Suffered Five Years With Palpitation and Pain in the Heart

The testimony on behalf of Milburn's Heart and Nerve Pills given by Mrs. H. L. Menzies, Professional Nurse is well worth considering carefully.

The great number of deaths we read of day by day, which are the result of heart failure, should put everyone on his guard to keep that most vital organ of the body in a perfectly healthy condition.

On the slightest indication of any heart trouble, palpitation, fluttering, skip beats, weakness of the pulse, dizzy or faint spells, numbness of the hands or feet Milburn's Heart and Nerve Pills should be taken.

They have saved many a life and are daily proving themselves the greatest benefactors of mankind.

One after another, grateful for the blessing of life spared and health restored, is coming forward and speaking word for this remedy.

To-day Mr. F. W. Meyers, King St. East, Berlin, Ont., gives a history of his case in the following words:— "Milburn's Heart and Nerve Pills are the best remedy for heart and nerve trouble on the market. I suffered for five years with palpitation, shortness of breath, sleeplessness and pain in the heart, but one box of these pills completely removed all these distressing symptoms. I have not suffered since taking them and now sleep well, and feel strong and vigorous.

Not only do Milburn's Heart and Nerve Pills never fail to cure the diseases with which Mr. Meyers was afflicted, but they build up and strengthen the weak, worn out, run down system and impart vigor and vitality to every organ of the body.

Price 50c a box or 3 for \$1.25, at all druggists. T. Milburn & Co., Toronto Ont.

Mrs Figg—I ought go to that club meeting this afternoon, but I can't get up enough energy to start. Mr. Figg—Would it help you along if I were to tell you not to go?—Indianapolis Journal.

WHEN A MAN AND WOMAN

Are married, romance ceases and history begins. When you get Catarrh and use it your Catarrh, Bronchitis, Asthma or Hay Fever disappears and health begins. Catarrh will cure—absolutely cure—Catarrh. There is no danger or risk in using this pleasant and effective remedy. It cures by the inhalation of medicated air, which is sent by the air you breath to the minutest cells and passages of the lungs and bronchial tubes. It cures because it cannot fail to reach the right spot. You breathe; it does the rest. \$1.00 at all druggists, or direct by mail. Send 10c in stamps for sample outfit to N. C. POLSON & Co., Manuf'g chemists Kingston Ont.

IN WARM WEATHER

It's important that the bowels move freely every day.

Laxa-Liver Pills the best medicine to take.

Constipation is a serious matter at any time, but especially so in summer time. The heat makes the germs of fermentation and decay active, and soon the whole system becomes poisoned.

Most of the fevers, inflammation, pimples, blotches, eruptions, sallow complexion, sick headache and general feeling of malaise, are due to impurities circulating in the system.

People who want to keep healthy during the hot season should see to it that their bowels move regularly once a day. If through error in diet or other causes the bowels do not act naturally, take Laxa-Liver Pills.

They aid nature in removing the effete and waste materials without causing any gripping, weakening or sickening. A trial will convince you of their easy action and efficacy.

When you find they do you good don't forget to recommend them to your friends and neighbors.

The Idol of the Turf.

The Most Popular Jockey in America and England Recommends Stuart's Dyspepsia Tablets.

No jockey has ever appealed so strongly to public favor as Tod Sloan. He has achieved more than his most noted predecessors ever attempted and stands in a class by himself.

Not satisfied with his successes in his native country, he went to England and now his fame as a successful horseman is on the tip of every tongue not only in this country and England but in every section of the globe where racing has found favor.

When Tod first went to England his temerity was openly laughed at, but the little American played skittles with his English rivals and his victories made all England gasp.

Having the stamp of royal approval society both at home and abroad "lionize" him and he is feted and petted to an extent that would turn an ordinary mortal's head.

The great jockey was in such demand socially and dined and wined to such an extent that it was feared his health would give way. Too much society and the nervous strain of racing told on him.

A two weeks' trip to America made him acquainted with Stuart's Dyspepsia Tablets and their remarkably restorative effects on a depleted digestive apparatus and he recommended them in unstated terms to a friend, saying "Stuart's Dyspepsia Tablets are the best thing I know of for keeping the stomach in condition and appetite in good repair."

