A very pretty wedding took place on Wednesday evening, June 28, in St. Stephen's Church, Irishtown when Miss Mary E. Millman was united in marriage to Mr. William Profit. The Ven Archdeacon Reagh performed the ceremony. And Mr. J. A. Winfield, gave the address. The bride and groom are both Sunday School teachers, and very popular in the district. The presents were beautiful and numerous. The church was tastefully decorated with evergreens and flowers, and a crowded congregation witnessed the happy event. Upwards of sixty guests assembled at the home of the bride's father where a most pleasant evening was spent, easterly winds, fair.

The Toronto Globe of July 9th in referring to the lobster season says: The season for lobster fishing on the Atlantic coasts of Canada closes on the 10th, and it is possible now to form some estimate as to the probable pack. Early in the year enormous quantities of live lobsters were shipped from western Nova Scotia, chiefly from Yarmouth, and also from points as far east as Richmond and Cape Breton Counties, on Cape Breton Island. The catch was probably quite equal to previous years. Along most of the coasts the canning of lobsters by law does not commence for four or five months after the live lobster trade has begun. In western Nova Scotia the canners found that in some localities the lobsters were extremely scarce, while in others a pack above the average was put up. The same holds true of northern New Brunswick. On the whole, and especially along the north shore of Prince Edward Island, lobsters this season have been extremely scarce, so that the total pack will be below the average, notwithstanding that a large number of new canneries have been built during the season, and immensely increased gear has been used. On account of the shortage in the localities referred to, the department of Marine and Fisheries has been asked to grant an extension of the season. But Sir Louis Davies decided before he left for England that no such enlargement was to be permitted. In view of the high prices which prevail the fishermen and canners will do better than the shortage would lead one to suspect. In the Straits of Northumberland and on the eastern shore of Cape Breton Island lobster fishing continues after the 10th inst., but the industry there is not of such extent as to seriously affect the total pack.

**THE HACKING COUGH.**

One of the meanest things to get rid of is a hacking cough. There is apparently no cause for it. No soreness, no irritation at first; but the involuntary effort of the muscles of the throat to get rid of something is almost constant. Of course, with many coughs is a habit, but it is a bad habit and should be stopped. When you realize this and try to stop it, you find you can't for by that time there is an actual irritation, which will never get better without treatment.

It is a curious thing that nearly all treatment for cough actually makes the cough worse. Then, too, most medicines for cough have a bad effect in the stomach. This is especially true of so-called cough remedies that contain narcotic. The true treatment for cough is one that heals the irritated surface. This is what Adamson's Botanic Cough Balsam does. It protects the throat also while the healing process is going on. When this remedy was first compounded our old men were young boys, and all this time it has been doing a steady work of healing throats. The most obstinate hacking cough will quickly show the effect of the balsam. People who have been trying for years to break up the mean little cough, will find a sure friend in this old time soothing compound made from the barks and gums of trees. All druggists sell Adamson's Botanic Balsam. 25 cents.
