HACKING COUGHS

are often more dangerous than hard coughs. Dangerous because they appear trifling and are hence neglected; more dangerous because they often mark the approach of serious lung or bronchial trouble. Any cough is a menace to health and you will find that hacking coughs are hardest to cure.

Our White Pine and Tar

cures hacking and all other coughs because it goes to the very source of trouble. You must give the remedy time if you have a slight cough of long standing, but you can feel confident of a cure if you use it faithfully. Price 25 cents large bottle.

SATURDAY, APRIL 29, 1911.

NEGRO IMMIGRATION TO CANADA.

The negro population of Canada is not large—recently stated to be only about 17,000. But circumstances have recently arisen which give rise to the belief that a large influx of negroes from the United States may take place if not checked, the most part of them going to the Northwest Provinces. Strong objection has been raised at various points in the prairie country to the coming of people of the negro race in large numbers into Canada. Some of them are induced to come by the prospect of free homesteads of valuable land, or because they are subjected to certain restrictions, social and civil in the United States.

These people are, however, citizens of the United States, and as such would seem to be entitled to enter Canada and settle down as other people do, if possessed of the qualifications of sound health and a certain amount of money or property in their possession, as is required of all immigrants coming to this country. At present Canada does not discriminate against any race except the Chinese who are required to pay a heavy head tax. Japanese laborers not possessed of $200 each are also kept out by a tacit agreement under which Japan undertakes to prevent the emigration of this class of her subjects to Canada.

It will be seen from this that although apparently a good deal of pressure is being brought to bear upon the Government of Canada to exclude the negroes, the matter is one of some difficulty and delicacy, owing to their American citizenship. It is claimed, however, that existing Canadian laws give the necessary powers to the Government to meet the case. The Canadian Immigration Act, Section 38 is thought to embody this power and also to justify its exercise.

Section 38 provides that the Governor-in-Council may, by proclamation or order, whenever he deems it necessary or expedient, "prohibit for a stated period, or permanently, the landing in Canada, or the landing at any specified port in Canada, of immigrants belonging to any race deemed unsuited to the climate or requirements of Canada, or of immigrants of any specified class, occupation or character." Our northern climate and cold winters are undoubtedly unsuited to the negro race, whose original home was in tropical Africa, and in any case it is not probable that any very large numbers of people of African blood will ever seek to become permanent citizens of the Dominion. The rigor of the Canadian winters has thus saved Canada from having a negro problem to deal with in the past and is likely to have the same effect in the future.

CANADIAN CROPS HAVE TURNED OUT WELL.

The serious drought which prevailed in the Northwest last year not only greatly diminished the yield of grain, but it was feared had rendered an unusual percentage of it unmerchantable. Happily this fear has not been realized. A recent bulletin from the Census and Statistics Office at Ottawa gives the following reassuring statements:

Out of a yield of 149,989,600 bushels wheat harvested last year 141,096,000 bushels or 94 per cent. were merchantable, and at the end of March 33,042,000 bushels or 22 per cent. of the whole were yet in farmers' hands. The quantity held by farmers in the Maritime Provinces at that date was 468,000 bushels, in Quebec 477,000 bushels, in Ontario 5,002,000 bushels, and in Manitoba, Saskatchewan and Alberta 27,095,000 bushels. At the same date last year the quantity in hand in all Canada was 30,484,000 bushels or 18.28 per cent of the total crop of 166,744,000 bushels, of which 159,868,000 bushels or 95.87 per cent. was of merchantable quality.

Oats, which last year gave a yield of 323,449,000 bushels, was merchantable to the extent of 301,773,000 bushels or 93.29 per cent., and the quantity in hand at the end of March was 127,587,000 bushels or 39.44 per cent. In the Maritime Provinces there was in hand at that date 6,585,000 bushels, in Quebec 17,447,000 bushels, in Ontario 50,742,000 bushels, and in the Northwest Provinces exclusive of British Columbia 52,413,000 bushels. In the preceding year the quantity in hand out of a harvest of 353,466,000 bushels was 141,499,000 bushels or 40.03 per cent; and there was a total of 321,190,000 bushels or 90.86 per cent. of merchantable oats.