Thousands of former dyspeptics can vouch for the truth of Tod Sloan's words, as "Stuart's Dyspepsia Tablets" have become a household word in America, and few families are without them. One or two taken after meals keep the stomach sweet by causing prompt and healthy digestion of the food.

Perfectly healthy people use them after heavy dinners to keep their good health and to make sure that no ill effects will follow an unusually hearty meal.

Your druggist will tell you or your doctor either that Stuart's Dyspepsia Tablets are composed only of digestive ferments, Acetoph. Pepsin, Hydrastin, fruit acids, etc., and for the strong stomach as well as the most delicate they constitute a safeguard against indigestion and stomach troubles.

Little Miss Wayupp—Is your bat'er English? Little Miss Highupp—No, but his clothes are.

BLACKSMITH'S STATEMENT.

Mr. M. B. Connick, of Middleton, P. E. I. makes a strong assertion.

Middleton, P. E. I. Oct. 9th.—The strongest point in favor of Dodd's Kidney Pills is that they will cure Bright's Disease; and the next strongest is that there is no other medicine that will.

Mr. M. B. Connick, a blacksmith on Prince Edward Island for this last quarter of a century, found this out. He had tried every medicine but the right one and then learning that Dodd's Kidney Pills were the only cure for Bright's Disease he tried them. Ten boxes cured him.

"I would not be alive and strong today" he wrote recently, "if it were not for Dodd's Kidney Pills. All the country knows my case and there have been hundreds to ask me about it. I tell them the whole thing just as it happened and give the sole credit of my cure to Dodd's Kidney Pills."

THE HOSPITAL INQUIRY

(Continued From the Fourth Page.)

underdone and had the grievance remedied. The porridge was not bad, except on the time complained of. The porridge is boiled by steam and all foreign substances comes to the top. The matron sees to the boiling of the porridge. She found in a saucer four or five particles of impurity. Before the Grand Jury came we had it investigated. He did not think that the miller knew anything about the dirt in the meal. The turnips were on one occasion placed on the table uncooked, but he did not think it happened often, because he often went into the kitchen and saw to it. The statement that the potatoes are not washed is untrue. They are washed in a sink and are as a rule picked potatoes. Some rotten ones will come up. The potatoes brought here are good. The meat is not first-class, because of the price. I have returned bull meat as being not fit for use. The meat afterwards supplied was better and is such that could not be refused, yet it is not first-class meat. The flour at the first of the year was not good. The butter is world ruffly good for tub butter, but we have also refused some butter. There are some patients who are capable of complaining and we investigate the matter. They do not complain at night about the cold, but complain in the day. The heat is kept up until twelve o'clock at night and is put on at five a.m. There is thermometers in the halls. He would modify his views now and would not have steam heat in bedrooms. Some of the patients kick the clothes off but the attendant puts the clothes back every hour. He had no knowledge who wrote letter in the Examiner but the statement about extra food is not correct. It is cases of sickness, extra tea and toast is furnished. Of course if there is a careless attendant there might be suffering, but he had not heard nor does he know of such being the case. The attendants are very careful and report at once. The rule forbids tales being carried. It's the rule of the house that attendants should not talk about people in it. Then about cold rooms, the heater does not work when there is certain winds. Is it not true that the patients kept there all day. There is no doubt they suffer from cold. Some of the patients are kept in cold guarded rooms except for two hours, but he never saw water freeze on the floor and it was never brought to his notice. He had never heard of the patients crying, but had heard them say they were cold. He thought the crying statement was grossly exaggerated. He had known of snow drifting in once and knew of rain blowing in in a great many cases. Men have been tightening the windows. There is no broken glass. He did not know whether patients took cold or not from the draft. The statement that he patients are in wet beds at night is not true. The attendants have instructions to change the latter four times during the night. The statement made by Mary Jane McInnis about the food is not true. The food is better than many get at home. The statement that the meat was fly blown could not be true as it was in April. Her statement was made before she was dismissed. He was in town and was at Mr. Smith's office when he was told that there was a complaint which had been laid with Mr. Smith. She should not have complained anywhere until she complained here. Mr. Farquharson enquired why it was brought there and told one to pay her off. Such cases should be reported to the Medical Attendant Under the late Government we employed our own help. When Mr. Peters came into power he appointed the male help. The bad milk happened and the milkman was notified. Mary Jane McInnis' dismissal was approved of by myself. The story about female patients being left in wet beds is not true.

