

AN OPEN LETTER

To all Sufferers from Anaemia and Kindred Troubles.

Mr. Wm. Wilson, of Sarnia, Tells How He Regained Health After an Illness of Over Two Years.

Mr. William Wilson, who is well known to the citizens of Sarnia, Ont., writes: It affords me much pleasure to be able to add my testimony to the great benefit that I have derived from your famous Dr. Williams' Pink Pills. It is now a little more than two years since I became afflicted with anaemia. During that time I have received almost continuous treatment from medical men of the highest rank in their profession, yet apparently deriving no benefit. Indeed I continued to grow worse until I became unable to walk. I came to the conclusion that I was deriving no benefit from the treatment and decided to give it up. It then was the question, what shall I try? Having read the testimonies of so many who had suffered in a similar manner and who had received great benefit from your Dr. Williams' Pink Pills, I decided to give them a trial.

It is now about three months since I commenced to take your pills and to-day I feel almost restored. Two weeks after I began to take the pills my flesh looked like wax, and my face, feet and legs were badly swollen. These conditions have all disappeared and to-day my color is natural and my blood vessels full of good rich blood. It will afford me pleasure to recommend Dr. Williams' Pink Pills to any one suffering from anaemia or kindred ailments.

Dr. Williams' Pink Pills are praised amongst the highest in the land, as a strengthening and tonic medicine, whether men, women or children. They are like other medicines, nor can they be tated, as is sometimes dishonestly tended by dealers who offer substitutes, e that the package bears the full name, Williams' Pink Pills for Pale People, and in case of doubt send direct to Dr. Williams' Medicine Co., Brockville, Ont., who will supply the pills post paid at 20c. per box or \$2.50 for six boxes. These pills cure all disorders which arise from impoverished blood, such as muscular weakness, loss of appetite, shortness of breath, pains in the back, nervous headache, early decay, all forms of female weakness, hysteria paralysis, locomotor ataxia, rheumatism and sciatica.

One Regret Of The Short Crop.

Toronto, July 4.—As the result of the short crop in the North-West it is reported in railway circles that the Northern Pacific Railroad has cancelled an order for \$300,000 worth of freight cars.

NEW Mown Hay is sweet smelling and of source of honest profit, but pneumonia—a room a cough is neither pleasant or profitable, so insure with 25c. with a bottle of Adams's Botanic Cough Balsam, 25c. all Druggists.

Farm for Sale.

400 acres very fertile land off southern portion of the Warren Farm—about 18 chains wide and 55 long—about 15 acres clear and in a high state of fertility. 10 acres ready to stump. OFFICE TO LET.—A comfortable office in the Stamper Block. Apply to Provise Bns. 11

PRINCE EDWARD ISLAND THE SCREW PROPELLER.

And Its Attractions to Tourists.

Prince Edward Island's summer climate is delightful, and the scenery is beautiful and quietly picturesque. Surrounded by the Gulf of St. Lawrence, it enjoys all the coolness of the sea breeze. And the advantages that can only be derived from sea bathing, at about 65 degrees.

Charlottetown has over 12,000 inhabitants, and is the capital. It has many great retail stores, besides a large wholesale trade. It has a Gas Light and Power Company, two Electric light plants, and a street railway is in embryo. It has a first class water works and sewerage system. It is famed for its wide and shaded streets, its many pleasant drives, the principal of which is the new Park Boulevard, its attractive surroundings, pure water, and clear, cool and bracing air. It is widely known as one of the healthiest cities in Canada. It has two hospitals, many churches and a large and elegant new Opera house. It also has several fine public buildings and a market which is one of the chief sources of the citizens' pride. It has one of the largest and best equipped pork-packing establishments in the Dominion. On its west side is Victoria Park—a favorite summer resort—while on the east are the magnificent new Exhibition Buildings and Driving Park. Chief among its public squares is Queen Square in the centre of the city, beautifully laid out with blooming plants of every description, fountains, and well arranged walks, and enlivened with a band of music during the summer evenings. The rural scenery in the vicinity of Charlottetown is charming, and horses for driving are abundant at very low prices. Boats can also be hired, and steamers run regularly on the bays and rivers, affording most pleasant excursions. The principal hotels are Davies, Queen, and Revere.

