RUSSIA FIGHTS U. N. O. PROBE OF IRAN ISSUE

TERMS OF NEW FOOD CONTRACT ANNOUNCED

Island Senator Comments On Fisheries Plans

OTTAWA, March 26 — (Special) —Senator J.P. McIntyre of Mount Stewart, P.E.I., president of the Prince Edward Island Fisheries Federation was appointed to the resolutions committee of the Fisheries Council of Canada at its first annual meeting here today.

Among the resolutions with which the council is now dealing are prices for fancy and standard chicken haddie, standards of fish containers, and allocation of fish and fish products for the export market. Speaking to the Guardian's correspondent after today's meeting, Senator McIntyre said:

"I am convinced our newly-formed Fisheries Council will bring widespread benefits to the Atlantic fisheries. It maintains close liaison with the Fisheries Department here at Ottawa and brings problems of the industry to the direct attention of Fisheries Minister Bridges, his deputy minister and senior officials.

"Time is of utmost importance in an industry dealing with perishable commodities such as fish. We feel that now we can expect and obtain action from the department more speedily than was the case in the past. I understand also that the department welcomes the co-operation of our council which is manned by officers experienced in all phases of the fishing industry."

At today's meeting, it was recalled that following representations made by Senator McIntyre at the Marine and Fisheries Committee of the Senate last session ceiling prices were lifted on lobster, and smaller containers permitted for lobster paste.

Prince Edward Island members of the Commons and Senate were guests of the Fisheries Council at a dinner this evening at which State Secretary Paul Martin was principal speaker.

Pleased With New Agreement

Farmers of Prince Edward Island will benefit from the new food agreements between Canada and Great Britain announced by Agriculture Minister J.G. Gardiner today, in the opinion of James Lester Douglas, Liberal member for Queen's.

"These agreements are better and go farther than most of us hoped", Mr. Douglas commented. "We didn't think we could get agreements beyond 1947, but most of them are extended to 1948."

Mr. Douglas said that while immediate direct benefits of the agreements were evident chiefly to swine-breeders in the Island, they meant an assured market to farmers all over Canada and P.E.I. would benefit in the same measure as the other provinces.

Discuss War Surplus

At today's session of the War Expenditures and Economies Committee, decision was made to call the heads of the armed services as witnesses, and demand that they turn over their huge stocks of surplus military stores to the War Assets Corporation for sale to the public.

W. Chester S. McLure, Progressive-Conservative member for Queen's moved that a quorum of the committee consist of 10 members so as to expedite the committee's work. The motion was accepted by Gordon B. Isnor, chairman of the committee and carried.

Both Progressive - Conservative and Liberal members of the War Expenditures Committee expressed themselves as determined to weed out waste and needless expenses incurred by the armed services.

ALUMINUM BUNGALOWS

LONDON — (CP) — Six English workmen recently erected an all-electric aluminum bungalow in 75 minutes. Manufactured in a Lancashire factory, the bungalows are intended for United Kingdom families, rather than for export, but overseas territories can acquire the idea potent.

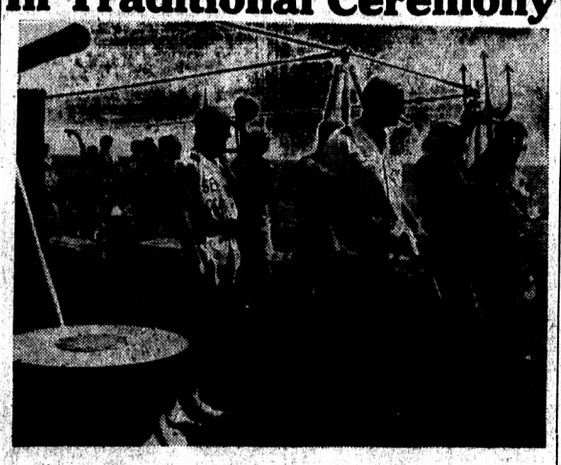
Local Man Takes Part In Traditional Ceremony



Lieut. A. B. Cosh of Charlottetown is shown here as he took part recently in a traditional ceremony while the Canadian cruiser Uganda crossed the line while on her training cruise around South America. The tall Charlottetown officer is in the right foreground of this picture, dressed in the garb of a policeman at the court of Neptunus Rex, mythical ruler of the District of Equatorius.