The attendants are treating them more kindly every day. No bruises are now to be found. The physician should be resident here. Mr. McPhail supported his contention by a case where a woman was taken weak and he telephoned the doctor but what he ordered was not in the house. A non-professional man should not give medicine. Mr. McDonald has considerable experience and we owe much to him. The doctor comes here about 10 o'clock. He stays about four hours. There were 12 deaths in 1898. Consumptive cases are put in a single room. When a patient dies the rooms are fumigated and the bedding burned. He had charged the butcher with delivery of bull meat and that was how it was detected; besides there is a butcher in the house who knows. The meat is supplied in sides or quarters. Sometimes the best meat is cut out, it happened today and it was refused. \$4.65 a hundred is contract price.

To Dr. Conroy—There is no chart kept as in hospitals, showing the physical condition of the patients. He knew of cases of constipation. The water in the rooms is never frozen. He had heard the attendants complain on

rare occasions. The heaters do not work when there is a southerly wind. A new system of heating should be introduced, perhaps the same as in Prince of Wales College. He made application to Mr. Peters some years ago for more guarded rooms, but they were not granted. There are two male patients kept in restraint. There are six box-cots where the patients are locked in. They should be done away with. There are twenty who work at the Stock Farm, ten today and ten to-morrow. One man can guard about fifteen. There are about thirty men in the institution who could go out to work. He thought the Stock Farm should be joined with the Asylum property. Our door work is conducive to the health of the patients. He often wished for trained attendants and something for the patients to do. There are some that knit and some help in the laundry. He thought that we were behind the age in many ways. He thought that many of the patients that are harmless could be taken care of by men unskilled. There are many in the house who have no business here at all. There is one here who has no place to go, and pretends to stay and work. When the present government came into power I made application for more ground, which was granted. We have twelve acres in all. A new boiler was put in about four years ago. We have better heating now. Before it was put in the house was not so well heated. The new boiler was moved over to make room for the placing of another large boiler. If the heaters will work there will be plenty of heat.

Mr. Farquharson asked Mr. McPhail if he was ever refused anything to which Mr. McPhail said he was not and went on to explain that once a month a fire alarm is given. The attendants get the hose out. Fire practice was not nearly so proficient years ago as now. The department is much improved. The trustees have given orders for fire escapes. Which are being constructed. The institution has not suffered from the trustees appointing the attendants. It would be hard to get along with Mary Jane McInnis. I employ the females. When we want a male we consult the trustees. We have plenty of blankets, all we want. The reports were exaggerated. Mr. Farquharson gave medical attendant order to be at hospital for four hours a day. It is better than it was under the late government. The medical Supt. used to spend one hour on an average. There was 97 patients when I came here. I have a few new attendants. I was in hopes that the doctor would take some responsibility. I am not satisfied with the medical attendants time. There should be a doctor on the Board of Trustees.

Gold can be beaten 1,200 times thinner than printing-paper; one ounce will cover 164 square feet; a cubic inch of \$18 per ounce is worth \$210. One pound of 40c Monsoon Indo-Ceylon tea will make 225 cups: this is less than one-fifth of a cent per cup.

"Franklin," said Jefferson as they sat sipping cool drinks in the Patriotic club over the river, "I see the Philadelphiaans have given you a statue?" "So soon as this?" queried the sage in surprise.—Philadelphia North American.

DON'T TEAR DOWN—BUILD UP. The old-fashioned theory of tearing down disease was entirely changed by the advent of Dr. A. W. Chase's Nerve Food, which cures by creating new rich blood and nerve tissue. Through the medium of the circulation and the nervous system they treat and invigorate every organ in the human body.

"Excuse me, professor," said the barbarian, who had been nervously toying with his war paint brush, "but before I got into this argument with you, let me understand one thing. Are you talking about vegetables or bullheads?"

DR. A. W. CHASE'S 25c CATARRH CURE

Is sent direct to the distressed parts by the Improved Blower. Heals the ulcers, clears the passages, stops droppings, soothes throat and permanently cures Catarrh and Hay Fever. Blower free. All dealers, or Dr. A. W. Chase Medicine Co., Toronto and Buffalo.