Summerside has about 4000 inhabitants. It is situated on beautiful Bedeque Bay. It has the largest and finest departmental store in the Maritime Provinces, besides having other large retail stores. It has an Electric Light Plant, and a water works system and sewerage are being agitated for. The hotels are—Clifton, Russ and Campbell.

Georgetown and Souris have a population of about 1,000 each. In the former are the Aitken, and Tapper hotels and in Souris the Sea View.

At Cape Traverse, a very pleasant summer resort, is the Landsdowne hotel; in Alberton, the Albion Terrace and Wismer; in Tignish the Railway and Bellevue; in Kensington, Clark's and Commercial; in Montague, McDonald; and in Mount Stewart, Clark's and Manson's.

The following hotels open for the summer season: At Hampton, Pleasant View; at Stanhope, Mutch's and Cliff; at Brackley Point, Shay's; at Rustico, Seaside; at Malpeque, North Shore; at Tracadie Beach, Acadia; at Alberton, Seaforth; and at Pownall, Florida.

In addition to those already mentioned there are other towns and villages in the Province with hotel accommodation, while many farm houses prepare for the reception of tourists. The rivers and streams teem with trout, the bays with mackerel, while game of every description abounds.

Dr. J. H. Ayers,

DENTIST. OFFICE—Sunnyside. New Prowse Block. First door to the right up stairs. Satisfactory Work. Reasonable Prices.

Has Reduced Atlantic Voyage From Twenty to Six Days.

The screw propeller is very simple in principle and construction, and yet it is so effective that no substitute for it is likely to be found for many a decade to come. In operation it is the windmill reversed. The propeller consists of a shaft projecting from the stern of the ship and terminating in a set of blades usually three or four in number, all placed at the same angle. The shafts are revolved by means of the ship's engines, and the resistance developed by the propeller blades revolving in the water drives the vessel forward. If a ship were firmly fastened so that she could not move forward and the engines were kept in motion, the move-

