

THE VAST MAJORITY DEMANDS GILLETTE

SHAVES the face of the world

MORE than a hundred million men of every nationality and every walk of life meet on common ground when they buy razor blades. In England, Sweden, Germany—in one country after another famous for the manufacture of fine razor steel—the Gillette blade is the first choice of the vast majority. Such universal preference is conclusive proof that it gives users everywhere unsurpassed shaving satisfaction.

When you put a new Gillette blade in your razor you get a shave free from harshness and irritation—a shave that's smooth and easy on

your face. Scientists and expert engineers—far more critical than any user—dedicate their efforts to the constant improvement of this blade. Today's triumph is the starting point of tomorrow's achievement in this great institution where allegiance to the highest manufacturing ideals is made possible by constant scientific research.

Gillette shaves the face of the world—is accepted everywhere as the prime factor in modern shaving comfort. It is natural, therefore, that the majority of men ask for Gillette when they buy razor blades.

FERTILIZERS QUALITY SERVICE

MR. POTATO GROWER can save only about one dollar per acre in the cost of his Fertilizer by buying his Chemicals for delivery after the arrival of steamer in the spring. If he prefers this saving rather than the relief of the gamble of the uncertain arrival of a steamer together with the probable loss in yield through delayed planting then let him book his Chemicals from our supply to arrive by steamer. These will be delivered him in the best condition being milled, screened and bagged in our plant at Charlottetown.

If he wishes to eliminate the gamble of uncertain arrival resulting possibly in reduced yields let him book his requirements at once from our supply now in stock in Charlottetown to be shipped him when he so.

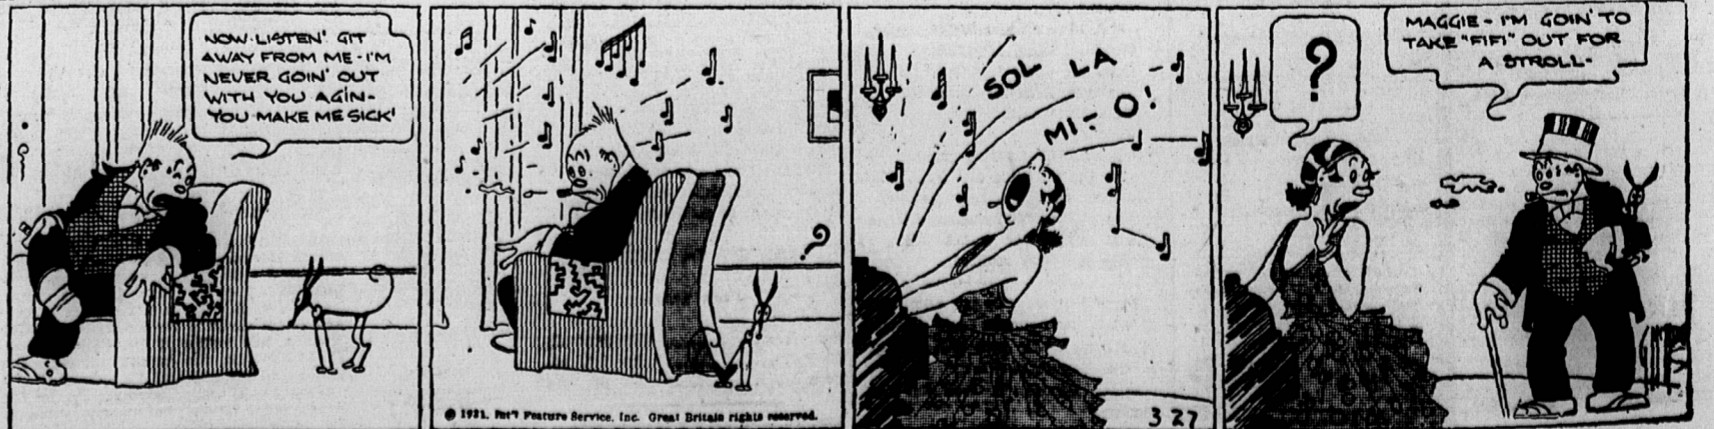

Let him buy his Mixed Fertilizers now. Buy them from us. There is no advantage in delay.
