**Crops Keep For Weeks
In Unheated Garage**

Vegetables which remain unused in the small garden after freezing weather has put an end to the harvest can usually be stored in a garage. They will keep there in good condition for several weeks, and in most cases can be used up in that time.

Beets, carrots, potatoes, turnips and rutabagas, should all be given the same treatment which is as follows:

Dig them up as late as possible before the ground begins to freeze, and cut the tops off. Do not allow the roots to dry, but examine them carefully and store only those which you would consider in good condition for table use. Do not clean the dirt from them, but place them in boxes, and pack them in moist peat, sand, loam or sawdust.

expensive to prepare an insulated room, where temperatures can be kept below 40 degrees, while at the same time humidity and ventilation are satisfactory. Unless there is a considerable quantity of vegetables to keep, the expense would not be justified.

But considerable quantities of vegetables can be stored in simple outdoor pits, at a minimum cost, and with satisfactory results. In another article instructions for preparing such pits will be given.

ALWAYS A ROYAL GEORGE

The name "Royal George" has been in constant use in the Royal Navy since the days of Queen Anne.

Report Farmers Charged Under Lord's Day Act

OTTAWA, Oct. 24 (CP)—Justice Department officials expressed interest today in a report from Toronto of prosecution of York township farmers for engaging help and harvesting crops on Sunday, but no official representations have reached the office of Justice Minister St. Laurent.

A study of federal statutes revealed that the Lord's Day Act preserves the effectiveness in Ontario of "the act to prevent profanation of the Lord's Day, 1846, which is a part of the consolidated statutes of Upper Canada, 1859."

This old act makes it unlawful for any person to "do or exercise any worldly labor, business or work" of their ordinary calling on Sunday exempting the conveyance of travellers and mail, the sale of drugs or medicines, or other works of "necessity" or of charity.

The penalty ranges from fines of \$1 to \$40 and costs, and no alternative fine sentence is mentioned.

IN MEMORIAM

THE LATE MR. AND MRS. MALCOLM B. MACKENZIE

Glen Valley has lost two of its most loved and respected residents in the passing of Mrs. Malcolm B. MacKenzie. Mrs. MacKenzie before her marriage was Katherine E. Campbell, daughter of the late Alexander Campbell and Katharine Martin Campbell and was born July 6, 1868 in Springfield. She passed away in her 75th year on October 22, 1943, after a long illness, predeceasing her husband by one week.

Mr. MacKenzie was the son of Murdoch and Sarah MacLeod MacKenzie and was born at Eiton, January 26, 1861, and passed away July 22, 1943.

Mr. and Mrs. MacKenzie were married in Somerville, Mass., U.S.A. in 1884, where they lived for some time and where Mr. MacKenzie followed the carpenter's trade. Returning to the Island they took up residence in Breadalbane and later moved to Glen Valley where they spent the remainder of their lives.

Mr. and Mrs. MacKenzie were members of Hartsville Presbyterian Church and by their daily living and personal example had the evidence of their faith in the Lord Jesus Christ. They leave to mourn their passing the following children: Nell A. of Cushingville, Vermont; A. Murdoch, Waltham, Mass.; Katie, Mrs. Oliver Tremere, Hampshire and Ann M. MacKenzie, Hartsville Presbyterian Church. The service was conducted by her minister, Mr. Donald Nicholson, assisted by Rev. L.M. Murray of Hunter River. A favourite hymn of the departed was sung as a solo by Mr. Nicholson. The pall bearers were: Hedley MacPherson, Allan MacDowell, Malcolm Ollis, Norman MacDonnell, John MacLennan and Strling MacLean. Interment was in Hartsville Cemetery.

Mr. MacKenzie is survived by one brother, John, of Charlottetown, and two sisters Mrs. William Tinsley, also of Charlottetown, and Mrs. Henry Helmer of New York.

The funeral took place from his late residence and was conducted by Rev. Herbert H. Buntain, New London, and assisted by Rev. Louis M. Murray, Hunter River. A solo "Fading Away Like the Stars of the Morning" was sung by Robert Hill. The pall bearers were Messrs. Malcolm Ollis, Strling MacLean, Daniel Buchanan, Hedley MacPherson, Lyman Tremere and Ed. Jean Foster. Burial was in the cemetery beside his wife in Hartsville Cemetery.

Produce Prices

MONTREAL, Oct. 24 (CP)—Produce prices Saturday reported by the Dominion Department of Agriculture follow:

Potatoes: New crop 75 lb box No. 1 Que 1.50-1.55, N.B. 1.50-1.55 E.E.I. 1.70-1.75.

Breeding Program Sunflower Seed Oil

While considerable progress has been made in developing varieties of sunflowers suited to oil-seed production under Canadian conditions, there is pressing need, states the Dominion Department of Agriculture report on Oil Seeds Investigation, for an intensified breeding program in which particular emphasis should be placed on higher yield of seed, higher oil content, and higher quality of the oil, ultimately, there is need for an intensified research program relating to processing methods and utilization of the oil and meal.

Sunflower oil is one of the finest edible vegetable oils. In recent years it has been widely used in Canada in manufacturing shortening. After refining and deodorizing sunflower oil makes excellent salad oil and is also widely used as a cooking oil. It is being used in other countries as a component of margarine. Sunflowers have been grown in Canada for their seeds for many years, and on account of restricted importation and increasing demand, production has received much attention recently. From information gathered by the Dominion Experimental Farms, there is every reason to believe that Canada's edible oil requirements can be partially met through the extensive production of this crop, particularly in the prairie areas where land is relatively cheap and cash crops other than wheat are required.

