YOUR GROCER HAS THIS SUNNY WAY TO BETTER HEALTH

Check Common Constipation with a Delicious Cereal

Food has a lot to do with how you feel and how you look. For instance, you need plenty of "bulk" with your meals to avoid the risk of common constipation.

This ailment frequently causes headaches, loss of appetite and energy. Yet, in most cases, it can be overcome pleasantly and safely by eating a delicious cereal.

Kellogg's ALL-BRAN furnishes "bulk" in convenient and concentrated form. Laboratory tests show the "bulk" in ALL-BRAN is safe and effective. In fact, it is much like that found in leafy vegetables.

Within the body, the fiber of ALL-BRAN absorbs moisture, and forms a soft mass. Gently, this clears out the intestinal wastes.

In addition, ALL-BRAN provides vitamin B and iron.

Isn't this sunny way better than taking patent medicines—so often harmful? Two tablespoons of ALL-BRAN daily are usually sufficient. Chronic cases, with each meal. If seriously ill, see your doctor. ALL-BRAN makes no claim to be a "cure-all."

Enjoy ALL-BRAN as a cereal, or cook into appetizing recipes. Be sure you get Kellogg's ALL-BRAN. It contains much more needed "bulk" than part-bran products. In the red-and-green packages. Made by Kellogg in London, Ontario.

MRS. THOMAS HEANEY. NOTRE DAME ACADEMY

These passed peacefully away at her home in Clinton on February 30th, Mrs. Jennina Heaney, widow of the late Thomas Heaney. Mrs. Heaney suffered a paralytic stroke some months ago, from which she never fully recovered. As a mother she was very kind, considerate and affectionate, and was highly respected by all who knew her.

Mrs. Heaney was born at Stanley Bridge in the year 1852, her maiden name being Jennina Pickering. One brother William survives her, of a family of twelve. Also two daughters, Mrs. Hartford Woodside, Victoria, and Mrs. Dan Champion, Manson, Maine. Four sons, Edgerton in the Post Office Department, Westley and Arthur at home.

The funeral held in Margate Church was largely attended, conducted by her pastor, Rev. G. N. Somers. Music was furnished by the choir. The hymns sung were: "Jesus Lover of My Soul," "Unto the Hills do I Lift Up My Longing Eyes," "Nearer My God to Thee."

The pallbearers were: Westley Heaney, Ernest Pickering, George Mayne, Hugh Glover, Edison Heaney, and Louis O'Connor.

Wild Mustard And Wild Radish In Seed Grain

(Experimental Farm notes from the Charlottetown Experimental Station)

Wild Mustard is one of the commonest and most injurious weeds of the mustard family. It is an annual and grows to a height of from one to three feet. The flowers are yellow seed pods are from one to two inches long and are slightly constricted between seeds. Each pod contains fifteen to seventeen seeds and, when ripe the pods split leaving most of the seed on the ground at harvest time. This accounts for the rapid spread of the weed in grain crops. Under favorable conditions the seed germinates very rapidly but otherwise it will remain dormant and retain its vitality for many years. If seed grain is carefully graded wild mustard seeds will be eliminated.

Wild Radish, generally speaking is very similar to wild mustard, but may easily be distinguished by the seed pods. In wild Radish these pods are deep constricted between seeds and when ripe break crosswise at the constrictions. The seeds do not shell and, being enclosed in a section of the pod, cannot be separated from the threshed grain.

Both of these weeds increase very rapidly and if allowed to spread will soon cause a serious decrease in grain and root yields. If wild Mustard and wild Radish become established in a field it is almost impossible to eradicate them and the sale value of infested land is considerably lowered.

During the past few years these weeds have spread very rapidly in many localities. This spread is due largely to the use of seed grain obtained from districts in which the weeds are prevalent. For this reason farmers should be very careful to see that any seed or feed grain they may purchase is free from all noxious weeds and particularly wild mustard and wild radish. Under the Seeds Act, only two grades, Registered No. 1, and Registered No. 2, are free from noxious weeds and when buying grain other than these grades the purchaser must depend on his own initiative. If contemplating a change of seed to be obtained locally, observations and enquiries should be made during the growing season. All persons interested in the agricultural progress and welfare of their communities should make every effort to prevent the spread of wild mustard and wild radish through the medium of seed grain.

Beausejour Occupies Prominent Place Among National Parks

Among the national parks of Canada none occupy a more important place historically than Fort Beausejour, on the narrow neck of land connecting the province of New Brunswick and Nova Scotia known as the Isthmus of Chignecto. Here in 1765 really began the conquest of Canada by the British. Assisted by British regulars on land troops from New Zealand stormed the fort and captured it after they landed in boats.

The Treaty of Utrecht, 1713, attempted to define the boundary between what was considered as Canada and Acadia. The French maintained Acadia included only the province of Nova Scotia and the peninsula of the Gulf of St. Lawrence which is situated between Amherst and Sackville, marked the boundary, whereas the English maintained that Acadia included New Brunswick, a part of Maine and Prince Edward Island.

