 \*SHOP from Holman's Catalog.  
 \*MILK FOR SALE—8c quart.  
 D. F. MacDonald, Souris. 2-121  
 \*SYMPATHY EXTENDED  
 The only child of Mr. D. C. McDonald, M. L. A., a little girl of four years, passed away Sunday, Feb. 1, at her home in Souris, S. D. Her grandfather, Mr. Angus B. McDonald, Rockbarra, the mother, Mrs. McDonald, who was in Bowtown, was wired to, but owing to delayed trains at Sackville and at Charlottetown, was unable to get home until Monday night, the day after the child's death. The little girl was buried in St. Mary's cemetery, Souris, on Wednesday and genuine sympathy is expressed for the bereaved ones.

**MOVABLE LIFEBOATS**  
 A Dutch steamer is equipped with lifeboats which can be readily moved from one part of the vessel to another. In this way it is hoped to overcome the dangers of heavy listing, which more than once has prevented expeditious launching of all boats and has thus led to loss of life.  
**FLASHLIGHT RAZOR**  
 A new combination of flashlight and safety razor will enable those who shave themselves to shave when the lights are out, or to shave with more comfort when the light is poor. The handle of the razor is a flashlight and throws a light on the face.  
**BODY BAND FOR PIGS.**  
 A body band studded with pointed steel bosses, has been devised for strapping on to the body of a sucking pig to prevent it from being smothered by the sow. The points prick the sow if she lies on the young pig, causing her to release it.  
**SCIENCE NOTES.**  
 Flexible cuffs have been invented that enable a man to pull his shirt sleeves above his elbows without unbuttoning the cuffs. In the last ten years more than 1,400 inventions to prevent train wrecks have been given trial, without satisfactory results. The most remarkable was the first mechanical activity of many of the famous inventors. An inventor has patented a device which rings a bell when the ice box drip pan is full of water.  
**FIRE LOSSES**  
 Fire losses in Canada during the week ended Jan. 29, are estimated by The Monetary Times at \$658,000, compared with \$573,500 the previous week.  
**NEW INCORPORATIONS**  
 Authorized capital of \$13,082,500 is represented by companies whose incorporations were reported to the Monetary Times during the week ended Jan. 29, compared with \$19,923,300 for the same period last year. A comparative summary by provinces is as follows:

Province	Jan 21-22	Jan 20-23
Dom.	\$13,670,000	\$7,660,000
Alta.	450,000	770,000
B. C.	185,000	305,000
Man.	20,000	20,000
Ont.	5,020,000	3,720,000
P. E. I.	35,500	49,000
Que.	320,000	522,000
Sask.	213,000	36,500
<b>Totals</b>	<b>\$19,923,300</b>	<b>\$13,082,500</b>

**IN MEMORIAM**  
**MRS. ALEXANDER JENKINS**  
 The friends and relatives of Mrs. Jenkins were very much surprised when they heard of her death, on the evening of January 19th. To all appearance she was as well as usual on retiring the previous night, but in the still hours of the morning the message went forth from her Master "It is enough come up higher." The late Mrs. Jenkins was Joyce Lester, eldest daughter and only surviving child of the late Samuel Lane of Mount Mellick, born April 26th 1836 so had come to within a few months of her eighty-sixth birthday. In August 1856, she married Mr. Jenkins and went with him to his farm at Glenfinnan and there on the banks of the Hillsboro River, lived for sixty-six years. Her husband died very suddenly thirty-four years ago. Of her eight children four daughters and four sons four preceded her to the heavenly home, Bessie and James lived with their mother, and Samuel and Henry reside in the United States. The deceased was a member of the Methodist Church, and former minister on Mount Stewart. She will be remembered by her home, where service was held every two weeks for so many years, until they came to the home church at Pownal. On Saturday morning at the service at the home Mr. Tilley spoke from Job 26-28, and the body was taken to Pownal cemetery and laid in the family plot.  
 "Be ye ready for in an hour when ye think not the Son of man cometh."

**MRS. JOSIAH LANE**  
 On Friday Dec. 26th 1922 Susan Dodd, widow of Josiah Lane of Hermitage, Lot 49, ended this life after much suffering, and entered into the "rest that remaineth for the people of God." Mrs. Lane was a devoted member of the Methodist Church and now often she and her husband worshipped in the little church at Mill View. She was the mother of a large family, eight of whom preceded her to the spirit world and another daughter, Mrs. Wm. McIntyre, of Montague, passed away on Dec. 6th. During her last illness she was frequently visited by her pastor, Rev. G. H. Tilley who spoke of her patience in suffering and faith in her Redeemer, looking forward to the home not made with hands eternal in the Heavens." On Sunday afternoon after service by six home, her remains were conveyed to Pownal cemetery, and laid to rest beside those of her husband.  
 "Many are the afflictions of the righteous, but the Lord delivereth them out of them all."

