FRANCE AND GERMANY AGAIN EMBROILED

Trouble Over Germans Who Deserted in Morocco—Berlin Demands Their Return—France Proposes Arbitration, But Germany Will Not Contest—A Serious Situation.

BERLIN, Nov. 5—(Special)—The relations between France and Germany are disturbed through Germany's seeking from the French Government the return of Germans who deserted from the Foreign Legation at Casa Blanca and additional satisfaction for the alleged assault made upon a subordinate official of the German consulate. The French Foreign Office wishes to submit the matter to arbitration and Camben, the French Ambassador, is endeavoring to reach an agreement with the German Foreign Office, but without success. The papers declare it now necessary for Germany to insist upon its rights. The German Government made serious representations to France in October, but the raising of a controversy in the newspapers is regarded by Buelow's critics as a device to divert public attention from the Emperor and Chancellor to a foreign quarrel. PARIS, Nov. 5—(Special)—While it is not believed that Germany will make the Casa Blanca incident the subject of an ultimatum, France is resolved to stand firm. M. Camben has been instructed to notify Germany that France maintains the view that the whole question be arbitrated and meanwhile declines to release the deserters, to reprimand the officers concerned, or to exchange regrets with Germany. The Chancellors of St. Petersburg and London have been informed of the exact situation. Premier Clemenceau declared he was ready to go before the Chamber of Deputies on the issue and resign if not upheld. The press with singular unanimity, voices its approval of the Government's attitude and declares that a back-down would be equivalent to the moral end of France.

A strong wind was blowing and efforts were made to persuade the aeronaut not to attempt the ascension. He said, "I will make the jump if I should break my neck doing it."

BAPTIST UNION NOW FORMALLY ADOPTED

Subject to Approval by Conventions—Outline of What Proposed Union Will Cover and of the Constitution as Prepared—Adopted Unanimously.

OTTAWA, Nov. 5—(Special)—The Baptist union of Canada has been accomplished. KILLED BY HIS OWN INVENTION

LONDON, Nov. 4—A new explosive may have been lost to the world by the terrible death of Hugh Lanning, a sixteen-year-old scientist, who was killed while experimenting at his home at Weymouth last week. According to the evidence given at the inquest on Thursday, he was using some high explosive, of which the base at least was picric acid or a similar substance. Although diligent inquiries had been made, it could not be ascertained, that he had purchased picric acid, and it was stated that he might have made it himself or have hit on a new combination. It is stated that the boy was advanced in science far beyond his years, and that he had been working with high explosives for two or three years. He had been accustomed to carry out some of his experiments in the open country, where he could watch the effect of his explosions.

For the balance of the fiscal year it is expected that there will be a steady letterment in the monthly statements of customs revenue.

TAKES EVIDENCE TO HIS GRAVE

EDMONTON, Alberta, Oct. 4—Chief of Police Andrew McCauley, of Strathcona, died early Monday morning as the result of exposure in severe weather searching for Thomas Oliver, the murderer of old man Burns here recently. In a long chase, McCauley was compelled to sleep several nights in the open, and his constitution, already weakened by tropical fevers, while in the south campaigning, was unable to stand the strain. Death gives Oliver a new lease of life as McCauley had gathered strong evidence against him and died before he had a chance to tell what he had.

DRIFT VOYAGE TO FIND THE POLE

LONDON, Nov. 4—Definite plans have been drawn up for a Norwegian North Pole expedition under the leadership of Amundsen, who took the first ship through the North-west Passage. Amundsen plans a drift voyage across the North Polar Ocean. The central idea is the same as Nansen's, but the lesson of that explorer's voyage led to the conclusion that a vessel entering the ice considerably east of the point where the Fram was not frozen in would probably drift further north and be carried over or quite close to the Pole. Amundsen proposes to enter the North Polar zone through the Behring Strait and fasten his ship in the ice north-west of Point Barrow, the most northerly point of Alaska. He is prepared to drift for five and possibly six years.

