

THE KING'S COUNTY GUARDIAN

Offices in Montague, Capt. W. A. Johnstone, Agent, and in Souris, A. J. McDonald, Agent.

The latest news, first of all.

SUNLIGHT SOAP

Do you know the difference between working and having the work done for you?

Sunlight Soap actually makes the dirt drop out—saves you time and money—but injures neither hands nor clothes. That is just the difference between Sunlight Soap and ordinary soaps.

Follow Directions

Since 1847

Since 1847 the mark of the world's best silver plate has been

1847 ROGERS BROS.

This name on knives, forks, etc., is a guide in buying and an assurance of worth.

Best tea sets, dishes, walters, etc., are stamped MERIDEN BRITA CO. Made by leading makers.

ANNOUNCEMENTS

Hundreds of shrewd house keepers have taken advantage of our clearance sale of carpets, etc., still greater crowds should be here for the closing days, because greater values await their choice.

They are now on their way, on board the Empress (C. P. R.) on their three thousand mile journey.

Perhaps you would like one for your friend in the Old Land. They are something new, novel and purely an American idea.

People in the Old Land like American ideas, especially when they come from a Canadian port.

Leave us your friend's address today, with four cents extra for postage, and we will do it up in a pretty box with a holiday air about it.

We have others in cream and colors, not "Bradley," which looks just as good and feel just as comfortable, at 39c and 55c.

JAS PATON & CO. 11-164th.

Oysters. Oysters, by the half shell or glass, at A. J. McDonald & Co's, Souris. 11-16dlw.

The branch office of the Charlottetown Guardian will be found in the store of A. J. McDonald & Co, Souris. A. J. McDonald is the agent. 6-30drft.

Advertisers in Souris and vicinity should phone or call on A. J. McDonald, The Guardian agent, as he has something good to offer. 11-4drft.

TRADES UNIONS

OPPOSE SALOONS. TORONTO, Nov 15—Four thousand men gathered in Massey Hall at the temperance meeting addressed by such prominent labor men as John Mitchell, vice-president of the A. F. of L.; Tom L. Lewis, president of the United Mine Workers; J. B. Lennon, treasurer A. F. of L.; Rev. Chas. T. Stelzle, and James Simpson. All of them gave testimony that the saloon was the worst enemy the trades union movement has to contend against.

Rev Mr Stelzle said his father was a brewer, his brother saloonkeeper, but he would be glad if he could put the liquor traffic out of business. The time has come when the saloon and the labor movement must be divorced. The day was fast coming when every labor leader would have to be a total abstainer.

John Mitchell gave it as his opinion, that higher wages and shorter hours would temperance movement grow, portion as the labor movement grew so would the temperance movement grow.

J. B. Lennon said he would fight the traffic as long as there was a saloon left. To the trades unionist there was no redeeming feature in the saloon.

Tom Lewis did not believe that the saloon was a necessary evil. Nothing but spread of education could entirely eliminate it. Trades unions were doing more for temperance than any other institution in the world.

CASTORIA

HORSE SHOING

HORSE SHOING, all kinds while you wait at J. A. Henderson's. 8-2drf.

FOOTBALL CLAIMS

WASHINGTON, November 15—Football has claimed another victim in Archie Christian, the fifteen-year-old halfback of the University of Virginia team, whose injury in the game with Georgetown University Saturday was followed by death at Georgetown University hospital yesterday morning. The body was taken to Richmond today for burial. An autopsy disclosed that death was due to cerebral hemorrhage following concussion.

Profoundly stirred by the fatality, the District of Columbia coroner has sworn a special jury of prominent citizens, whose duty it will be to suggest if possible some modification of the rough features of the game and to look into the question of alleged police brutality and indifference after the accident.

ANOTHER VICTIM

WASHINGTON, November 15—Football has claimed another victim in Archie Christian, the fifteen-year-old halfback of the University of Virginia team, whose injury in the game with Georgetown University Saturday was followed by death at Georgetown University hospital yesterday morning.