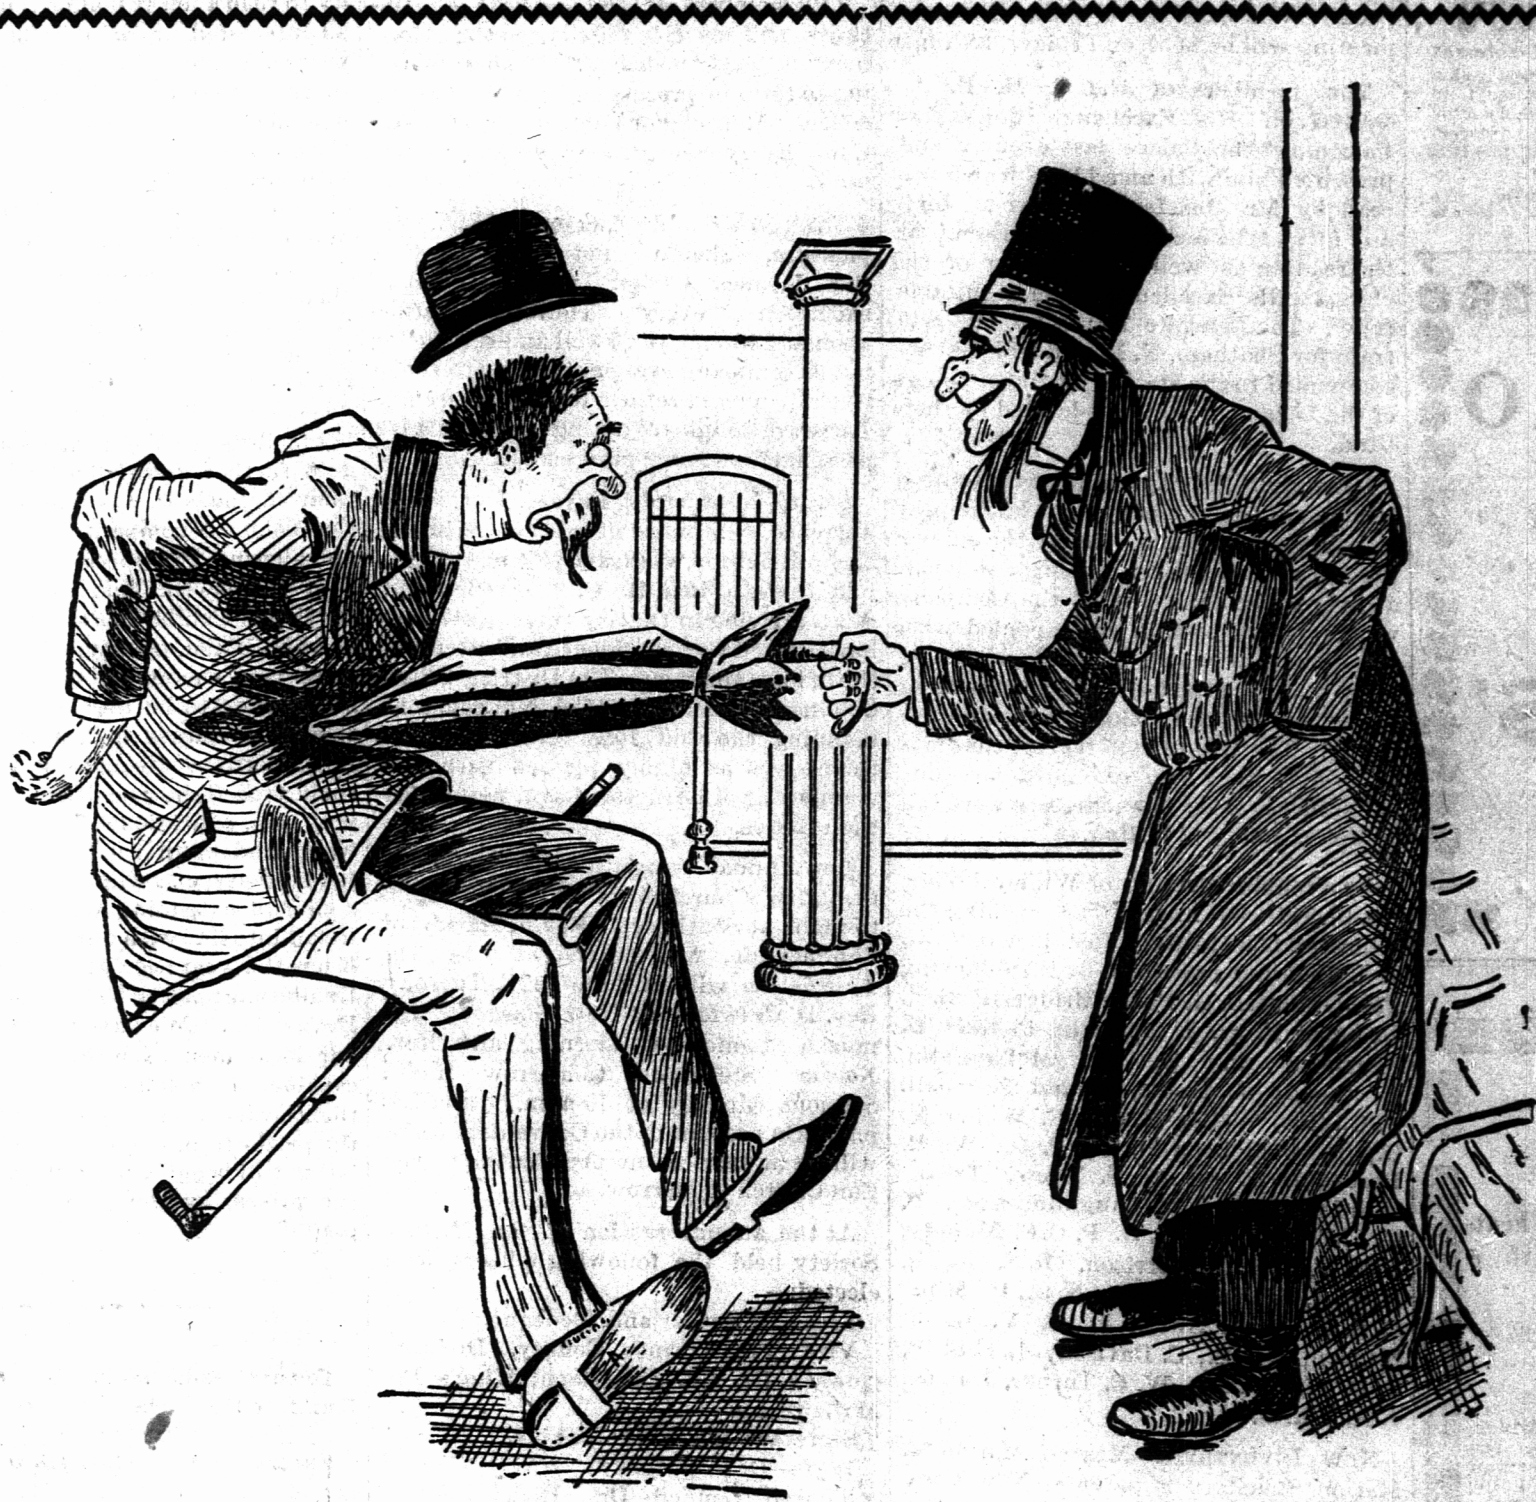

ment of the propellers would develop a powerful current in the water astern. Where it is a question of the relative resistance of the ship's bulk and the water, that of the water is always greater, and owing to the fact that the power is applied directly at the stern there is less loss of energy than in the case of side wheels. Especially is this true in ocean navigation, where the rolling of the vessel from side to side were to lose their grip of the water. The adoption of the screw propeller immediately reduced the time of an Atlantic voyage from twenty days to about fourteen days.

In comparison with the size of the great ocean steamer, the dimensions of the propellers which drive her through the water at the rate of twenty-five miles or more per hour seems hopelessly inadequate.

For instance, if one stands beneath such a ship when she lies in dry dock and looks up at her great height, and along her hundreds of feet of length it seems impossible that the propellers can fulfil their task. As a matter of fact however, their efficiency depends upon the speed with which they are revolved rather than upon their size. Nor are they small in themselves. The propellers of a steamship of the largest size together with the stern tubes in which they are carried, weigh close to 100 tons. Moreover they are one of the most expensive portions of the ship. The propellers are so essential to the ship's progress that they are made of the toughest metal obtainable. Nicked steel was formerly employed