The colonial authorities in Massachusetts were fully aware of the importance of controlling the Isthmus of Chignecto in any attempt toward the conquest of Canada for we find Governor William Shirley writing to the Duke of Bedford in 1749 as follows:—"The French are determined to obstruct the British settlement in Nova Scotia as much as possible, especially in Minas and Chignecto, which are districts absolutely necessary to be secured, and that the making of English settlements there will be no slight work, nor will be without a regular fort strongly garrisoned between Bay Verte and Beaussejour, and that I cannot but look upon the point now in dispute—the boundary line—as what must finally determine the mastery of the continent between the French and English. That his prediction was correct is proved by subsequent events.

A peculiar coincidence occurred between this first effort in the final conquest of Canada and the closing chapter enacted upon the Isthmus of Chignecto in 1765. M. de Champlain Vergor was in command at Fort Beausejour when it capitulated and he was also in charge of the sentries on the night Wolfe's army climbed the steep cliffs to gain the heights before Quebec.

A tradition of the portion of Fort Beausejour remains and from time to time old muskets, swords, cannon and other relics are dug up and placed in the museum close by. The line of the Canadian National Railways runs across the foot of the glacis and a short distance from the fort, the earthworks of Fort Lawrence, on the Nova Scotia side of the Missisquoi, which was constructed by the British in 1760. The Missisquoi now marks the boundary between the provinces of Nova Scotia and New Brunswick.

From the top of the fort a magnificent view is had of Cumberland Basin and the Miramichi and the sea. The marshes of the "Fantasia" described so hauntingly in the poem of Charles D. Robb, "The Road to Beausejour," are not far from the ruins of the fort, high up in the bluff, is an old bell which still summons to worship as it did the early Acadians in the long ago before the tragic siege commemorated in Longfellow's poem "Evangeline." The bell in which the old bell is hung is part of St. Mark's Church and on the bell is the date 1734 with an engraving consisting of a delicate scroll and the fleur de lis.

On the capture of Fort Beausejour the Acadians were gathered from the surrounding country, placed on ships and transported to the vicinity of Grand Pre from where they were carried to Massachusetts, North Carolina, Georgia and Louisiana. Two years ago their descendants, the Acadians, visited the fruitful meadows of Grand Pre and trod over the same ground where many of their forebears tilled the soil and gathered in the fruits of their labors. Some few strayed to the surrounding woods and returned later to start life anew followed by a band of eight hundred strong who tramped from Massachusetts through the Maine woods, braving the rigors and hardships of the journey to settle anew in the land of their forefathers. The city of Moncton contains the greatest Acadian population in the Maritimes and there are settlements in Prince Edward Island, around Cheticamp, Cape Breton, Nova Scotia, and around Pictou on the south shore of that province.

To properly get the story of the Acadians and the conquest of Canada one must be conversant with the story surrounding Fort Beausejour which will be greatly enhanced by a visit to the old fort.

Caribou Plentiful In Gaspe Section

(Special to The Guardian)

MONTREAL, Que., March 31—Caribou are rapidly increasing in the Gaspe section of Quebec, stated Mr. C. E. Howard, head of the Canadian National Railway Fish and Game Branch, basing his statement on reports received from outfitters through the territory. Gaspe peninsula is the only district in Eastern Canada where caribou hunting is now permitted and this section was only opened to hunters two years ago after a closed season of five years which affected the entire province of Quebec.

In the York River area of the peninsula one trapper reports that caribou are more plentiful than for many years before the closed season was imposed. Some notable caribou heads have been secured in Quebec since hunting of these animals again permitted.

"The world has never seen a more striking example of unquestioning fidelity than shown by my associates."

"One of your most prominent colleagues, for instance, it is sometimes said with reference to the men most closely associated with you that they are contriving to take your place."

"The Chancellor's face lit up. Images of various men who have been his close co-fighters seemed to pass in review and he was evidently pleased at the picture conjured up in his mind's eye."

"I know you are asking this question for the sake of clarifying my relations with my co-workers, and not because you yourself doubt their fidelity," he said simply.

"For it would be nothing short of an insult to think any man who have stood with me year after year are being animated by any desire to supplant me."

"The world has never seen a more striking example of unquestioning fidelity than shown by my associates."

"The reason, perhaps, such stories arise lies in the fact that I have associated myself not with zeros but with real men."

"Zeros are round, hence they are the first to begin to roll and tumble when adversity comes."

"Then men about me are four-squares and upstanding men—each of them of a powerful personality, each of them a man with will and ambition."

"If they had no ambition they would not be where they are today."

Welcomes Ambition

I welcome ambition. When you have a group of powerful personalities it is inevitable that occasional friction is produced.

"But never yet have any men who follow my leadership sought to impose their will upon mine. On the contrary, they have adapted themselves marvellously to my every desire."

Then the Chancellor, clad in the simple brown uniform of a Naal Storm Trooper, spoke of his objective—"A greater, better, happier Germany"—the "unflinching tenacity" with which he said he would pursue his ideal, the frankness with which he deals in international and domestic affairs, his desire for criticism, his remarks, made now in a light, now in a tense, voice, contained many startling, pithy epigrams:

"I believe heartily in the man-to-man discussions of responsible statesmen."

"I never place my demands higher with the idea of compromising for less."

