UNCLE RAY'S CORNER

GREENLAND—PARENT OF ICEBERGS

The Island called Greenland sends out thousands of icebergs which float on the north Atlantic every year. Let us see how those icebergs are "shoved off."

In the first place let us remember that Greenland has a poor name. There is very little green on the whole island, except in summer at a few points along the southern coast. Most of the island is covered with snow and ice during the entire year.

Sketch of an iceberg, showing what a large part "rides" under water.

There are reasons to believe that the climate of Greenland was not so cold ages ago. One reason is that there are valleys on the island which must have been made by rivers.

Many Greenland valleys are now choked up with what we call "valley glaciers." Another name for them might be "moving rivers of ice," for the ice moves, though very slowly. Some of the valley glaciers move only one or two feet a day. Others travel from 18 to 20 feet a day.

The ice of the valley glaciers is pushed toward the sea. After it is shoved out into the water, huge chunks break off and float. These chunks become what we call icebergs.

So we see that an iceberg is a large chunk of ice, frozen from snow which has been melted by pressure

while in a glacier. If you take a chip from an iceberg and let it melt, you find that the water is fresh, not salty. Icebergs float because they are lighter than water, but the greater part of each one is under water. In fact eight-ninths of the weight of an iceberg is beneath the surface of the water.

The tops of icebergs have many shapes, and they have been compared to "dazzling white chalk cliffs" and to "floating palaces." Sometimes they rise to great heights. There are cases on record where the part out of water was equal in height to a 15-story building!

Greenland is not the only parent of icebergs. There are bergs which break off from valley glaciers of Siberia and other places along the coasts of the Arctic ocean. Yet Greenland is justly famed as the source of most of the icebergs which float on the Atlantic and which form a danger to ships which take northern lanes.

DOUBLY BEREAVED—The deaths occurred on Saturday of Mr. and Mrs. George McDougall of Bangor, father and mother of Rev. Ewen McDougall of this city after some weeks of declining health, aged 88 and 83 respectively. One son Donald on the homestead and an adopted daughter Mrs. Victor Coff of Milburn are also left to cherish their memories.

ACKNOWLEDGEMENT.—The Trustees of the Protestant Orphanage acknowledge with thanks receipt of \$20.00 from the Ladies Auxiliary Bedeque and \$5.00 from Chelton Women's Institute also for the Endowment Fund \$100.00 from the estate of the late Alexander W. Bruce Kingsboro, P. E. I.

Mr. James Calder who has been confined to his home with illness for some time is able to be out around again. His many friends are pleased to see him much improved.

In Memoriam

MRS. ELIZABETH RICHARDSON There passed peacefully away to her eternal reward on Jan. 31st, at her home in Bristol, Lot 40, P. E. I., the person of Mrs. Elizabeth Richardson, aged 77 years. Mrs. Richardson will be greatly missed in the surrounding community as she was of a kind and cheerful disposition, always ready and willing to lend a helping hand to those in sickness and when called upon would get up any hour in the night and go where she would be needed. Her passing away will leave an aching void the world can never fill. She was a devout member of the Methodist Church. She