Well Known Railway Man Died Yesterday

The death occurred yesterday at the Charlottetown Hospital of George J. McCormack in his 64th year. A veteran railway employee, the late Mr. McCormac entered the service of the C.N.R. in Charlottetown 42 years ago, and for the last 28 years was a train despatcher.

A native of Souris and son of the late Mr. and Mrs. James A. McCormac, the late Mr. McCormac was on active service with the railway until about five weeks ago. His wife, who survives him and to whom he was married in 1931, was the former Anna McDonald, daughter of the late Mr. and Mrs. J. B. McDonald, Charlottetown. There are no children. All brothers and sisters predeceased him some years ago.

Drew Comments On Temperance Act

TORONTO, March 26 — (CP) — Although Ontario had indicated it would like to see the Canada temperance act repealed, Premier Drew told the Legislature the Province had "no choice but to co-operate" in enforcement of the act "according to the strict letter of the law."

Tabling an exchange of correspondence with Prime Minister Mackenzie King, he revealed that Mr. King had informed him by letter that the Dominion felt parliament should not be asked to repeal the statute "without more careful and detailed consideration than it is possible to give it at the present time."

(Validity of the Temperance Act recently was upheld by the Judicial Committee of the Privy Council.)

Unemployment In Nova Scotia Serious

OTTAWA, March 26 — (CP) — Unemployment in Nova Scotia is developing into a permanent problem, the Commons was told today by Clarance Gillis (CCF — Cape Breton South).

Unemployment in Nova Scotia "is not a seasonable matter... it is developing into a permanent situation." A government official had predicted there would be 60,000 Nova Scotians seeking work in June.

Fifteen thousand young people left the province annually to seek work.

There had been no wartime expansion of industry in Nova Scotia. Veterans were coming back to what they left in 1939.

What Tourists Ate In Canada in 1945

TORONTO, March 26 —(CP)— Breaking down the tourist dollar into terms of livestock consumption, Hon. G. R. Dunbar, told the Canadian National Live Stock records today that tourists visiting Canada last year consumed about 20,000,000 pounds of beef—or the equivalent of 20,000 bullocks weighing 1,000 pounds apiece and dressing 50 per cent.

Mr. Dunbar, minister in charge of game and fisheries for Ontario estimated the total number of visitors to Canada at about 9,000,000 based on entry of 2,600,000 automobiles averaging three to a car, plus 1,000,000 entering by train boat or other transportation.

ON BOARD H.M.C.S. "UGANDA" AT SEA—Nearly 600 Canadians of the crew of 700 acquired new citizenship in the domain of Neptunus Rex, mythical ruler of the District of Equatorius, the other day when H.M.C.S. "Uganda" made her first peace-time crossing the line during her training cruise around South America.

"Uganda" had crossed the equator twice previously in the past year—once when she was on her way to the Far East to join the British Pacific Fleet and again as she steamed north from Australia to the battle area in the spring of 1945.

The ceremony of crossing the line embodies the maximum of ancient tradition and the minimum of dignity—sparing neither rank nor respected years, and providing the ship's company with several hours of good rowdy-dowdy fun.

This time there was plenty of fodder for the initiation mill, for "Uganda" has on board many new entry seamen and stokers, getting practical training at sea, and many veterans of the Battle of the Atlantic whose duties never before had taken them as far South as the equator.

The night before "Uganda" reached the line, Davy Jones came on board through the hawse pipe with a message from His Majesty, King Neptune, for the commanding officer, Captain E.R. Mainguy, O.B.E., R.C.N., of Duncan, B. C., informing the captain when the ship was to be stopped to receive the royal party.

Then there were summonses to be delivered—invitations to an "investiture" for those who had crossed the line before; commands to face unknown horrors for those who hadn't. The old "shellbacks" (those who had previously crossed the line), received tremendous medals and those who hadn't, once they were initiated, certificates (suitable for framing) proving they had been presented at the court of Neptunus Rex.

President of the "Shellback" committee" which had an underhand in organizing the ceremonies along lines which have been followed at least since Nelson's

50 Cheap Radar Sets Won War At Sea In 1943

BY STUART UNDERHILL

LONDON, March 26—(CP Cable) — Fifty radar sets of a radically new type were largely responsible for the "spectacular transformation" in the war against U-boats between March and May, 1943, Sir Robert Watson-Watt, radar pioneer, told a radiolocation convention at the Institution of Electrical Engineers here today.

