

RAINBOW FLOUR

Milled by the careful Tillson process from the best Manitoba wheat, it is rich in nutriment.

Milled by the Tillsons at Tillsonburg.

FARM HINTS FOR PROVINCIALISTS

The grit hopper and a dust box are essential features of a properly-appointed henhouse. In lieu of purchased grit, broken chinaware powdered up to the size of wheat grains answers well, and it is quite safe. Even powdered glass has been eaten by chickens apparently without unfavorable results. It is not so sure, though, but that injury might ensue.

George Pope, Daily Avenue - Ottawa at once proceeded with J. M. Clark This is an era of inexpensive poultry houses. Expensive ones are not only unnecessary, but undesirable. A cheap portable colony house, that can be hauled out over the fields in summer and drawn up to the building in winter is the ideal for a farmer's use. A poultry house should not be large, for large ones are drafty and uncomfortable. It should be light, dry, well ventilated, and only moderately warm. A dry air at zero temperature will harm no healthy fowl of the American class. Keep the poultry house floor littered with chaff, leaves or any other material that will compel the birds to scratch for grain food. Change this litter often enough to keep it reasonably dry and clean. Poultry should not be obliged to scratch day after day through damp dirt soiled by their own droppings.

Among the addresses at the recent Tuberculosis Congress in Washington, D. C., says Wallace's Farmer, was one by Professor Weizel, of the University of Washington, on the effects of direct and diffused light on germs generally and on tuberculosis in particular.

The shortest time in which the germ of tuberculosis was killed by diffused light, that is, light that has come in through some medium that absorbs it, was twenty-four hours. The problem is said to be a complex one, but it appears that diffused light materially shortens the life of the tubercle bacillus. All of which shows the importance of putting plenty of windows in the dairy barn and putting them as high up as possible, so as to throw the light the far as possible. The direct sunlight has been found to kill the tubercle bacillus in as short a period as from two to ten minutes.

Not nearly enough land is cultivated after the summer crops are taken off. Most farmers feel that the work involved is too great or that they have not enough time to attend to this important matter. It would pay well, however, to employ extra help, if necessary, to attend to this important work.

The land can be sown either with early turnips or with rape. Rape makes an excellent food for finishing lambs or hogs in the autumn. One of the greatest advantages that follows the growing of these crops, lies in the fact that the summer cultivation kills the weeds and puts the soil in much better condition for the crop that is to follow.

A striking illustration of the benefit of this summer cultivation has been made on the McDonald college farm in Quebec. Two fields, each containing 37 acres, were seeded during the spring of 1908. One that had been cultivated during the summer of 1907 produced an excellent growth of grasses and clovers. Much of the clover, dry as the weather has been, was in bloom in October. The growth in the other field, that had not been cultivated during the summer of 1907, was weak and spindly.

Care must be taken, when weaning the colts, to see that they are well accustomed to eating grain, and to give a light feed of grain daily after taking away from the dam. When the expense of raising a horse is incurred, the more it brings in the market, the greater will be the profit.

The colt may be used a little in harness at from two to three years old and gradually educated for whatever purpose he is best adapted.

Canadian newspapers have largely republished a statement that Mr. Gompere, an entomologist in the employ of the Government of Western Australia, had discovered parasites that destroyed the fruit flies and other insects so destructive to fruit culture, writes J. S. Larke, Canadian Trade Commissioner in Australia. It was further intimated that these parasites would ensure clean orchards. Mr. Froggat, an entomologist in the employ of the Government of New South Wales, has just returned from a tour round the world for the purpose of investigating the possibility of securing such valuable parasites. He reports that while there are parasites that to a certain extent are destructive to fruit pests, yet they cannot be depended upon to preserve the orchards. He found in India, in the very district whence Mr. Gompere secured his friendly insects, that the orchards were worse infested than even those of Australia. His conclusion is that nothing is yet known that will ensure good fruit but spraying, fumigation and the maintenance of clean orchards.

DELICATE CHILDREN MADE WELL AND STRONG

The little ones are frail. Their hold upon life is slight. At the very first symptoms of trouble Baby's Own Tablets should be given. This medicine cures colic, sour stomach, indigestion, diarrhoea, constipation, teething troubles and other minor ailments. It is equally good for the new born babe as the well grown child. Mothers have the guarantee of a government analyst that this medicine contains no opiate or poisonous soothing stuff. Mrs. Gressman, New Hamburg, Ont., says: "I have used Baby's Own Tablets for stomach trouble and constipation with marked success. I feel that my little ones are safe when I have a box of Tablets in the house." Sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

PADDY ROYAL. Eastern Canada's foremost runner. He is an Irishman not long over from the old Country and won the Thanksgiving race of the Montreal Herald, lowering the record by over one minute.

Mother Gave Her Child Away.

Had Given up all Hope of Living. Heart Trouble was Cured by Milburn's Heart and Nerve Pills.

Mrs. Andrew Savoy, Grattan's, N.B., writes: "In the year 1905 I was taken sick and did not think I could live any length of time. My trouble was with my heart and people told me that nothing could be done for a case like mine. I consulted the very best doctors but they could do me no good. For seven weeks I could hardly cross the floor. I had no pain, but was so weak nobody in the world could believe how I felt. I had given up all hopes of living and had given my little girl to my sister-in-law.

"One day a friend came to see me, and calling me by name, said, 'Lizzie, if I were you I would try a dose of Milburn's Heart and Nerve Pills as they are good for heart trouble.' My husband got me a box, but on the fourth day my husband said, 'I believe those pills are doing you good.' I was able to say, 'Yes, I feel a good deal better this morning.' He said, 'Well, I will get you another box right away.' I took two boxes and three doses out of the third one, and I was perfectly well and have not been sick since then. "I will never be without them in my home for God knows if it had not been for Milburn's Heart and Nerve Pills, I would not have been alive now." Price 50 cents per box, 3 boxes for \$1.25, at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

Annual Meeting

The Annual Meeting and Winter Fruit Show of the Fruit Growers' Association of P. E. I., will be held in the Prince of Wales College on Tuesday and Wednesday, December 8th and 9th, 1908. The first session will open on Tuesday, December 8th at 2 o'clock p. m. In addition to the regular premium list a number of special prizes are offered for fruit in packages. Send for price list. Everybody welcome. Reduced rates by rail to persons attending the meetings. A. E. Dewar, Secretary. Charlottetown, Nov. 12th, 1908. 11-14dwsrws3w.

The Mutual Life OF CANADA

—The Company that Grows

The strength of a bank is tested by its ability to successfully weather financial storms. The strength of a Life Insurance Company is tested by its ability to grow in "hard times." Last year, The Mutual Life of Canada wrote MORE new business than in any other one year in the history of the company. The total insurance in force at the end of 1907 was \$51,091,848.00—a gain over 1906 of \$4,179,440.00. "Canada's Big Mutual" grows bigger every year. HEAD OFFICE - WATERLOO, Ont. 104 J. O. ARSENAULT, Mgr. for P.E.I., Charlottetown.

Alterations Made with Ease and Accuracy

One of the great advantages of Fit-Reform is the fact that every Suit and Overcoat is ready to try on. Fit-Reform garments are so constructed that if alterations should be necessary, they can be made quickly and exactly. Thus Fit-Reform assures an absolutely perfect fit to every man. And you have the Fit-Reform guarantee of "money back if satisfaction be not given".