AUTUMN SONG

The leaves fall, Shifting, drifting shifting, A sad thrill In their rustling undertone; The winds call, And no rifting mists are lifting, While reaped are all Of the vernal harvests sown— And yet, yet, Under the frosts that sunder— The chill net, And the bonns that clasp and cling, The violet Will wake with its fragrant wonder At the kindling cry of spring! —Clinton Scollard in 'Pippinette's'.

TO CURE A COLD IN ONE DAY.

Take LAXATIVE BROMO Quinine Tablets. Druggists refund money if it fails to cure. E. W. BROWNE'S signature is on each box. 25c.

THE MORNING PAPER

Some Reasons Why it Makes the Best Advertising Medium. A woman's curiosity to know about society, marriages, births, deaths, forces her to read it.

The Morning Paper is before her all day long, and it is she who is doing her household duties, arranging and improving the appearance of her home, that the missing and necessary articles of furniture, rugs, carpets, curtains or other necessities, show up the plainest, and there could be no more opportune time for a dealer to tell about the new goods, the new styles and the bargains offered, for the day or week.

In a majority of homes the newspaper is practically the bulk of the reading matter, and the long, all-day life from 5 a. m. to 10 p. m. of The Morning Paper gives not only the housewife but every member of the family an opportunity to read it.

The Morning paper is read at the breakfast table, again at home at noon, on the trains, in the restaurants. It is read in doctors' offices, professional offices, clubs, hotels, cafes, barber shops. It is read by daylight everywhere you go by both employer and employee.

It is a known fact that throughout the world, possibly with a half-dozen exceptions, the papers with editorial influence and national reputation are morning papers.

With these facts in mind, the business man who is looking after the real money-spenders of the family to interest in his goods will consult his best interests by placing his announcements where the women will read them.

The concert on Friday afternoon is given alternately by the first five and last three grades. Its purpose is to foster the social life of the school, while the play life is fostered by football and other games for the boys, and basket-ball, etc. for the girls.

The teaching of music and physical culture in the grades is a part of the scheme.

A special course for Farmers' Sons, to begin Nov. 29th, is now being planned. The Two Years' Course at the Agricultural College will be adapted to meet the requirements. It will include:—English.—A study of the principles of correct writing; writing themes and business letters; public speaking; reading from authors.

Arithmetic.—General review; measurements of land surfaces, wood, etc.

Agricultural Botany.—Study of weeds and their eradication; low plants feed; germination experiments; plant diseases.

Horticulture.—Fruit growing, vegetable gardening, floriculture and improvement of the home grounds; care of the woodlot.

Farm Chemistry.—A study of the simpler elements of importance in agriculture; fertilizers, insecticides and fungicides; composition, digestibility, nutritive ratio, and manurial value of feeding stuffs.

Physics.—Principle of crowbar, shovel and other farm tools and appliances; origin and kinds of soil, effects of natural agents, tillage and drainage, water supply; road-making; introduction to electricity; records of the weather.

Training will partake of the nature of Farm Carpentry. Students may order material and make objects at their own expense.

A Farm Library, including agricultural papers, books and bulletins, is available for the use of the students. Admission fee, fifty cents a month for all residing in the Consolidated District; one dollar for all others.

For further information, address The Principal, Consolidated School, Hillsboro.

ANNOUNCEMENTS

The Cavendish Literary Society will hold its annual meeting in the Cavendish Hall, Friday, Nov 19th at 7:30 p. m. A full attendance is requested as there is considerable business to come before this meeting. 11-18drll.

M. ROSS,

Custom Tailor, 11-16dr7rlf, 116 Great Geo Street.

Pure Gold Extracts advertisement featuring an image of a bottle and text describing the product's benefits for various ailments.

THE MACDONALD CONSOLIDATED SCHOOL

The Macdonald Consolidated School at Hillsboro has an enrollment of 101 pupils for September and October with a percentage of attendance of 70.

The small attendance is due to the fact that whooping cough and colds were fairly common in the district. Potato digging was also delayed by the bad weather thus keeping the pupils at home for a longer time than usual.