"These sets—each of only a few hundred pounds in value—were responsible for the sinking of more than 100 U-boats in the crucial three months which ended the second main phase of the battle," he said.

"The fleet air arm made the battle of Taranto, Italy, one of the radar victories. Ship-borne radar enabled the home fleet to find a fix and to fight and finish off the German battleship Scharnhorst in the north. The bombardment of Trapani, Italy, by the battleships Howe and King George V was a pure radar operation."

Sir Robert went on to say: "The radar set now is a range-finder of higher accuracy that the old monostatic optical range-finder, and is available for night conditions, for fog, rain, snow and icing."

Other accomplishments of radar he listed were to "convert night into day for the anti-aircraft gunner" and virtually to close the Dover Straits to all enemy vessels of more than 2,000 tons.

Price For Hogs Increased Two Dollars Per Head

OTTAWA, March 26 — (CP) — Agriculture Minister Gardiner announced today in the Commons the general terms of contracts to be signed with Britain for the purchase of Canadian foodstuffs, with the main feature being a net increase of $2. a head in hog prices for Canadian producers over the next two years.

The agreements will cover British requirements for bacon and ham, beef and mutton, cheese, eggs and evaporated and powdered milk and will be for varying periods ending in 1947, 1948 and 1949.

The principal agreement concerns the shipment of bacon and hams but, presumably because of declining Canadian hog production, provides for shipments smaller than those of 1945 and previous years, although Mr. Gardiner's announcement said Britain was prepared to purchase the maximum supplies which Canada could provide in 1946, 1947 and 1948.

The contract will be for a minimum of 350,000,000 pounds in 1947 and 400,000,000 pounds in 1948 compared with the 425,000,000 pounds shipped in 1945 and a similar amount which the Dominion hopes to supply this year.

Mr. Gardiner said the contract price for the remainder of this year and for next year will be raised to $25 a 100 pounds F.O.B. seaboard for grade "A" Wiltshires while for 1948 the price will be not less than the current contract price of $22.50, same basis, and will be subject to later review.

While the new price means an

Liberal Member Claims "No Unemployment" In Prince Edward Island

OTTAWA, March 26 — (CP) — The scene in the Commons was noisy tonight when Dr. T.V. Grant, Liberal member for the Prince Edward Island constituency of Kings, took the floor in the Throne Speech debate and fired criticism at the Opposition.

Continuing the Throne Speech debate, Dr. Grant tossed broadsides at W. Chester S. McLure (PC—Queens) and the former Conservative government of Viscount Bennett which held power from 1930 to 1935.

His remarks drew frequent interjections from Progressive Conservative members and rounds of laughter from Liberal benches.

When the Bennett government was in power two railway branch lines in his constituency had been closed down and Mr. McLure had not objected although he sat on the government side, he said.

Mr. McLure had not objected when the "tory" government cut railway wages and the civil service salaries.

Dr. Grant said he was not an expert on economic matters but he believed Mr. Bennett "stayed on the gold standard to enrich his friends." More millionaires were made in that five-year period than in any similar period.

Mr. McLure did not know the rules of the House because during his term in the House from 1930 to 1935 he had "done nothing," Dr. Grant claimed; he should have spent some time during his 10 year absence from the House in studying the rules.

Called To Order

Shortly after this remark, Speaker Gaspard Fauteux said he wished to remind the member who had the floor to address the chair. This brought laughter from both sides of the House.

Mr. McLure, said Dr. Grant, had stated the government was making no provision for full employment.

Dr. Grant felt that any "Tory" should not talk about jobs after what occurred in the depression years of the thirties.

"No Unemployment"

There was no unemployment in Prince Edward Island. The Island had not starved during the depression because the people there grew a lot of food and they had to eat it all themselves.

Mr. Grant described Prince Edward Island as "God's country — We have no Japs, no Social Credit, very few C.C.F. and not many Progressive Conservatives."

He said that Mr. McLure had asserted that Transport Minister Chevrier had set the railway rates in P.E.I. himself. He should know that those rates were set by the Board of Railway Commissioners.

Mr. McLure also had asked for a super-highway from the P.E.I. town of Borden to Charlottetown, the capital. He should be the last man to ask for highways because the only highways built in the Island had been constructed by the Liberals. A highway built by the Conservatives had "fallen to pieces."