The barley yield of 1910 was 45,147,000 bushels, and of this quantity there was in hand at the end of March 13,135,000 bushels or 29 per cent. The merchantable yield was 41,505,000 bushels or 91.93 per cent. The barley crop of 1909 was 55,398,000 bushels and the quantity on hand at the end of March last year was 16,517,000 bushels or 29.81 per cent. The merchantable quantity of that crop was 51,499,000 bushels or 92.87 per cent. Ontario's crop last year was 20,727,000 bushels, and that of the three Northwest Provinces 21,377,000 bushels.

Closely related in its bearing upon the welfare of farming in Canada, to the report on the last year's grain crop is an added paragraph on the general condition of farm live stock as compared with the previous year, showing that it has come through the winter in all the Provinces in good condition. The following is the report in that regard:

The per cent. condition of live stock on the farms ranges close to the same figures for both years, but is a little higher for all classes this year. For the respective years 1911 and 1910 horses are 95.37 to 93.98, milch cows 93.29 to 91.42, other cattle 90.87 to 89.30, sheep 93.77 to 92.43, and swine 94.36 to 92.77. These proportions are closely maintained throughout all the Provinces; they denote the condition of live stock as regards a healthy and thrifty state.

THE DUKE OF CONNAUGHT.

The English papers announce that the Duke of Connaught will come to Canada before many months and will not await the return of the King and Queen from the Indian Durbar, as was understood a while ago would be the case. What was expected was that the Duke would be appointed Regent during the absence of Their Majesties on their tour to the Indian coronation. Now it is stated that the law officers of the Crown have decided that the King's absence will not be of sufficient length to require the appointment of a Regent.

The announced coming of the Duke of Connaught to assume his vice-regal duties at Ottawa has revived interest in political and social circles in that prospective event. His higher rank than any of his predecessors at the head of the Dominion, and especially his membership in the Royal Family and his close relation to the King and the late King Edward must give a certain additional prestige to the high office of Governor General and in the eyes of the aristocratic world to the Dominion itself. His grace will, however, find that the bone and sinew of this country, the popular masses, are really at heart entirely democratic.

We do not think that this fact will occasion any inconvenience to our future Governor General, or lead to any abatement of the cordial relations which have usually existed between our appointed Governors from over the sea and the people of Canada. He comes of a stock which has been revered and beloved in Canada for generations past, and has been thoroughly trained to the duties of a high official position and will no doubt as faithfuily and discreetly perform his functions under the Canadian constitution as any and all of his predecessors at Ottawa have done.

The Duke will be greeted with loyal enthusiasm when he comes, but not unmixed with some interested curiosity as to whether or not a court will be established at Rideau Hall, a little more formal and exclusive than has hitherto existed there. It is only in that regard, on the social side, so to speak, that any uncertainty or doubt exists as to the complete success of his official term at Ottawa. And in that regard he will be well advised by his Privy Council, made up as it is largely of men who have sprung from the ranks and have gained their present positions by ability, character and popular favor.

We can prove it. Suits from $5.00 up. $1.00 to $22.00. 300 suits to choose from. Give us a call.

PATONS

Last evening word came from Ottawa and spread about town to the effect that H. J. Palmer, K. C., had been agreed upon by the Government for appointment to the vacant Supreme Court Judgeship. Enquiry by telephone at Mr. Palmer's residence at a late hour brought the reply that he had not heard of it, but the report is credited among persons usually well informed although somewhat in the nature of a surprise.

The number of fire alarms within the city and in various parts of this and other Provinces lately, calls for a warning note. A few warm clear days has dried the leaves and the accumulated litter, in the bushes and about houses and barns and in this combustible material a lighted match thrown away, or the contents of a lighted pipe, cigar or cigarette thrown carelessly may speedily start a blaze which will prove disastrous. Another cause of destructive fires is the careless burning of rubbish, the cinders from which may be blown by the winds and catch in an unexpected place. Fire is proverbially a good servant but a hard master, and too much care cannot be taken to guard it safely.

Dominion Organs are Canada's Best

Dominion organs have long held first place in popular favor. For true merit and real worth they are the best that Canada can produce. Dominion organs have won over sixty first prizes in National and International exhibitions. The Dominion reed organs are the nearest approach to the best pipe organs the world has ever heard.

Dominion organs have no false stops, the notes are round, full, sweet and harmonious; the case, a picture of beauty, and chaste refinement, is finished in expensive hand and machine work, and is hand rubbed and polished. The power, volume, variety and brilliancy of tone is wonderful.