How much VICTORY will \$100 buy?

When peace comes everyone in Canada will share in it. Yet more than two million gainfully employed Canadians who could buy a Victory bond, have not done so, yet. You, perhaps, belong to the other three million or so who have bought a bond. And you will buy again and again.

You consider these bonds your share in victory.

But have you stopped to ask yourself how much victory \$100 will buy?

Have you seen the latest figures on what Canada must spend if we are to shoulder our full share as a free and prosperous nation in the cost of the war?

Do you know that up to June of this year Canada has spent 4 1/2 billions on war munitions?

Do you know that since the war began Canada has built and launched 230 frigates, corvettes and minesweepers, over 100 patrol ships, and 178 freighters?

Do you know that over half the military vehicles which carried General Montgomery's army to victory in North Africa were made in Canada?

Do you know that the Air Training Plan for the next two years will cost \$1,500,000,000, of which Canada will pay half?

Do you know that so far we have spent on industrial expansion and defence construction—in Canada itself—more than a billion dollars?

These billions add up to Canada's share in victory. Do you think \$100 is your share of the total? You are paying taxes, yes. And perhaps you have some bonds already. But have you bought your share?

Only you, yourself, after you have thought everything over and determined to save every dollar you can—only you can answer that.

There is no greater danger to a democracy than the disillusioned people." V. R. Smith, life insurance executive warned in an address to the Canadian Public Health Association here, when he spoke on the proposed national health insurance plan. In an address on "First Things First," Mr. Smith said that until after the war would staff be available for adequate public health services throughout Canada. He counseled taking full advantage of the time left for careful planning and organizing of the proposed services.

The speaker endorsed the objective of the Public Health Association's brief to the Social Security Committee on health insurance and expressed approval of the vision of Canada, which the minimum amount is spent on sickness and funerals, a maximum on the prevention of sickness of all kinds—mental, moral and physical.

Mr. Smith said fundamental steps in any plan of social security and health insurance were provision of an adequate supply of food, with proper nutrition; adequate housing; and adequate employment. He urged the association to throw its influence toward remedying the little realizations of its unsolved problems concerning public health workers to consider what would be the effects on the national economy and on agriculture if milk consumption was increased from the average of less than half a pint to one and a half pints.

Touching briefly on national fiscal policy, Mr. Smith lauded the Federal Government's achievement that should the dam break and a runaway inflation ensue, there will be no immediate prospect of health insurance in Canada.

The most pressing problem of the immediate future was reallocation of the responsibilities of the Dominion and Provincial and the municipal, provincial and their taxing powers. Mr. Smith said sound public health measures, successful health insurance schemes or social security plans could not be developed under present legal rigidities and constitutional maladjustments.

"For instance," he said, "what is the sense of eliminating slums, the hotbeds of disease, if our economic procedures and methods of taxation continue to produce them? What good purpose is served by setting up a national plan of public health and health insurance if a province says publicly and submits the proof that its share of this plan is beyond its capacity?"

"How firm will be the foundations of any plan of social security that rests upon the bitter frustration of a province unable, in whole or in part, to enjoy the social insurance benefits available to other provinces?"

Continuing on division of responsibilities, Mr. Smith asked if it was impossible for the Dominion to assume responsibility for many of the preventive services, as well as giving substantial aid to special services, such as those for mental patients and the tuberculous.

"It is to be hoped that when our present planning materializes into action we shall have a streamlined plan which will have the open and hearty support of the economic and financial advisers of the

LEARN TO MAKE TEMPTING SALAD

We should have at least one fresh, raw vegetable each day. Salads are the answer.

In a salad you can serve an endless variety of the fruits and vegetables which are so rich in minerals and vitamins. Because you can use almost any kind of food or combination of foods in salads, they may solve the problem of eating leftovers.

If you include generous proportions of meat fish, poultry, cheese or egg in your salad, you may serve it as a main dish. Salads consisting mainly of fruits and vegetables may be served as an accompaniment to a meal or, in the case of fruit salads, as a dessert.

If you follow the simple rules advocated by the Women Institute branch, you will have an appetizing salad.

- (1) Use clean, crisp, tender greens.
- (2) Keep all salad materials dry and well chilled.
- (3) Cut the ingredients in attractive shapes and suitable sizes.
- (4) Use foods to make good flavour and colour combination.
- (5) Add sufficient dressing to season well but not enough to make the salad watery.
- (6) Add the dressing just before serving.
- (7) Use strong flavour, such as onion, sparingly.
- (8) Make an attractive arrangement, avoid a flat effect.
- (9) Select a suitable garnish, preferably one that may be eaten.

When combining the ingredients use a spoon or fork and toss them together lightly with the dressing. Almost any proportion of ingredients may be used.

Accompaniments

To serve with your salad you may choose one of several things: Hot cheese biscuits, hard rolls, crisp crackers, toast fingers, melba toast or cheese straws. You could spread crackers with butter and brown in the oven or add grated cheese. Toast fingers are made by cutting stale bread in slices one-third inch thick, spreading the slices with butter and then cut into one-third-inch wide strips. Bake in hot oven until browned.

SUCCESS IN SALVAGE

The Swedish submarine "Uvent" which founded in the Kattegat in April was recently towed to dry dock in Goteborg after three and a half months of salvage work.