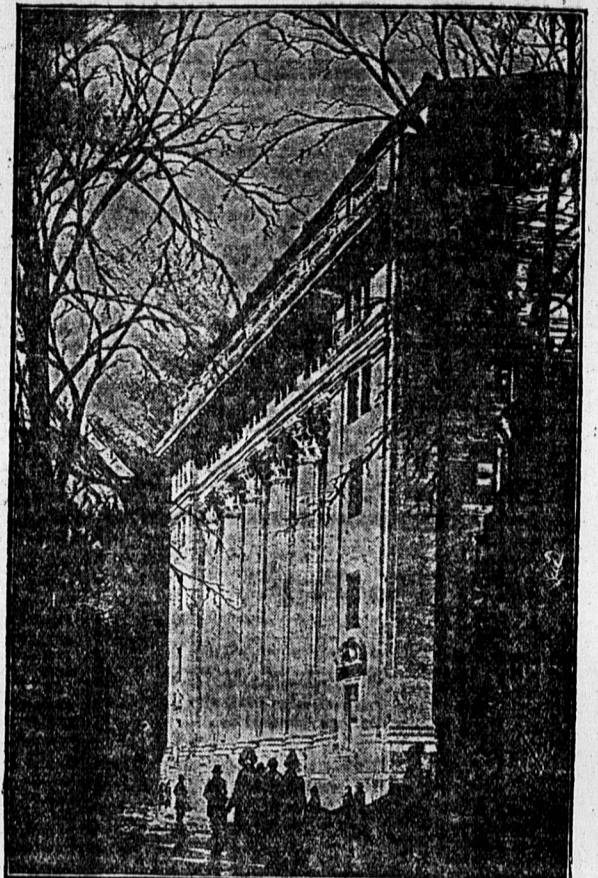

SUN LIFE ASSURANCE COMPANY OF CANADA

A TOWER OF STRENGTH

1928

Table with financial data for Sun Life Assurance Company of Canada for 1928, including Assurances in force, Total Income, and Rate of Interest earned.

The Company has also inaugurated the practice of paying a special maturity dividend on participating policies, ten or more years in force, terminating by death or maturity

EXTRACTS FROM DIRECTORS' REPORT

After deducting amounts re-assured, the total assurances in force now amount to \$1,896,915,934.57, an increase of \$408,925,254.48. Policies in force number 633,240, and in addition 136,293 certificates of assurance are held by employees of corporations and firms under the group plan.

While every field of operation contributed its full share to these impressive advances, the rapid development of our business in Great Britain and the United States is especially noteworthy. The generous reception of our Company in countries served by powerful domestic institutions is particularly gratifying, as testifying to widespread appreciation of our record and services.

The amount paid to policyholders since organization, together with the amount at present held for their security or benefit, exceeds the total amount received from them in premiums by \$111,370,229.10.

The strength and resources of the Company have been still further enhanced.

The net rate of interest earned on the mean invested assets, after making provision for investment expenses, has risen to 6.58 per cent. Dividend increases, bonuses and stock privileges, accruing on many of the Company's holdings, contributed substantially to this gratifying result.

A net profit of \$11,028,854.59 has been realized from the redemption or sale of securities which had risen to high premiums.

The securities listed in the assets have been valued at figures substantially below the values placed on them by the Government. This under-valuation of our securities represents an important safeguard against possible adverse market fluctuations, additional to the reserves specifically provided against that contingency.

We are again able to report that on the bonds and preferred stocks listed in the assets not one dollar, due either as interest or as dividend, is in arrear for a single day; while the dividends accruing to common stocks exceed by several million dollars those payable on the same stocks at the time of purchase.

The surplus earned during the year, based on the values given in the accounts, amounted to \$40,264,088.52.

\$10,000,000. has been deducted from the already heavily marked-down value of securities, as additional provision against possible fluctuations, increasing the amount so set aside to \$20,000,000.

The special amount set aside as a liability to provide for unforeseen contingencies has been maintained at \$12,500,000.

\$15,822,339.65 has been paid or allotted as profits to policyholders during the year.

After making all deductions and allocations, \$9,157,966.34 has been added to the undivided surplus, bringing the total over liabilities, contingency accounts, and capital stock, to \$54,438,862.48.

The continued prosperity of the Company enables your Directors to announce, for the ninth successive year, a substantial increase in the scale of profits to be distributed to participating policy-holders during the ensuing year.

In addition, your Directors have inaugurated the principle of granting a Special Dividend on participating policies maturing after having been in force ten years or longer. This new bonus will enable policyholders or beneficiaries whose withdrawal is occasioned by the maturity of policy contracts, to participate in the accumulated surplus which it has not as yet been considered prudent to divide.

The effort to provide life assurance at the lowest net cost obtainable has been increasingly appreciated. Our policyholders will be gratified by this further evidence of our desire that the Company's prosperity shall be fully shared by its members.

