

INCREASE IN POPULATION.

LONDON, May, 4.—The returns for 67 county boroughs in England and Wales show a population of 9,138,716, or an increase of 1,069,788 since 1891. Liverpool returns show an increase of 16,738; Leeds 61,448; Manchester 38,583, and Birmingham 44,069.

Asthma Gasps

Too many asthma sufferers give up their search for cure, believing that their particular case is beyond the control of scientific treatment. It is only necessary to point all such to a new hope in Dr. Chase's Syrup of Linseed and Turpentine, the one great remedy which has proven its efficiency not only as a prompt relief, but also as a thorough cure for asthma. Mrs. George Budden, Putnamville, Ont., says:—"I feel it my duty to recommend Dr. Chase's Syrup of Linseed and Turpentine, as I had the asthma very bad; could get nothing to do me good. A friend of mine persuaded me to try this remedy, I did so, and it cured me." It is impossible to imagine a better treatment for asthma than Dr. Chase's Syrup of Linseed and Turpentine. It soothes the excited nerves, clears the bronchial tubes, gives prompt relief to the frightful spasms, and when used regularly, thoroughly and permanently cures asthma. 25 cents, all dealers, or Edmanson, Bates & Co., Toronto.

Dr. Chase's Syrup of Linseed and Turpentine.

MANITOBA PROHIBITION.

A Winnipeg despatch tells that the full Court of King's Bench in that Province has refused the application for leave to appeal from their decision to the Privy Council in regard to the prohibitory law. The effect of this action will be that the law will not go into operation. It will be remembered that the Manitoba law was made conditional upon its validity being approved by a reference to the highest Court in that Province. Furthermore it may be noted that the refusal by the Court of King's Bench to grant permission to appeal is not so remarkable as might at first sight appear.

The provision by which a colonial Court may grant or refuse permission to appeal to the Privy Council is in itself proper enough. It might be for instance, that the appeal in the present case, had the Manitoba Court consented to it would not have been entertained by the Judicial Committee of the Privy Council for the reason that it did not arise in the course of ordinary litigation between parties. The matter would have been altogether different had the Manitoba Prohibitory Act gone into operation, and had there been a case of violation followed by conviction. In such a case the Court of King's Bench would no doubt have given the desired permission to appeal to the Privy Council, and the appeal, if carried to that august body would have been heard and determined in regular course.

The result in Manitoba shows another point of wide difference between the conditions existing in that Province and our own in regard to recent prohibitory legislation. Our Prohibitory Law is in no way conditioned upon a reference to any Court before going into operation. It is a different law from that of Manitoba in many of its provisions. Under our law there will be no appeal to the higher Courts from a conviction made for unlawful sale of liquors. But we presume that it will still be open to persons who may think themselves aggrieved by the decision of a convicting Magistrate to test the validity or constitutionality of the law before the higher Courts of the Province and of the Dominion, and that in such course the matter may be finally carried to the Privy Council.

Our Prohibitory Law will thus go into force a month hence and will remain in force. If litigation arises it may eventually be carried up to the Court of last resort, and only in the improbable case of a decision there that the law is unconstitutional will it fail to remain in full force and operation. The laboring oar will be thrown upon those violating and contesting the law. Under such circumstances the Government and the people who desire the abolition of the traffic will fight on the defensive, and may enter courageously and hopefully upon the task if called upon so to do.

We make these observations in order to prevent a very possible misunderstanding of the conditions that have arisen in Manitoba.

A young Australian journalist by the name of Murray has invented and perfected a system of printing telegraph messages as they are received from the wire at a speed of 130 words per minute. By his system the message to be sent is first prepared by perforating a continuous paper tape. This being run through the sending instrument sets in operation another instrument at the receiving station which there perforates another tape making an exact duplicate of the tape at the sending station. This portion of the process is not new. Murray's invention consists of a machine which on receiving the perforated tape works a type writer which reproduces in common type the letter which the perforations in the tape represent. The machine is turned by a crank and will make printed newspaper copy out of telegraph messages as fast as three men could write it.

ELECTRIC

POWER

Transmitted a Distance Of 140 Miles.

MODE OF GENERATING.