HEAVY LUMBER CUT

SAINT JOHN, N.B., March 26 — (CP) — A heavy lumber cut and an anticipated early breakup of river ice may provide some relief for the shortage of building materials and fuelwood in New Brunswick, lumber company officials said today. Spring driving is expected to start soon after the ice breaks up in the rivers and streams.

Fair Buildings At Woodstock Burned

WOODSTOCK, N.B., March 26 —(CP)—Fire late today destroyed the Woodstock exhibition buildings. The financial loss was unknown tonight but the main building, erected 30 years ago, cost more than $100,000. Insurance amounts to about $30,000.

The flames, possibly starting either from a grass fire or spontaneous combustion in hay, swept through the main structure, barns, dance hall, offices and cattle and poultry sheds.

Only one exhibition building in the main group and a few shacks used for midway concessions escaped damage. Several small buildings erected by the Canadian Army on the exhibition grounds also were saved. Lack of water hampered firemen.

Two race horses undergoing spring training were lost but 20 others were led unharmed from their stables. Lost property included considerable racing equipment.

One end of the stables was a mass of flame when the alarm sounded.

The lost horses were Best Hanover and Red Cash, both owned by L.M. Page of Ashland, Me. Each horse had a mark of 2.09. Among the lost equipment were five sulkies owned by E.B. Avery, Woodstock.

Lively Discussion On Bill To Bring S'side Under Utilities Act

After long and heated discussion, a bill amending the Public Utilities Act was given second reading in the Legislature yesterday morning which will have the effect, following proclamation by the Lieutenant Governor in Council, of bringing the Summerside electric light and power plant under control of the Utilities Commission. At present, Commission control extends only beyond the town's corporate limits, and recently a delegation of the Mayor and Town Councillors of Summerside waited on the Legislature to have this provision retained.

The amendment was carried on almost a straight party vote, 8-15. All the Opposition and Mr. Morley Bell, Liberal member for Fifth Prince, voted against it, following a suggestion by the Opposition leader, Hon. Dr. W.J.P. MacMillan, that it be withdrawn until next session.

The bill was moved into committee by Hon. G. H. Barbour, Minister of Public Works, with Mr. Saville in the chair.

The amendments, Mr. Barbour explained, are intended to give the Utility Board authority over all parts of the Province, including the Town of Summerside.

Mr. Heath Strong, Fourth Prince, said it was evidently directed at Summerside. A delegation from the Town Council had been in the other day, asking that this measure be not introduced. No one from Summerside was asking for it, he maintained. "You are now going to grab the Summerside electric plant and link it up with the Maritime Electric plant in Charlottetown, against the wishes of the Summerside people. It is nothing short of dictatorship.

A Co-operative

"This plant is a cooperative concern. The rate may be a little high but they use that for the purpose of taxation and there are no Summerside taxpayers complaining. How would the members for Charlottetown like to see

Yanks Make Arrests For Espionage

(By The Associated Press)

WASHINGTON, March 26 — J. Edgar Hoover, director of the Federal Bureau of Investigation, announced the apprehension tonight of Lieut. Nicolai Gregorovich Redin, 29, on espionage charges in Portland, Ore., as he was about to board a Soviet vessel in the harbor.

An F.B.I. announcement said Redin, a graduate of the Soviet Naval Academy, has been under intensive F.B.I. scrutiny for the last several months. It added he will be arraigned in Portland, as soon as a United States commissioner is available, on the espionage charges.

The F.B.I. declined further comment immediately.

Parliament At A Glance

BY THE CANADIAN PRESS

The Commons defeated Progressive Conservative and C.C.F.. motions of want-of-confidence in the Government 149-48 and 182-25, respectively..

Agriculture Minister Gardiner announced terms of food contracts to be signed with Britain.

John Bracken, Progressive Conservative leader, urged the Government to lift price restrictions on farm products..

Wednesday

The Commons will continue the Throne Speech debate.. The Senate will sit..

Suggests House Take Recess April 17

OTTAWA, March 26 —(CP)— Prime Minister MacKenzie King suggested today in the Commons that parliament might observe an Easter recess from Wednesday, April 17, to Wednesday, April 24..

Mr.. King said he had conferred with party leaders and had suggested a 10-day recess.. Then, he said amid general desk-thumping, that the feeling had been expressed that the recess be short.

STRIKE CALLED OFF

HALIFAX, March 26—(CP)—The Halifax waterfront was returned to normal tonight after a 30-hour work stoppage by 700 freight handlers was called off today and the men began returning to their jobs.

