthi, parents of the Queen, and His Highness Prince Chirasakti, cousin of His Royal Highness.

The Suite in attendance upon their royal highnesses will include General His Excellency Chao-Phya Bijayendri, Chief Aide-de-Camp General, Rear Admiral Mon-Chao Thavara Chayant, Physician in Ordinary; Madam Thavara hayant, Lady in Waiting, Mom Chao Vipulya Svastikula, private secretary, Phra Noraraj, chamberlain, Mom Rajavongse Smaksman Kridakara, assistant private secretary, and Luang Sirisombati, treasurer of the household.

**C. I. T. Students Favor English House System**

PASADENA, Cal., March 18.—(U. P.)—Elimination of social fraternities and a trend toward the English system of "digs" is predicted at the California Institute of Technology with the completion of a new \$1,000,000 group of four student living houses.

A student committee of three appointed to draw up a comprehensive plan for the future social structure of the institution recommended dissolution of the fraternities after a study of housing and social alignment at more than a score of American and European Universities.

The Institute's board has accepted the report, and issued the following statement.

"The board wishes to express extreme appreciation of the thoroughness of the investigation, the skill of its formulation, and broadmindedness of the recommendation, and assures the student body of the board's co-operation to the utmost in carrying out the committee's wishes."

Under the new plan, freshmen will be distributed equally among the four houses, each of which accommodates 75 students. Although the enrollment at the institution is limited to 600, approximately half of the students live at home, or in private homes in Pasadena.

Choice of rooms will be given according to seniority, order of choice among men of equal ranking to be decided by casting lots.

The report suggests that coats and ties be worn at dinner, which should be followed by the serving of demi-tasse in the lounge rooms.

Provisions of the plan were aimed principally at the creation of a student social grouping which would permit close friendships and intimate exchange of ideas while discouraging the formation of cliques.

**Reducing Stars Salaries**

(British United Press)

BERLIN, March 19.—Reductions in the salaries of "stars" by as much as fifty per cent are among the drastic proposals made for reducing the costs of theatre productions and filling the half-empty theatres of Berlin.

The situation in the theatrical business in Berlin is said to be critical and it is feared that there will be a number of failures unless costs can be lowered.

While the directors and managers of the houses most badly hit support the proposed measures, they are opposed by those who point out that contracts entered into with actors cannot be broken off without legal consequences.

**NEW PORTLAND DIRECTORY**

PORTLAND, Ore., March 19. (U. P.)—Portland's 301,890 residents are grouped between A. L. Aabing and Walter Zyzner in the new city directory just out. The directory shows that the 301,890 live within an area 66.86 square miles on 1621 streets and play in 50 parks, 20 golf courses and 21 miniature golf courses.

**GEORGIA PHYSICIAN HONORED**

ATLANTA, Mar. 18.—The name of the Davis-Fischer sanatorium here has been changed to the Crawford W. Long Hospital and Clinic in honor of the noted Georgia physician who discovered the use of ether as an anesthetic.

**MEDAL FOR ANIMAL HERO**

NEW ORLEANS, Mar. 18.—A medal will be awarded to the greatest animal hero by the Latham Foundation for promotion of Humane Education during the "be kind to animals week" here April 13. Any animal that has performed an act of heroism will be eligible.

**JURY OF 11 HEARS CASE**

HARTFORD, Conn., March 18.—A civil action was tried here by a jury of 11 men instead of the customary 12. So much difficulty was encountered in finding the 12th juror that opposing counsel agreed to try the case before 11.

**USE THE SAFEGUARDED MILK**

For velvety soups and sauces, rich ice creams and candies, fine-textured cakes and puddings and custards, always use Carnation Milk—convenient, economical, always dependable. Clean housing of clean herds and clean handling of the milk safeguard Carnation Milk at the source and protects its purity. And this protection continues until Carnation reaches you in its hermetically sealed containers.

**"FROM CONTENTED COWS"**

**The Preparation Of Eggs**

Continued from page 8

The calcium and phosphorus in the egg yolk help to insure good muscle, red blood and strong bones and teeth.

Vitamin A is the vitamin necessary to growth promotion. Experiments have shown that two egg yolks contain about two and one-half times the vitamin A potency of a pint of milk. Thus the addition of egg yolk to the diet of an infant provides a very valuable vitamin A supplement.

Vitamin D contains the same essential properties as the ultra-violet rays of the sun. It is essential to bone development and is a preventative of rickets. Egg yolk is the only common food in which this vitamin is found in appreciable quantities.

**Why Eggs Are Rich in Vitamin D**

One of the most interesting and remarkable stories of nature is woven around that rare and indispensable food element which we know as vitamin D, the presence of which in egg yolk has led to such an increased appreciation of the value of eggs as a food.

This vitamin has its inception in the ultra violet rays of the sun. These rays, although indispensable to life, represent only about one per cent of the total solar radiations. They possess very little power of penetration and will not pass through ordinary window glass and only slightly through the smoke and dust laden atmospheres of larger cities. In northern countries in the winter months, even though sunshine is plentiful, the sun is too far removed for its ultra violet rays to be of great value.

As with all life, the growing chick embryo requires those indispensable properties found in the ultra violet rays. So nature has provided a way whereby the hen can absorb these rays and transform them into vitamin D, containing the same properties, and deposit this vitamin in the yolk of the egg. From such legumes as clover and alfalfa which also possess the power of transforming the ultra violet rays into vitamin D the hen secures a further source of this vitamin. From cod liver oil, also an important source of vitamin D and which is now being fed to hens on large numbers of poultry farms, a further source of this vitamin for depositing in the yolk of the egg is secured.

Since eggs are the only food of their type used commonly by humans, they are the only common food in which vitamin D occurs naturally in appreciable quantities.

Vitamin D is essential to the development of bone and to the prevention of such bone troubles as rickets in children. Recent studies have shown also that this vitamin is essential to normal human metabolism—the activities of the living body cells by which energy is provided for vital activities and processes, and new material is assimilated to repair waste.

**OREGON SOLONS SCAN FREAK BILL**

SALEM, Ore., March 19. (U. P.)—Perhaps the freakiest of all freak legislative bills was introduced in the Oregon legislature by Senator Bennett, Portland butcher. It provided that the state issue \$50,000,000 in currency to be loaned on real property in amounts not to exceed \$5,000.

**You can serve MORE NOURISHMENT for LESS MONEY with these Syrups!**

**Delicious, economical food with real nourishment is what your family needs, and you can get all of this when you serve Crown Brand Corn Syrup and Benson's Golden Syrup.** Physicians recommend them because of their great energy producing value and because they are easily digested.

Have a jug of one of these famous syrups on the table at every meal. Eat all you want. They mean real health for less money.