for this purpose, but at the present time Manganese bronze is the favorite material. Manganese bronze costs in the neighborhood of \$800 per ton, and this makes the total cost of a pair of three bladed screws amount to \$50,000 or \$80,000.

Feeds 5,000.

Alphonso Vassallo, manager of the hotels and dining rooms for the Dominion Iron and Steel Co., writing under date of June 29th, states that he averages to feed 5,000 at each meal. He also states that Dearborn's "Perfect" baking powder is the best he ever used. Mr. Vassallo is a member of the Universal Cookery and Food Association of London, Eng.—St. John Sun.

DYSPEPSIA gives one about as pleasant a feeling in the pit of the stomach as that experienced when a facetious friend displays his geniality by digging you violently in the epigastric region with his umbrella. Hutch Tablets, chocolate coated, relieve that awful distress, caused by an imperfect digestion, instantly. They assist and promote the secretion of the gastric juices, facilitate assimilation, and being slightly cathartic, entirely remove from the intestines any objectionable matter which may militate against one's health. No other dyspepsia treatment follows so absolutely nature's dictates. Sealed in glass. Put up conveniently for a gentleman's watch pocket or a lady's chatelaine. Hutch Tablets insure a regularity of treatment not to be attained by liquid medicine. You have them with you always.

Tea Hutch Ten Cents. All druggists, or by mail from The Woodward Medicine Co., Limited, 11 Colborne St., Toronto.
