WESTERN GUARDIAN

BIG AUCTION SALE at Carleton Siding, Friday, August 28th at 2 P. M., on the premises of the late Ernest W. Harper. Fine herd registered Holstein cattle, consisting of seventeen females, three young bulls. Quantity of farm machinery. See hand bills. If not fine will be held first fine day following. 8255-8-22-21

FINED \$2 AND COSTS EACH—At the Summerside Police Court on Friday morning five boys were charged with corner loafing. They were found guilty and fined \$2 and costs each. The women charged with the same offense pleaded guilty and were given the same fine—S.

PURCHASES FARM—Mr. Haslam, of Springfield, has purchased the fine farm of the late Ernest W. Harper, of Carleton Siding. Mrs. Harper intends to locate in Summerside. The late Mr. Harper's five herd of Holstein cattle are to be sold at auction next week—S.

FREAK POTATO—Mr. J. J. Gaudet, proprietor of the Capitol Theatre, Summerside, found amongst some sweet potatoes he had purchased, one that was the perfect replica of a small bird like a robin or sparrow. The head, shape of the body, and tail were perfect. The only thing needed was a pair of feet. Mr. Gaudet had placed heads of matches in for eyes and made a few markings for its wings so that at a short distance one would really think it was a little bird. It is very seldom one sees anything quite so realistic in a potato—S.

GRAND RIVER PICNIC—The picnic at Grand River on Wednesday afternoon was a great success. There was a large attendance. The baseball game between the Grand River team and a picked team from Summerside drew a large crowd. The game was exciting, but rather one sided, as the score was 16-0 in favour of the Grand River team. There was the usual line of games and music. Three gentlemen with the bagpipes furnished a good program. Rev. John A. McDonald, parish priest, welcomed every one in his usual happy manner. Visiting priests were Rev. J. J. McDonald, of Summerside; Rev. F. X. Gallant, of Egmont Bay; Rev. Martin Monaghan, of Miscouche, and Rev. Urban Gillis, of Wellington. Supper was served in the hall and everyone did justice to the sumptuous repast provided by the ladies—S.

CANADA'S SANE AND WHOLESOME DIET

LONDON, Aug. 21—Winnifrede Wrench in Overseas says: "Why should I still have to eat stodgy and unscientific meals in Great Britain when I ought to be able to get the delicious salads and properly balanced meals which I can get almost anywhere in Canada? Why shouldn't the babies of Canada have the same advantages as the babies of New Zealand? Because in too many instances we don't know yet in Great Britain that we are not eating the right food; in too many instances still we don't know that we are not bringing up our babies with the scientific knowledge that is part of every New Zealand woman's heritage today. What we have got to do everywhere is to open our mental eyes and not drowse through life, with eyes half closed and minds in a comatose condition. We ought to become more and more aware of what is happening all around us.

"After nineteen years revisiting Canada I find the country has changed outwardly far more than we have in the Old Country. But both Canada and Great Britain have changed mentally. Broadly speaking, perhaps we have become more and more Empire-conscious at home, and here in Canada we have become more and more Canadian. I say we, for to me the Empire is literally my country, though Great Britain is my home. "I had been told that Canada was Americanised. This is true in some ways, but so, to some extent, is the Old Country. Canada and Great Britain are more alike today than they were twenty years ago, of that I am certain. We are becoming more alike every year. I suppose the problem every nation has to face now is how to maintain what is worth maintaining and what is unique in our nationalities, while at the same time growing close together in all the things that make for a fundamental unity. What a wonderful thing it would be if, in a far shorter time than it takes today, we could pool our knowledge for the common good. For instance, if we in Great Britain were as progressive as the Canadians with regard to a sane and wholesome diet; if the rest of the Empire applied and practised all New Zealand has discovered with regard to bringing up healthy babies and so on."

"Dearest," wrote a young man, "I am awfully sorry, but I am getting so forgetful nowadays. I proposed to you last night, but I really forget whether you said 'Yes' or 'No.'"

The following answer came by return post—"Dear Jack—So glad to hear from you. I know I said 'No' to somebody, but I really couldn't remember just who it was. Thanks awfully.

THE MARKETS

(Canadian Press)

OTTAWA, Ont., Aug. 21.—Egg markets in Ontario and Quebec continued dull but the Vancouver market is firmer and prices are a little higher than at the beginning of the week.

Toronto—The local egg market is very dull. Dealers are now quoting producers and country shippers for ungraded eggs extras 22 to 23, firsts 20, seconds 16.

Montreal—Egg receipts here today were 2,000 cases as compared to 1832 cases in the corresponding day last year. The egg market here is rather dull. Western asking prices for carlots are on the basis of extras 27, firsts 22, seconds 20. Eggs are jobbing on spot between wholesale dealers at extras 28, firsts 23, seconds 20.