SUN LIFE ASSURANCE COMPANY OF CANADA

to the Methodist Cemetery Marie, where all that was mortal of a kind and loving mother and neighbor was tenderly laid to rest, there to await a glorious resurrection. The hymns sung were favorites of the deceased "Abide with Me," "Does Jesus Care" "Nearer My God to Thee." Neighbors of the deceased acted as pallbearers: Messrs Albert McEwen, Harry McEwen; Edmond Barry, John R. O'Brine, Walter Squires and Lawrence Gouchev.

CAPT. NEIL MACLEOD

The death of Capt. Neil MacLeod, aged 72 years, occurred on Nov. 10th, at the home of his daughter, Mrs. Wesley Faynter, French River, who kindly nursed him for many years in his long severe illness of rheumatism. He was a son of the late George MacLeod of French River, all of this very large family have passed away, except one sister, Millicent, Mrs. P. Smith of Granville, who was with him in his last illness. His wife who was Miss Hattie Blakeney of Halifax predeceased him 15 years, also one daughter, who died in childhood, leaving one daughter (Violet) Mrs. Faynter to mourn his loss. He was a member of the Geddie Memorial Church, which he always attended until his severe illness.

He followed the sea for many years, as captain, and was a successful pilot of New London Harbor. He always took a very active part in all things for the good of the community. He will be very much missed, especially by his old associates.

His funeral, which took place on Nov. 12, from the residence of his daughter, was largely attended. His pastor, Mr. Fleck, spoke very eloquently and with many comforting words for those who mourn. The interment took place at Geddie Memorial Cemetery, beside his wife and daughter. The pall bearers were Samuel Bernard, I. R. Bernard, W. A. Bernard, J. H. Pidgeon, Lemuel Orr and J. A. Meek.

MRS. ARCH'D. MACCANNELL

At 9 a. m. on Jan. 30th, 1929, there passed over the Great Divide, to the loving care of her Creator, the pure and trusting soul of Mrs. Arch'd. MacCannell, of Pisquid, aged 75. Death was due to heart disease, the end being hastened by flu. She was the sixth child in a family of twelve of the late Hector and Annie, nee Crawford, MacMillan, of whom only three brothers now survive to cherish the memory of a loving sister, namely: Angus, Watertown, Mass.; Duncan and Neil, Oakland, Calif. She the total being 116,951.

also leaves in deepest sorrow, beside her husband, four sons and three daughters, Mrs. A. E. Douglas, Moose Jaw, Sask; Mrs. Wesley Jay, Mt. Stewart; Walter and Neil, Winnipeg; Hector Pisquid; Duncan and Lily, at home. There is also 18 grandchildren, besides a large number of relatives and friends who will mourn her loss. Her life was a beautiful example of loving devotion, first in her Father's household, with the care of an invalid mother and sister, till in her 28th year she went to Boston. Returning to her father's home after two years, to be married, going to the home of her husband's people, she continued her labor of love, a faithful wife and devoted mother. Reared in the beautiful atmosphere of a truly Christian home, she steadfastly retained the trusting faith of her Godly parents. Yet her keen and tolerant mind, delighted to discourse upon every ancient and modern school of thought. She is laid in Mt. Stewart cemetery. Wreaths from the Family, Walter and Neil, Winnipeg; Star, D. A. MacCannell; Crescent, Mr. and Mrs. R. C. Clark. Blessed are the pure in heart, for they shall see God.

About 3000 more patents were granted in the United States in the last fiscal year than in the preceding year, the total being 116,951.

SKINNERS POND Discussion took place on a name for this new organized Institute and "Seaside" was chosen. A school committee was appointed. Plans were made to establish a grab box to aid the fund and the fun. The musical programme was a treat to all. member, 80 years of age, sang selections. Next meeting will be home of Mrs. John Doyle.

For persons requiring the use of a microscope in their work lenses have been invented that are mounted on spectacle frames and focused by slides that move along the bows.

German have developed a new grain dryer that makes it possible to thresh a crop immediately after harvesting, regardless of the weather.