**MRS. THOMAS GILLAN**  
 It was a great shock to her numerous friends and acquaintances to learn of the death of Mrs. Thos. Gillan, Dec. 27th, at her home at 52 Edward St.  
 On the Saturday previous she became ill, and went to bed, expecting to be up around again in a day or two; although her condition was not alarming, a doctor called, but despite all that medical skill and constant attention could she passed peacefully away on Wednesday at 12 noon. Up to the very last minute, hopes for her recovery were entertained, but God ruled otherwise, and her spirit passed to the Great Beyond, leaving a once happy home bereft of a loving wife and mother. She was a real mother, not only to her immediate family, but also to her two little granddaughters, Norah and Gertrude Walker who lived with her. Although it might truly be said that she lived for her family, she also found time to minister to the wants of others, and her cheery and kindly words were ever ready to succor the needy in the time of sickness or otherwise. She will be mourned by the community in general.  
 She leaves to mourn besides a sorrowing husband, one son, Mr. Vernon Gillan, Somerville, Mass.; three daughters, Mrs. Daniel Woods, Tyrone, Lot 65; Mrs. Walter Walker, and Miss Ada Walker; also two sisters, Mrs. Bernard Connolly, Iona, and Mrs. Gertrude Baird, Fort Augustus and one brother, Mr. Edward McKenna, Iona. Her funeral, which took place to St. Dunstan's Cathedral, on Sunday afternoon, Dec. 31, was exceptionally large. The Rev. Jas. Rooney, cousin of the deceased, performed the funeral service at the church and at the grave. The pall bearers were: James Arding, Robert Duncan, Daniel Steele, James Callaghan, John Hughes, John McKenna.  
 The following were the floral offerings and spiritual bouquets: Cross from the staff of Paton and Co.; wreath from the staff of S. A. McDonald; Pillow, the family; Mrs. Hegan; Spiritual bouquets: Mr. and Mrs. J. A. McDonald; Mr. and Mrs. J. J. Duffy; Mr. and Mrs. Richard Dougan and family; Willfred McKenna; Mr. and Mrs. Phillip Mahar and Louise; Miss Katie Flynn; Miss Theresa Kiggins; Mr. and Mrs. D. Steele

**DANGER IN FARM WELL WATER**  
 Water from the farm well may be clear and sparkling and pleasant to the taste and yet polluted, and in consequence a source of danger to health. It comes from a shallow well that is located too close to a source of contamination. It is certain, sooner or later to become unwholesome. The Chemistry Division of the Experimental Farms at Ottawa, which examines well waters from farm homesteads, reports that about 35 per cent are found to be unsafe for drinking purposes. It should be remembered however, that only suspected samples are sent in. Of 119 samples dealt with in 1922, 24 per cent were found to be pure and wholesome, while the remainder were either suspicious or positively dangerous. Care should therefore be exercised, first in locating the well and, secondly, in seeing that it is properly protected from contamination. The Dominion Chemist in his annual report recommends that spring or pure stream water be piped to the house and farm buildings by gravitation. If a proper fall can be secured, but otherwise by the aid of a windmill, gasoline engine or hydraulic ram. A well to be reasonably safe should be at least fifty yards from the barnyard or other possible source of contamination. It is further recommended that a radius of fifty yards be kept entirely free from all manure and other filth and preferably maintained in sod. It will be found of very considerable value to line the well to a depth of 10-12 feet and to a thickness of say 6 inches with concrete or puddled clay containing this well or lining for a foot above ground. A safe supply can usually be depended upon if the well is bored or drilled through a layer of impervious rock, tapping a deep seated source of water.  
 Water that is suspected of contamination may be made safe by either of two simple ways. One is to boil it for ten or fifteen minutes; the other is to treat by chlorination. Run up a level teaspoonful of chloride of lime in water to the consistency of a creamy paste. This may be diluted with a pint of water and kept for some days bottled and corked as a stock solution. A teaspoonful of this solution should be added with stirring to each two gallons of the water to be treated. After 15 minutes will be destroyed, germs present.  
 Farmers desirous of an analysis should write to the Division of Chemistry, Experimental Farms, Ottawa, for the necessary directions for the collection and shipment of the sample.