Besides his son Kermit, who will take photographs of the big game in Africa, he will be accompanied by a professor from the Smithsonian Institute and an official from the Navy Department. From Naples Mr. Roosevelt and his party will travel on one of the German East African steamers to Mombassa, via the Suez Canal and Aden, a sea journey of 17 days, including stops. So far no arrangements have been made for the six months the party will spend in Uganda Province, between the coast and Fort Florence, a distance of 584 miles. On Lake Victoria, the party will embark for Entebbe in Central Africa. One thing certain is that Mr. Roosevelt will not enter the Congo territory.

It is not known what action the bank will take. Mr. McCallum resorted to the new methods of using bank funds and covering up shortages. He daily inserted bogus items in accounts before sending returns to clearing house. He has been with the bank since its foundation and is bonded by guarantee Co. to the extent of \$15,000.

NEW YORK, Nov. 4—Members of the Canadian Camp are allowing their action to water this year in anticipation of the delicacies that will be fed to them on the occasion of their semi-annual dinner at the Hotel Astor on the evening of November 13th. Although the thousand or more members of the Canadian Camp are all mighty hunters, have killed bear and deer and moose and jack rabbits and all kinds of fierce wild animals, the club has never yet enjoyed a venison dinner or eagle wings saute.

BLACKHAND TAKES AWFUL REVENGE

NEWARK, N. J., Nov. 4—With his arms cut off and the stumps unhealed Villardo Dipetti, a former member of the Blackhand, appealed to the Newark police recently for the police guard to protect him from the still vengeful members of the band which he deserted and betrayed. Dipetti says he joined the Blackhand in Morothorn, W. Va., was suspected of betraying the order, and was inveigled to a switchman's shanty at the side of a railroad, where a member, who was a surgeon, amputated both hands, chloroformed him, put him in the hospital, then shipped him here before his arms were healed. Members are now prowling around the home of a friend, where he is staying, waiting for a chance to further torture him.

USED SAMPLE ORES TO LIGHT FIRE

VANCOUVER, Nov. 4—That nothing is sacred to a Chinaman, except perhaps the gods of his own religion, was easily proved at the Vancouver Information and Tourist association, recently, when the Celestial whose business it is to light the stove, used for the purpose a number of specimens of ore which have been in the rooms for some time. The assistant secretary upon arriving at the rooms found anything but a cheerful blaze, and it was not until she set about to remedy matters that she discovered that not only had the stove been filled with ore, but the coal bucket had been supplied into the bargain.

BAPTIST CONVENTION MEETING AT OTTAWA

OTTAWA, Nov. 4—At the Baptist convention recently Rev. William J. Scott, Toronto, read the report on the church edifice board. The purpose of this board is to assist weak congregations in erecting suitable buildings. In many cases, no assistance could be given on account of lack of funds. Two members have retired, Harry Rye and William Davis. The question of union was discussed vigorously and when the vote was taken late in the afternoon on the resolution for the adoption of the committee's report the result was practically a tie. Thereupon, it was decided to appoint a special committee to bring in a new report in the evening. This report said: "That we reaffirm our sympathy with the principle of a Baptist union in Canada so far as it may be practicable. That in view of the far reaching importance of the question we request the delegates who have been called to consider the question of the formation of a union, when they have reached a definite plan, which they are prepared to recommend, to furnish a copy of the same to the secretary of the convention, who shall thereupon transmit copies to each of the boards of the convention with a request that such boards shall report at our next annual meeting upon the probable effect of such union on the work of the respective boards and generally on the advisability thereof, and that all questions of the surrender of any of the functions or powers of such boards be deferred until after the receipt of such reports." This compromise resolution was carried unanimously.

One Chinese who offered armed resistance was shot. The riots were organized primarily by the students of this city and the disturbance is evidently widespread. At Singapore similar riots have occurred and a number of merchants said to have shown a desire to disperse the rioting have been taken.