The Loss in Transmission is About 20 p. c. The Falls May be Used for Many Canadian Cities

The remarkable advance that is being made in electrical development, especially in connection with the transmission of power, is further emphasized by the successful transmission of power from a dam on the Tuba river to Oakland, Cal., a distance of 140 miles, where it is used in operating the street railway system. This opens up a wider field for the use of electrical energy in Canada, especially in Ontario, where there are so many large water powers. It places the immense generating power of Niagara within easy reach of Toronto, Hamilton, Buffalo and Rochester. It also places the numerous splendid water privileges for a hundred miles around here within the reach of Ottawa, as manufacturers would naturally prefer to select this as their site on account of the facilities as a railway distributing point and have the power brought in. The mode of generating power on the Tuba river is by turbine wheels similar to those in use at Niagara Falls. The cable is six-tenths of an inch in diameter, and is of copper, with aluminum alloy, which will prevent oxidation. This cable is suspended across Carquinez Straits by a span of 4,400 feet and 300 feet in the air. A test made on Saturday was considered one of the most successful in the history of electricity, a current of 40,000 volts having been transmitted the entire distance, with a loss not to exceed 5 per cent. Under that showing experts said the voltage could be increased until there would be practically no loss of the current. The current used was an alternating one, transmitted through the motor at the power station as a voltage of 40,000 was greatly in excess of the power needed.

TALKING ABOUT CHECKS HERE IS THE RECORD.

NEW YORK, May 3.—Wall street is no longer awed at the sight of a check for \$1,000,000 or even 5,000,000. The New York Clearing House employs frequently in these days of gigantic transactions handle checks for such amounts. Clerks do not hold their breath in astonishment at sight of checks for \$10,000,000.

As a Food For the Skin

Powders may cover up the disfiguring eruptions, but can never cure them, and are positively injurious, because they clog up the pores of the skin. Dr. Chase's Ointment is a food for the skin. It is readily absorbed, and thoroughly cures each and every skin disease, making the skin smooth, soft and clear. No woman's toilet is complete without Dr. Chase's Ointment, for, besides being the most perfect skin beautifier obtainable, it can be used in a score of different ways. It absolutely cures eczema, salt rheum and the itching to which women are especially subject. When the feet are sore and chafed with walking an application of Dr. Chase's Ointment takes out the smarting and allays the inflammation in a surprisingly short time. Then for burns, scalds and every sort of chafing, irritation or eruption of the skin, Dr. Chase's Ointment affords a safe and certain cure. It has come to be indispensable in scores of thousands of homes; 60 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto.

THE EDITOR'S MAIL.

A Fair Question.

Sir.—Saturday's Examiner says:—"There are doctors and doctors" and advises the people to be careful only to employ those who can be depended upon. With an organized fraternity covering up each other's defects, how are the public to know who can be relied on? Registration as advised by Rev. Mr. Fullerton would be a valuable aid. It would compel every physician to put his record before the public and upon that record he would have to stand. It would also make him more careful to improve his record and the sick would thus profit by it. Let us have vital statistics.

Yours, HEALTH.

BORN.

In Summerside, on Tuesday, May 7th, 1901, to Mr. and Mrs. W. P. Rogers a son. At Cornwall, on the 5th, inst. to Mr. and Mrs. J. W. Haseltine, a daughter.

MARRIED.

At Sacred Heart church, Alberton, on the 30th ult., by the Rev. A. E. Burke, P. P. George A. Graves, youngest son of James Graves, Alberton, to Mary Helen, daughter of John B. McKenna, Elmsdale.

DIED.

In this city, on April 6th, Edith May, daughter of L. J. and Edith Worthing, aged 1 year 4 months.

At his late residence, French River New London, on Tuesday, April 30th, Charles Bernard aged 66 years, leaving a wife, five sons and three daughters in Mass., U. S., and a son in Texas. The large number that followed his remains to the grave showed the respect in which he was held by all classes, rich and poor alike. He was a friend of the poor and lived to the Golden Rule and was a consistent member of the Presbyterian Church.

At Alberton, on the 29th, ult., of rheumatic fever, Samuel Gallant, aged 35 years.

Great Victory.

BARNABY RIVER, N. B. Mar.—Few cases of illness and recovery have excited the interest in this community, as has the kidney trouble of Mr. Cornelius Crotchie.

Mr. Crotchie's treatment by the doctors at home and in the hospital, and the fact that they absolutely gave him up as a case beyond all hope, is well known. His subsequent restoration by the use of Dodd's Kidney Pills reads like a miracle. "For five years I have suffered off and on with kidney trouble. Last fall I had an attack, for which the doctors had little hope of my recovery. I was obliged to go to the hospital for treatment, but it did me no good, so I came home given up by the doctors. A friend suggested Dodd's Kidney Pills. From the first box I improved. Now I am at my work every day."

Tourists' Specialties

We make a specialty of Tourists' and Travelers' Wraps and other requirements. It gives us pleasure to show this stock, while all inquiries by mail will be given our prompt attention. The following are among the exclusive specialties shown by us in the Scottish clan and family tartans. Also plain colors, black and white and greys: The "Bannockburn" Cape. The "Strathcona" Wrap. The New Inverness Cape. Wraps, Shawls and Steamer Rugs. These goods are among the choicest and most comfortable for travelling wear. Inquiries by mail regarding these goods will be given our best attention. Prices and all information on request. Selections sent on approval. 23 St. JAS. PATON & CO.