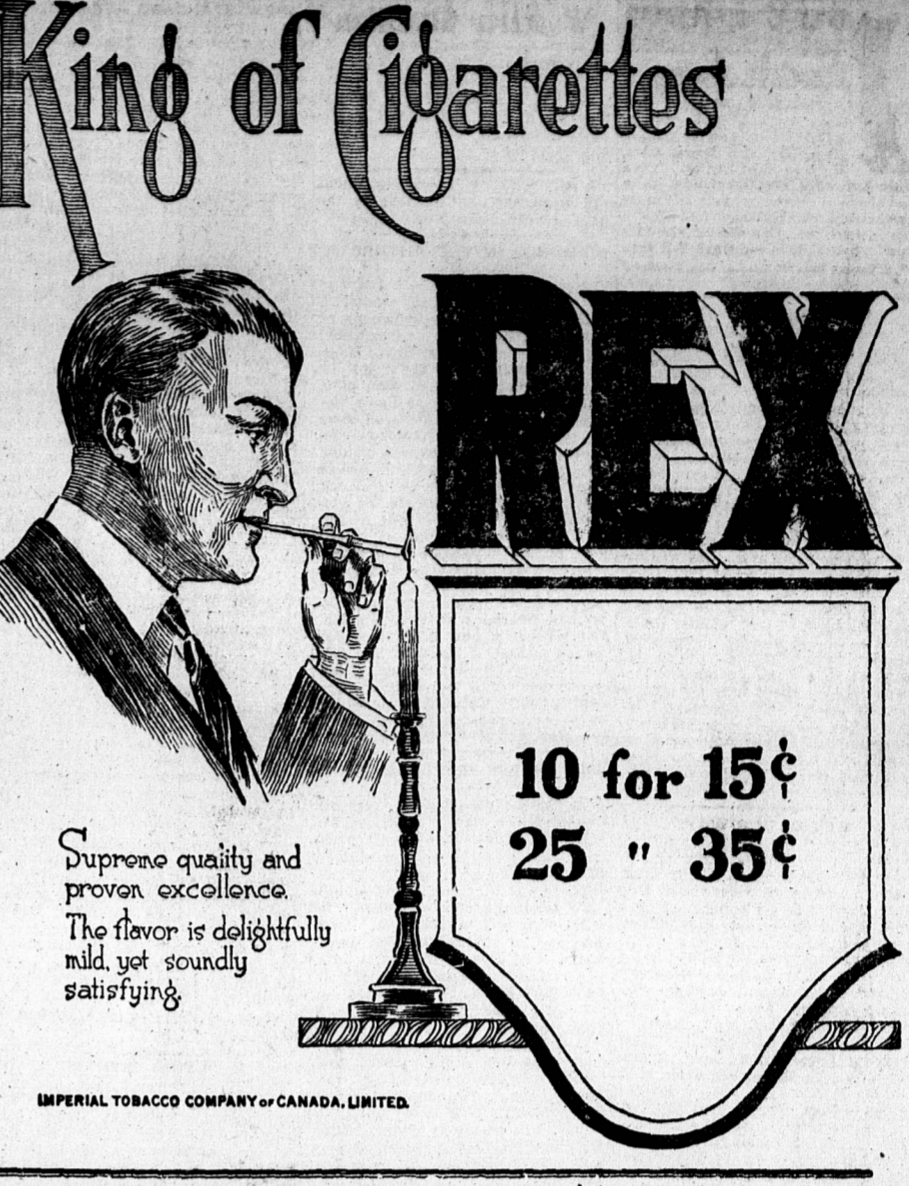

**Popcorn Macaroons**  
 Pass enough freshly popped corn through the food chopper to make one large cupful. Add to this one cupful of almond paste (this may be bought already prepared at a confectioner's) and mix thoroughly. Beat the whites of three eggs until very stiff and dry, add a cupful of sugar and beat steadily for four or five minutes. Blend gradually with the corn and nut paste and drop from a spoon onto oiled paper. Sprinkle with powdered sugar and bake in a moderate oven for twenty minutes. A candied cherry may be pressed into the centre of each as they are taken from the oven.

