

FAMOUS FEET

...how they're kept free from corns..

LOUISE GROODY'S FAMOUS DANCING FEET

"I always have Blue-jay on hand when trouble is a-foot!" writes dainty and delightful Louise Groody, now starring in the New York musical comedy success, "No! No! Nanette."

"Stage work isn't always kindly to a dancer's toes. But I never have corns. For at the least sign of an approaching callus, I put on a Blue-jay."

Blue-jay is an old standby to folks who reap fame and fortune from their feet. A soft, velvety cushion fits over the corn and relieves the pain at once. Usually one plaster ends the corn. But even an "old offender" seldom requires more than a second At all druggists.

Blue-jay

THE SAFE AND GENTLE WAY TO END A CORN

DOINGS AT GOVERNOR'S ISLAND

Mr. Ross M. Stuntz, Field Manager of the Henry L. Doherty Company is around again after his recent illness from pneumonia. Mr. Stuntz is still convalescent and is a guest of Mr. and Mrs. Ivan Reddin for the present. He expects to return to Governor's Island in about ten days. Mr. Stuntz in an interview, said:

Notwithstanding a temporary discontinuance of drilling operations at Governor's Island, due to the collapsing of a casing joint, other work is still going merrily on in preparation for the resumption of drilling which will commence again as soon as the necessary fishing tools arrive from the United States.

At the present time there is approximately 3000 tons of casing machinery, building supplies and coal on the island. Since the harbor froze over 3500 feet of 8 1/4 seamless steel casing, 4500 feet of 6 5/8, also drilling and fishing tools for 8 inch and 6 inch holes were hauled out; in the last two weeks upwards of 125 tons of material was hauled, the balance being conveyed between October 22nd and December 6th. The hauling was done by tractors and teams.

When operations ceased the well had been drilled to a depth of 1375 feet. At 177 feet 20 inch casing was set; at 911 feet, 15 1/2 inch casing was used and at 133 feet 12 1/2 inch casing was set. The tools being used at present are 46 feet long and weigh approximately 2 1/2 tons.

After setting the 12 1/2 inch casing, tools were drilled 38 feet below the bottom of the 12 1/2 inch pipe, and at that time the bottom joint of the pipe collapsed above the tools. This joint of pipe closed so tightly that it was im-

possible to pull the tools up through the pipe necessitating the cutting of the 7-8 inch steel cable by which the tools are handled. This string of 12 1/2 inch casing weighs 35 1/2 tons, and the collapsed joint being flattened out of round made it necessary to cut off the bottom joint. The other 69 joints of pipe were raised out of the well, unscrewed one at a time and saved in perfect condition. After raising the joints a spear was run inside of the pipe and expanded to take a grip by which the joint might be raised out of the hole. Much trouble was experienced with the result that the casing spear would not take hold. It was then necessary to take an impression of the trouble. An impression block made of wood with a soft substance on the lower end was run into the hole on the tools until it struck the joint. The stunt worked so perfectly that the impression made by the pipe in this soft material showed that the pipe was split endways, which caused a further splitting when the inserted spear was expanded. For that reason the spear was unable to secure any hold on the pipe. As a consequence special tools, which have not yet arrived, were ordered from the States, by which the pipe may be worked into its normal round shape. If successful, a tool gripping both inside and outside may be used. In the event that these tools fail it is probable that this troublesome joint of pipe will have to be broken up by the drilling tools and taken out in small pieces.

In jobs of this kind such trouble is not uncommon and particularly in the first test well in vicinities where no drilling had been done before. No doubt some would be led to inquire, if such things are uncommon why not have the proper tools on hand to meet these emergencies? The answer is that different size fishing tools are used on each size hole. No body could tell in advance in which size hole the trouble would be encountered. Casing now on the island ready for work is of six sizes, therefore if a complete set of fishing tools was purchased for each size hole, the amount of money required would be large, and perhaps trouble would occur in another size irrespective, and in that event the money invested would be wasted. Consequently it is common to bring with an outfit only the most commonly used tools, leaving the others to be purchased, when the need arises.

The above mentioned tools which have been ordered are expected in ten days or two weeks, and until their arrival the work of drilling at the island will be shut down.

Mr. Stuntz further stated that so far in the drilling of this well no minerals have been encountered. He has no formations that would have any bearing at all on a possible discovery have appeared; neither has any discouraging feature been encountered, other than that at 1375 feet they stopped drilling in a formation of red sticky clay. It was hoped that this red bed formation might have been found to be thinner, but as a matter of fact nothing as yet has any direct bearing. Whether or not oil or natural gas exists in commercial quantities is the same probability it was before drilling started.

The company came here, Mr. Stuntz make a thorough test to ascertain whether or not oil or gas in the above mentioned quantities were present, and have the material on the ground which should enable them to go some 3500 to 4500 feet, should it be necessary to do so.

Summerside Business College

You Can Enter Any Day.

Mall Courses Guaranteed, J. Pogson, Prin.

THE WESTERN GUARDIAN

—GUARDIAN OFFICE.—The Guardian's Western Office is now located in the McNeill Building Water St., Summerside, where subscriptions, news or advertising will be received. The phone number is 233.

—FOR LATE WESTERN NEWS.—Page 3 is available.

—GUARDIANS ON SALE at the Guardian's Western Office in the McNeill Building, Summerside every day.