The dispute arose over what the union alleged was interference with the internal organization of the union by company officials.

U. S. Coal Miners Strike Is Likely

WASHINGTON, March 26 — (AP) — John L. Lewis today notified bituminous coal operators of the United States he will end their present contract this Sunday at midnight and 400,000 miners will "stay home with their families" next week.

Mr. Lewis, at a press conference, said "there will be no miners' blood spilled" next week and that lives will be saved and injuries averted.

The United Mine Workers' president said there will be no extension of the current contract, making it clear he will insist on a new agreement before the soft coal miners return to work.

Negotiations with the soft coal operators would continue and that "anytime we reach agreement we will try to make it effective at the earliest possible moment."

More Men's, Boys' Shirts To Be Made

OTTAWA, March 26—Directives designed to increase production of men's and boys shirts were announced today by the Prices Board.

However, the Board said that it would be several weeks before more shirts could be expected in retail stores to relieve the current shortage.

Urges Special Consideration For Province

OTTAWA, March 26 — (CP) — Senator James P. McIntyre (L—Prince Edward Island) speaking in the Throne Speech debate in the Senate, tonight said his Province had the smallest income per capita in Canada and therefore should get special consideration in any financial arrangements drawn up at the Dominion-Provincial Conference.

He said Prince Edward Island and other Maritime Provinces did not have the large resources at their disposal which other Provinces had and if they were to enjoy the same social services as the rest of Canada, they would be hard put to find capital needed for such services.

He added Prince Edward Island and her sister Maritime Provinces did not get the advantages from confederation which the Fathers of the Dominion had planned.

Senator McIntyre quoted comparative figures showing British Columbia had the highest income while his Province had the lowest.

He also referred to Prince Edward Island's lobster industry and said he would like to see some of the red tape cut so the transfer of export permits among Maritime handlers could be facilitated.

Study Plans If U.S Loan Rejected

LONDON, March 26 — (Reuters) —A treasury spokesman indicated today that special treasury committees are studying plans to enable the British Government to take immediate emergency measures if the United States Congress does not pass the $3,750,000,000 American loan to Britain.

The official said, however, that the plans of the committees have not reached the stage of definite proposals to the British cabinet.

Fish Catch In P. E. I. Up In Feb.

HALIFAX, March 26—Maritime fishermen caught 14,710,400 pounds of fish, with a landed value of $670,075 last February according to the monthly report of the Eastern Division, Department of Fisheries, issued here tonight.

The catch and landed value were off from the figures for the same month in 1945, when 16,449,200 pounds of fish brought a return to fishermen of $753,136.

In Prince Edward Island, both the catch of 445,400 pounds and the landed value of $42,645 were up considerably from the 419,000 pounds and landed value of $29,123 for the similar period of 1945.

Strawberry Blossoms In Annapolis Valley

WOLFVILLE, N.S., March 26 — (CP) — Mrs. Cecil Hansford of Wolfville has two strawberry blossoms in a cultivated patch in her backyard — earliest appearance in the Annapolis Valley of blossoms in years. The exceptionally warm spring weather had led to predictions this year would see one of the earliest Valley apple blossoms in history.

Pretty Widow Charged With Brutal Murder

HAMILTON, Ont., March 26 — (CP)—A charge of murder in the mutilation killing of her husband—one of the most brutal murders in Hamilton's history—left 26-year-old Mrs.. John Dick temporarily stunned today.. Then she rallied and ate a full course dinner with all the trimmings..

The charge followed 4 1-2 hours of police questioning of the pert, dark-eyed widow, held on a vagrancy charge since March 20, four days after the headless, limbless body of John Dick was found on Hamilton mountain.

She will be arraigned tomorrow.

Even as police charged comely Evelyn Dick with the murder of the 40-year-old street railwayman she married last Oct.. 5 they announced startling new developments in the investigation of the killing believed to have taken place about March 6..

They said they sought an unnamed "trigger man" who they believed did the actual killing; announced the sifting of some ashes had uncovered "important evidence"—believed to be Dick's teeth and some small bones—and made known the discovery of a new clue in the finding of a hat believed to have been worn by Dick.

Some indication of the brutal fashion in which Dick's corpse was handled—and possibly indicating how he died—came in the recovery by police of such lethal instruments as a heavy meat cleaver, a butcher's knife and hunting knife in the course of their investigation.

