Mr Watkis Addresses The Rotary Club

The chief speaker at Rotary yesterday was Mr. F. T. Watkis, organist at St. James' Presbyterian Church, who delivered a most interesting address on the value of music.

In the course of his address Mr. Watkis pointed out just as there are good books, books that are instructive, edifying and ennobling, and books that are pernicious and degrading so there is good and bad in music; music that elevates and broadens the mind that sweetens the soul, so to speak, "leaving a wholesome taste in the mouth," and music that only excites and inflames the imagination, consciously or unconsciously tending to lower the standard of moral life.

Good music trains the young mind and brain into habits of sequential thought, which is another name for logic, concentration of ideas, fertility of imagination. So much for the Science of music. Here we touch not only the mind and intellect but the heart and soul. Music as a vehicle for the emotions is unsurpassable. It is indeed the language of the soul, and being the universal language it appeals to everybody, great or small, cultured or illiterate. It heightens and accentuates joy, it ameliorates pain, it comforts and softens grief, it brings whole communities into closer communion, and carries a message of companionship to the lonely and desolate. As an aid to Divine Worship it is beyond compare.

Mr. Watkis then dwelt on the value of community singing which is being practised in parts of the United States.

In elaborating the thought that the study of music brings one into closer touch with all God's creation, Mr. Watkis said: "We may not be able to express a single musical harmony yet our hearts will thrill to the song of the bluebird in the Spring, or to the call of the bugle when War walks down the land. Just because music is the universal language it has been both an inspiration and the message bearer for all peoples from the time when Pan blew the first note upon his reed pipe to the Cathedral organ of today."

Mr. Watkis dealt with the influence of music on home life, expressing the regret that this beautiful and inspiring custom has fallen into disuse. He also announced the class of music which comes into the homes in the form of a flaring minstrelsy on the one hand, and a vulgar, and in some instances a disgraceful, literature, on the other.

In conclusion Mr. Watkis advocated the establishing in Prince Edward Island of organizations similar to the choral societies of England and Wales, where the study of the music must be the most continuous of the year, and where every County in Wales has its "Eisteddfod" or singing competition for which prizes are given.