—NOTICE OF MEETING.—A congregational meeting of Trinity United Church will be held in the Hall at Malpeque on Wednesday evening March 24th at 7.30. If weather is unfavorable meeting will be held Friday evening, March 26th. 8313

—WANTED by the 10th of April a first class cook. Apply giving references and salary expected to Queen Hotel, Summerside, P. E. I. 3-23-31

—DANCE.—Come to the dance in Traveller's Rest School Thursday, March 25th. Ladies' with lunches free. Gentlemen, fifty cents. 8322-24311.

—TOWN COUNCIL.—The weekly meeting of the Town Council was held on Monday night with The Mayor, Councillors Schurman, McCall and Phillips present. On account of the absence of the full board several matters to have been taken up were left over. It was decided to raise the tax on outside labor to \$3.25. On next Monday night the meeting will be open to citizens for a discussion re the new Street programme.

—VISITING.—Mrs. Ernest Wright, Middleton, and her two daughters Rosamond and Bernice were visiting in Summerside last week. Mrs. Wright is in receipt of a letter from her sister, Miss MacKinnon, Graduate Nurse of Boston who is making an extended visit to Mexico, Texas, Arizona and California and will return by way of Chicago visiting many other places on the way back. Miss MacKinnon graduated in Boston and received a course in the Royal Victoria Hospital, Montreal, her many friends will wish her a pleasant trip.

—BEDEQUE BAPTIST.—Pastor (Sunday March 23) Dr. Sides will preach: Belmont 11 a. m.; Central Bedeque 3 p. m. and Upper Freetown at 7.30 p. m. At Freetown the Bedeque Glee Club will render at Easter Church Service. All are cordially invited to enjoy this musical treat. Delegates to the Baptist Quarterly to be held in Bedeque on March 29 and 30th will be met at all trains at the Freetown station on Monday, the 29th.

—BOWLING.—Great interest is being maintained in the Summerside Bowling League and the night of each match sees a big crowd of interested fans on hand to watch the proceedings. On Monday night the St. Pats (perhaps because it was in the octave of the feast of their Patron Saint) threw a wrench into the heretofore smooth-running machine of the Crystal Bowling Team by defeating them by the decisive score of 4 points to nil. Additional interest is being created this week by the splendid prize of a 5 lb. box of Neilson's Chocolates which has been generously donated by Bill Bridges for the 3 highest strings rolled during this week.

—PERSONALS.—Mr. Nelson E. Owen, Hamilton, is visiting friends in Bedeque and New Annan.

—Misses Marie and Edna Campbell Bedeque have been visiting at Malpeque, the guests of Mr. and Mrs. Herbert Ramsay. They are now visiting their sister Mrs. J. W. Waugh, New Annan.

—Miss Robina Glover, Stanley Bridge, and Miss Hazel Baker, Freetown, crossed on the Car Ferry Monday morning en route to

—HOCKEY.—In a fast and exciting game of hockey played in the Georgetown rink on Thursday evening, March 18th, the Morrell Dreadnoughts went down to a 7-0 defeat before the Georgetown Vics. The locals all played championship hockey throughout the three periods and the final issue was never in doubt. The visitors did not seem to put up the same showing as they did here in previous years, only in the last period did they come anywhere close to their former place. Coffin however still shone as the cool, smiling custodian of the other years admired by friends and foes alike, loosing—true—but not the smile, Martell in the local's net too was on the job earlier in the evening he made a prophecy and at intervals throughout the game high o're the heads of the combatants sounded his war-cry. "You can't get a bean in" but Paddy was not to remain a prophet for long soon after the game, he put in many, ah very many "beans." Score by periods, Vics 2-4-1. Morrell 0. Frank McLean Referee. A.

—PERSONALS.—Mrs. B. C. Cox of this City spent Sunday in Souris the guest of her son, A. C. and Mrs. Cox.

—Mr. A. McConnell the popular traveller from Truro, was a guest at the Sea View Hotel Souris for the week end.

—Mr. Trenton Creamer, student at St. Dunstan's University is spending a few days home with his father George and Mrs. Creamer.

HAMILTON'S Cream Sodas

Ask for Hamilton's, then you are getting the original CREAM sodas!

New Brunswick where they will visit friends and relatives before they return.

—Friends will be sorry to learn that Mr. Oliver Carver, formerly of Summerside and son of Mr. and Mrs. James Carver is seriously ill in a hospital in Boston. His mother is with him and friends here will anxiously await word of his recovery.

Eastern Guardian

—EASTERN AGENT.—Mr. J. W. Murdoch is now Guardian agent in Montague and will be pleased to receive news items, advertising, job printing, new and renewal subscriptions.

—SUCCESSFUL TENDER.—Mr. Stephen H. McAulay, Souris Lime Road, was the successful tenderer for the construction and erection of the new St. Margaret's Church. The bid was \$15,424. Congratulations.

—CLEAR SPRING NOTES.—The concert and pie social which was held in St. Margaret's Hall on St. Patrick's night was a decided success. There was a fine programme which consisted of duets, songs, step dancing, and excellent music by the Progressive Orchestra; after which there was a sale of pies and baskets. One basket donated by the Progressive Whist Club of Big Pond and Black Bush under the direction of Chester McDonald, Clear Spring, netted the handsome sum of \$100.00, being the money realized on a series of whists and dances held during the winter. Mr. McDonald is to be congratulated on the success of his efforts. All these dances not only helped out the Church Fund but helped pass away the long winter evenings very pleasantly.