Fourteen pupils are coming in from outside districts, seven of whom are taking advanced work. There is still room for more. Tuition, 50c per month. They drive, come by train, or board with neighboring farmers.

This school stands for Nature Study, Gardening, Manual Training and Household Science besides the regular grade work. A glance at the timetable of the advanced room from which the pupils matriculate into Prince of Wales College may be of interest:

Table with 4 columns: Time, Subject, and other details for the school schedule.

Canadian History will be put on after Christmas and a course will be given in Floriculture and Improvement of the Home Grounds. Agriculture and Botany are illustrated and supplemented by Nature Lessons from garden and surroundings.

"Nature Study and Elementary Agriculture" by Brittain, Professor of Nature Study at Macdonald College, is one of the texts used as a guide in this work.

The concert on Friday afternoon is given alternately by the first five and last three grades. Its purpose is to foster the social life of the school, while the play life is fostered by football and other games for the boys, and basket-ball, etc. for the girls.

Lived for two Years as an Indian

The Strange Quest of a College Graduate and Its Remarkable Result

Nearly a century ago, Josiah Morse, the son of well-to-do parents, had just completed the most thorough medical education which the colleges of that time offered, and was casting about for a favorable place in which to start practice. His father, himself a physician of the old school, convinced that his son had thoroughly mastered the theory of medicine, advised that before setting down he try to gain more practical knowledge of the science.

Rumors were afloat at the time that certain Indian tribes had discovered a remarkably successful method of treating the more common forms of illness with certain herbs and roots. The elder Morse suggested that his son endeavor to find out from the Indians the secret of this cure.

The idea appealed strongly both to young Morse's imagination and to his sober judgment, and he set out eagerly on the quest. Practically abandoning civilization, he made his home among the Indians for two or three years. He learned their language, entered heartily into their sports, hunted, fished and ate with them. He listened attentively to their old men recounting the history and legends of their tribes, and finally won their confidence and goodwill.

When the Indians had come to look upon him as their white brother, they revealed their secret methods of compounding the wonderful remedy. He learned what roots and herbs they used, when and where they gathered them, and how they made them into the specific which cured most of their ailments.

Bringing with him a supply of the roots and herbs, Dr. Morse returned to civilization and started practice, using the Indian remedy with great success for many common ailments, such as biliousness, constipation, dyspepsia, liver and kidney trouble and rheumatism. For convenience he changed it from the liquid form to pills.

Comstock purchased the formula from Dr. Morse when he retired from practice, and in 1857 W. H. Comstock became sole owner. Up to this time the pills were only known locally, but Mr. Comstock, thoroughly convinced of their great value, believed that they were worth introducing to the whole world, and determined that he would do it, as far as he could.

He began in a very modest way, establishing small laboratories in Brockville, Ont., and across the St. Lawrence, on the American side in Morristown, where he compounded and sold the pills which he named "Dr. Morse's Indian Root Pills."

Then, with a horse and wagon, he travelled through Upper and Lower

Canada, from Sarnia to Montreal, and through the Maritime Provinces, placing the Pills not only in the city and town drug stores, but with every cross-roads dealer.

The same W. H. Comstock is now the active head of an organization that covers the globe. In the half century since he made Dr. Morse's Indian Root Pills himself, he has succeeded in introducing them into practically every likely and unlikely corner of the world. Millions of boxes are sent out every year from the laboratories at Brockville, Canada, Morris, certain U. S. cities, Australia, and Wellington, New Zealand, and the demand is steadily growing.

Medical science has made enormous strides since Dr. Morse returned from the Indian forests with the secret of their remedy, but has not yet been able to make any improvement in his formula. From time to time experts in materia medica have studied the formula with the greatest care, but have been forced to admit that nothing better can be devised for its purpose.

Almost alone among the makers of proprietary remedies, Mr. Comstock has every process in the preparation of Dr. Morse's Indian Root Pills carried out in his own laboratories. The roots and herbs are bought in the crude state and ground, then certain U. S. cities, Australia, and Wellington, New Zealand, and the demand is steadily growing.