**Chocolate Popcorn Balls**  
 Pop the corn and pick out only the large crisp grains. Place in a saucepan two cupfuls of granulated sugar, half a cupful of water and a quarter of a teaspoonful of cream of tartar. Boil and flavor with vanilla extract. Pour part of this syrup over the popcorn, stirring until evenly distributed. While doing this get the remaining syrup cooking to the crack stage (280 degrees). The corn into small balls with the fingers, dip into the syrup and dry on paraffin paper. When cool dip into melted sweet chocolate.

**He Was Satisfied**  
 Father, sternly: "My daughter, still remain under the parental roof."  
 Sultor: "That's very kind of you. With the acute house shortage, that will be very convenient for us both."

**MAY REPLACE CARBONIZERS**  
 WINNIPEG, Feb. 1.—Trial of a carbonizer developed by the Bureau of Mines, Washington, to carbonize Western Canadian lignites, will be made, and if found satisfactory, will be installed to replace the carbonizers developed by the Light Utilization Board. This was decided at a meeting here of Provincial and Federal Government representatives.  
 Mr. and Mrs. Daniel Woods; Mr. and Mrs. Francis Steele; the Walker family; Miss Minnie McKenna; Mrs. M. Sheehan; Mr. and Mrs. Herb Steele; Gertrude and Helen Steele; Mr. and Mrs. Joseph Wood; Mrs. King and Marion; Mr. and Mrs. Victor McDonald; Mr. and Mrs. Thos. McMahon; Mr. and Mrs. D. Dowling; Mr. and Mrs. Bernard Connolly; Lena Curran and Ada Smith; Mrs. Edward and Adele Cullen; Mr. and Mrs. Alban McDonald; Alice, Annie and Margaret Dunn; Mr. and Mrs. Edward McKenna; Mrs. Egan and Annie. Our dear grandmothers Gertrude and Eleanor Walker; her family.

**Your Christmas Turkey**  
 It is one of the curiosities of nomenclature that turkeys have nothing to do with Turkey. Before the discovery of America there was no such thing, as Betsy Prig would have said, although they belong to the family of pheasants, hence their admirable eating quality.  
 In the sixteenth century these birds were brought from Mexico to Europe. They are aliens which have been welcomed, and naturalized, in country after country, until the domesticated turkey can be found in almost every part of the world.  
 In their original haunts turkeys are still wild birds, wandering about in flocks and roosting in trees, but never doing much flying. Moreover, the wild birds are very fat as good as the tame ones. The cock turkey is one of the most gorgeous birds in the world, almost as highly colored as a humming bird, and in the breeding season a splendid fighter.  
**HER CROWNING GLORY**  
 The preservation of the hair should begin as far back as birth. The infant's hair is first anointed with a little sweet or almond or other bland oil; after which, without force, soap and water are gently used to remove extraneous matter. After the scalp is thus washed it is patted dry with a soft warm cloth and a little oil or Vaseline is smeared over it. After the first washing the scalp is oiled daily and washed every day. When the hair begins to grow a soft brush alone should be used to arrange it; and the daily oiling may be stopped, unless dandruff matter accumulates in cakes, in which event the oiling should be continued. The slightest indication of disease of the scalp should be dealt with promptly and properly by the family doctor. Sulphur added to the oil or vaseline in the proportion of a drachm to an ounce (to be made up by the druggist) may prevent such disease. A child's hair should be cut short, not cropped close to the head. After a girl has reached her eighth or ninth year the hair should be allowed to grow.  
**Popcorn Fudge**  
 Place in saucepan two cupfuls of white sugar, a pinch of salt, one cupful of milk and two tablespoonfuls of butter. Boil to the soft ball stage. Flavor with half a teaspoonful of sweet almond extract and stir in one cupful of chopped popcorn and half a cupful of chopped shelled peanuts. Stir until creamy and pour into buttered pans. Cut in squares when nearly cold.  
 Mimard's Liniment for Distemper

**Buying**  
 underpriced printing is a hazardous practice. It has a skimp in it somewhere—it's not "all wool." Argue as you please, the advantage can hardly be in the paper, the ink, or the labour. These all figure according to known values. So it must be in the character of the workmanship; therefore, is it not best to be sure?  
 Price here is a matter of understanding and appreciation—your dollar buys full value.  
 The quality of the job and the satisfaction resulting from work well done continue to linger after the price is long forgotten.  
 Cheap printing failing of purpose must be expensive; thus not economical. Bargaining and price comparison is an old-world device and decidedly not a counterpart of "doing best what many do well."
