JAVA--Where Our Side Battles to Turn Tide

BRITISH Gen. Sir Archibald Percival Wavell, 58, commander of United Nations forces in Far East, looks with apprehension toward Java.

HIGH ON A PLATEAU in the mountains of Java is Bandoeng, truly the citadel of the East Indies. Here is the hub of allied military action in the Dutch islands-air bases, military encampments, guns, oil, ammunition, food, supplies for a long siege. If Batavia, and even the Soerabaja naval base, should fall, the fight would still be far from over on Java. In the equatorial hills that cover that island's southern section, Dutch, American and Australian forces may yet make a defiant stand like that of MacArthur on Bataan.

THIS IS HOW war swept through the Indies until Java was ringed by Japs. Enemy's strategy was to thrust forward a few hundred miles, establish air and sea bases, then attack points farther on within range of these new bases. Cost was great to the invaders, in men and ships; it was also high for the defenders, in land lost and in oil properties destroyed.

Finance

NEW YORK, Feb. 27-(AP)-A slightly more optimistic war picture aided selected stocks to retrieve a modest portion of recently lost ground in today's market. Canadian stocks were uneven. DUTCH PUT THE TORCH to the oil of the Indies when Japs invaded. Great blazes and blast long prepared for with installations of explosives, swept through the forests of derricks, pumps, storage tanks and refineries even as the enemy parachuted out of the sky or landed on nearby beaches. First to go was the oil of Sarawak, destroyed by the British; then followed Tarakan, Balikpapan and Palembang, as the Dutch scorched earth with the hottest of fires.

Ten Million Trees

(Vancouver Province) British Columbia is to plant 10,000,000 young trees on its logged-off lands this year. That, it is estimated, is the full schedule planned by the forest branch and will take all the seedlings available in the Green Timber and Campbell River nurseries. Ten million trees will require a lot of handling and will replant ten to fifteen thousand acres of logged-off land. Preparing the land and planting will involve a lot of work and expense will not be light. However, if British Columbia expects to keep in being the forests which provide the material for the province's premier industry, there is nothing for it but to undertake the work and spend the money. We should have embarked upon a planned program of reforestation years ago and we should be doing much more now than we are doing. The ten to fifteen thousand acres we shall replant this year do not amount to half the normal cut of timber in this province and in these war years we have been cutting twice as much as in average years. We should, of course be able to count upon some natural regeneration, which is much cheaper than reforestation. Natural regeneration, however, involves the taking of time to make such regeneration possible. In the past we neglected to take the necessary steps and so have vast denuded areas which are not being replanted at all. Some assurance from the Government that natural regeneration is a vital part of the forest program, now, would be welcomed by the people of the province.

MAGELLAN'S DISCOVERY

Magellan discovered the Philippine Islands in 1521. He also discovered Guam. Would you like to read your past and future in your hands. It's easy. Run the fingers of your right hand lightly over the back of your left hand. Does the skin feel rough and chapped? That means you've been exposing your hands to wind or cold-dipping them in hard or cold water-using harsh cleansers or soap-or perhaps simply living in a steam-heated apartment. All these things-wind, cold, hard and cold water, harsh cleansers and soaps, steam heat-rob your hands of natural, softening moisture. But don't worry - right now the future looks particularly bright. For you can replace this natural, softening moisture by applying a smooth, quick-vanishing hand cream made specifically for the purpose. Keep your hands smooth, white, young-looking by applying hand cream after washing or exposure. A few minutes' care every day will make the busiest hands look pampered!

DUTCH Vice Admiral Conrad, Emil Lambert Helfrich, 55, commands united naval forces at Java, believes "the best defense is offense."

ESCAPED HONG KONG

FREDERICKTON, Feb. 24-(CP)-Relatives here received word today from Mrs. Lindsay T. Ride, formerly of Frederickton, that she and her four children had arrived in Australia after escaping from Hong Kong. Mrs. Ride said her husband, Dr. Ride, also had escaped from Hong Kong and was a patient in a Chinese hospital at Chungking. Dr. Ride, an Australian, lived here for a time after his marriage. His wife was formerly Mary Fenely Frederickton.