Vancouver—This egg market is firm and receipts are still showing a further decrease. Prices have advanced slightly and dealers are now paying producers for eggs extras 22, firsts 20, pullet extras 18, peewee seconds 10 to 11. Wholesale prices to retailers are now extras 27 to 28, firsts 24 to 25, pullet extras 23, peewee seconds 15 to 16.

Chicago spot 17 1-2, November refrigerators unchanged.

Montreal—An easy tendency was in evidence on the dairy and produce markets at Montreal today. In some cases prices held unchanged despite a weaker undertone, but a number of lower prices were registered.

On the butter market the day started out at the previous days level of 22 cents per pound for carlots of number 1 eastern townships pasteurized but in the afternoon prices were shaded by some dealers to 21 3-4 cents while others held at 22 or a shade higher. Some western butter was arriving. Receipts were 3705 boxes.

On the cheese market the nominate asking price was 12 3-4 cents for Ontario's and 12 1-4 cents for Quebec's, with some sales 1.8 to 1.4 cents per pound less. Receipts were 5967 boxes.

On the egg market prices to retailers were reported as being slightly lower, the quotations being as follows: The first figure being for cartons and the second loose, per dozen: Special 34, 32; fresh extras 31, 32, 30. Fresh firsts 27, 28, 25, 26; fresh seconds 24, 25, 22, 23. Carlot levels for eggs were quoted unchanged at 27 to 28 cents for extras, 22 to 23 cents for firsts and 20 to 21 cents for seconds with British Columbias one cent higher. Receipts were 2,000.

SUGGEST TAX FOR BACHELOR GIRLS

AMHERST, N. S., Aug. 21—A tax on bachelor girls earning over \$500 per year in the town of Amherst was suggested recently by Mayor Rogers at a meeting of the town council. Mayor Rogers urged that the unmarried women in the town earning their own living were on the same plane as young men and should certainly pay a poll tax. Other councillors were in accord, and it was decided that Mayor Rogers and Town Clerk R. D. Crawford, as delegates to the annual meeting of the Nova Scotia municipalities, refer the issue to the attention of this body.

ITALY PLANS DRIVE TO INCREASE RADIOS

MILAN, Italy, Aug. 21. (U.P.)—The Thrid National Radio Fair will be held here eight days, beginning Oct. 10.

Radio has made great strides in Italy in the past two years. New broadcasting stations have been opened in the principal cities and programs are becoming increasingly interesting.

The Association of Italian Radio Technicians is planning a great drive during the Fair to make Italians more "radio minded." The percentage of Italian families who own receiving sets is quite small.

A secret passage has been discovered under a golf house in Hertfordshire. Made by the club bore?

Air Rockets

NEW YORK PROFESSOR PICKS DESERT SITE FOR NEW EXPERIMENTS

TRIPOLI, Aug. 20 (U.P.)—Professor Darwin O. Lyon, of New York, who arrived here recently to examine the Libyan desert in an effort to find a suitable site for his next experiment of launching a rocket projectile into the upper atmosphere, explained his preference for experimenting here.

"I have chosen Misda because the atmosphere is particularly clear, and in the midst of the desert there is a convenient hill, on which I can place my apparatus for firing off the rocket."

Professor Lyon said that the object of his experiments was to obtain scientific data about the upper strata of the atmosphere.

"So far researches have been made with aerostats, airplanes and balloons, but the highest altitude reached is only about 36,000 meters."

Built Six Projectiles

The scientist stated that so far he had constructed six rocket projectiles, working with a succession of explosives in attached chambers. Of these rockets, three exploded at the moment of launching them, one partly exploded in the laboratory, and another was destroyed by the carelessness of a mechanic.

In 1929 one rocket reached an altitude of 9,500 meters.

The Professor said that stories regarding his intention to shoot a rocket at the moon were purely fantastic.

"My researches are directed toward an exploration of the upper atmosphere and nothing else."

Explaining the working of the rocket, which is about nine feet long and weighs over 300 pounds, he said: "I have been able to develop a system of continuous rapid explosions, which, following each other quickly, impart to the projectile an acceleration of 30 meters a second. This is the maximum acceleration it is possible to obtain without damaging the registering apparatus enclosed in the head of the apparatus."

Professor Lyon's rocket is divided into three sections, which are propelled by explosives at intervals. The registering apparatus is contained in the head of the projectile which is the last to be propelled into space with explosives. Birds and mice will also be shot into space. A parachute is to be attached to this section of the projectile to bring it back to earth.

If all goes well, and according to his calculations, Professor Lyon hopes that his rocket projectile will reach an altitude of about 70 kilometers. Even if it reaches a lower altitude, and the registering apparatus returns safely to earth, the data obtained should be of the greatest scientific interest.