Today's fast-moving developments came just 24 hours after the revelation yesterday that police, probing the killing, had also discovered the decomposing body of a baby in the Garrick Street house where Mrs.. Dick lived..

Where it fitted into the Dick story remained obscure.. The tiny body lay inside a cement-filled suitcase stowed in a cupboard. Police said it had no connection with the Dick case but admitted discovery came in the course of their investigation into the torso killing. They kept the news secret for days..

Not in years has any case so shaken Hamilton and district as the Dick killing, first brought to light when five school children on a Saturday morning hike March 16 stumbled upon his remains.

Reports were current tonight that the case now is practically complete, with investigators said to be in possession of all facts concerning disposition of the body, first found near Hamilton's "Lover's Lane."

Truce Halts Verbal War At Session

By Claude Blackburn

NEW YORK, March 26 —(CP)— An all-day Russian-Polish struggle to postpone discussion of the Iran question in the United Nations Security Council ended late today in a truce after Soviet delegate Andrei Gromyko flatly warned that he would not participate in such a discussion at this time.

The deadlock ended when Henri Bonnet, French delegate, proposed setting up a sub-committee to consider and report back tomorrow afternoon on the various suggestions for dealing with Iranian ...protests over Russian activities.... In ...that country.

The Bonnet resolution was carried and the sub-committee will consist of the delegates from Russia, the United States and France. The council's second day's meeting adjourned until tomorrow at 3 p. m. E.S.T.. (4 p.m., A.S.T.)

State Secretary Byrnes of the United States described the day's proceedings as a "rather remarkable procedure" in that Russia insisted in speaking not only for the Soviet but for the Iran Government, yet refused the Iranian ambassador, sitting among the observers, to be heard.

The day's proceedings in brief:

1. Soviet Ambassador Gromyko, the Russian delegate, charged that the Iranian situation was being used by "certain elements" anxious to stir up causes for another war; that the Soviet-Iranian question has been settled by the two parties in a manner satisfactory to both, and that there was no justification for discussing it.

2. Mr. Byrnes and Sir Alexander Cadogan, British delegate, led the arguments in favor of dealing with the Iranian case at once. Both said that they had only the report from M. Gromyko and that if such an agreement as he had described existed, it should have been submitted to the Council by both the Soviet and Iranian Governments.

N. B. To Extend Electric Power Lines

FREDERICTON, March 26 — (CP) — The New Brunswick Electric Power Commission has a program for the next few years amounting to $9,914,000, commission chairman J.C. Boucher announced today while speaking in the budget debate in the New Brunswick Legislature.

The plans include $2,614,000 for 385 miles of high tension lines in various parts of the province; $5,000,000 for 3,000 miles of distribution lines to meet present demands; $2,000,000 for a new power plant at Chatham, and $300,000 for sub-stations to transform the energy.

TORONTO, March 26 — (CP) — Minimum and maximum temperatures: Vancouver 44, 48; Edmonton 25, 44; Regina 30, 64; Winnipeg 33, 61; Toronto 36, 56; Ottawa 33, 63; Montreal 38, 61; Quebec 37, 43; Saint John 35, 51; Moncton 36, 62; Halifax 34, 62; Charlottetown 34, 58; Sydney 30, 55; Yarmouth 38, 40.

HALIFAX, March 26 — (CP) — Following is the official weather synopsis and official marine forecasts issued by the Dominion Public Weather Office at Halifax at 10.30 P.M. Tuesday and valid until Wednesday evening.

Synopsis—Fine warm weather prevails over the Maritimes although tonight sea fog blankets the adjacent coastal waters. Unsettled weather over the Great Lakes region is moving eastward and is expected to cause intermittent rain throughout Wednesday in the marine forecast district.

Bay of Fundy—Gulf of St. Lawrence—Northumberland Strait — Light winds, increasing to moderate northwest winds of 15 M.P.H. tomorrow afternoon. Dense fog with intermittent rain, clearing Wednesday afternoon. Visibility near zero, improving to 10 miles Wednesday afternoon. Little change in temperature.

High tide this morning at 5.53 and this afternoon a 4.36.

Sun sets this evening at 6.21 and rises tomorrow morning at 5.49.

New moon April 1, 11.37 P. M.

Summerside tide eighteen minutes later than Charlottetown.