"Under no circumstances will I submit to dictation."

"Nobody would rather have seen the world disarm than I."

"I cannot have Germany exposed to the possibility that some neighbor may invade us."

"We want to become a nation with the highest possible standard of living."

As a Diplomat

On international relations he said: "The antiquated diplomatic method of exchanging notes finds that, despite the efforts of diplomats the nations slipped into the most gigantic war in history. Although I am convinced the diplomats themselves were the most surprised when the war broke out."

"I believe heartily in the man-to-man discussions of responsible statesmen. One thing that every representative of a foreign power will find in dealing with me is that I speak with absolute frankness and never place my demands higher with the idea of compromising for less."

"I declare only just what Germany is prepared to do. When I state we need an army of 300,000 men, I don't propose afterward to come down to 250,000. I want Germany's signature to mean something again."

"And under no circumstances, he repeated the words with emotion, his index finger pointing straight at me, will I submit to dictation."

"When I am convinced that a certain course is the only one and the right one for my nation I intend to pursue it come what may. I will do what I do openly."

Explains Why

"We want to put our resources to productive purposes. We want to get our jobs back to work. Next, we want to raise the living standards of everybody."

"We want to drain our swamps and improve our unproductive lands, try and make our national self-sustaining enable the farmer to get the maximum out of his land and the manufacturer and industrial worker the maximum out of his industry, devise artificial means

Roosevelt Visits Nassau

(C. F. Cable via Bahamas News Service by Guardian's Special Wire)

NASSAU, Bahamas, March 30—The British Warship, H. M. S. Danae gave a Presidential gun salute to President F. D. Roosevelt of the United States as he arrived at Nassau Harbor today aboard Vincent Astor's yacht, the Nourmahal. The presidential party is here for some fishing among the outer islands. This is the second time that President Roosevelt has visited the Bahamas. Early last year, a few days before his inauguration, he came to the colony for 10 days of fishing, also as the guest of Mr. Astor. Sir Bede Clifford, Governor of the Bahamas, paid a call to the Nourmahal shortly after its arrival and obtained for some time with the President and other members of the party. Roosevelt stood on the bridge of the yacht with Astor as the salute was fired. H. M. S. Danae is in port here for a few days.

MEET OUTER HAZARDS with

inward RESISTANCE

Avoid common ills this Spring. Build up your resistance with Vitamins D and A. Physicians say that "Vitamin A helps maintain the first line of defence against bacterial invasion."

Agd there is no more pleasant or effective way of obtaining an abundance of these precious vitamins than by taking Squibb ADEX Tablets-10D regularly every day.

The only concentrate made from halibut and cod-liver oil and vitamin, every ADEX tablet contains 1500 units of resistance-building Vitamin A, 2450 units of the sunshine Vitamin D.

Ask for Squibb ADEX Tablets-10D at any reliable drug store.

SQUIBB ADEX TABLETS-10D

Bottled Squibbs. Regularly every day for the children. Squibb Cod-Liver Oil. Squibb's is vitamin-purified—a single teaspoonful of Squibb's contains many times as much Vitamin A and D as ordinary "bottled." Always ask for Squibb Cod-Liver Oil. Plain or mint-flavoured.

ISLAND MAN LOST HIS CASH IN TRURO

TRURO, April 1—Brennan McNally, South, P.E.I., en route from this place to his home this morning, and who had been about town for some hours, complained to the police just before he left that he had lost \$47, but was unable to say, so it was understood, just how he lost it. The matter is being investigated.

Chinese Royalty Visits Halifax

(C. F. by Guardian's Special Wire)

HALIFAX, March 30—Wearing European clothes of the latest Parisian fashion, a Royal Princess of Imperial Manchou dynasty stepped ashore today from the Canadian Pacific liner Duchess of Richmond. With the Princesses Jonho, who is the second sister of Emperor Kang Teh, of Ta Manchu Tlkuo were her husband, T. H. Cheng, until recently a student at London University, and their tiny daughter.

Though she speaks English perfectly, the Manchukuo Emperor's sister left to her husband the task of answering reporter's questions on their arrival. "I had a pleasant voyage across, though I am not a good sailor, and it will be pleasant to see Canada. We have not been here before, were the only remarks the smiling dark-eyed little Princess vouchsafed."

Mr. Cheng said that since their marriage he and his family have lived in London, where he has for the past few years been a student in Arts at London University.

Gaspe peninsula is the only district in Eastern Canada where caribou hunting is now permitted and this section was only opened to hunters two years ago after a closed season of five years which affected the entire province of Quebec.

Roosevelt Visits Nassau

(C. F. Cable via Bahamas News Service by Guardian's Special Wire)

NASSAU, Bahamas, March 30—The British Warship, H. M. S. Danae gave a Presidential gun salute to President F. D. Roosevelt of the United States as he arrived at Nassau Harbor today aboard Vincent Astor's yacht, the Nourmahal. The presidential party is here for some fishing among the outer islands. This is the second time that President Roosevelt has visited the Bahamas. Early last year, a few days before his inauguration, he came to the colony for 10 days of fishing, also as the guest of Mr. Astor. Sir Bede Clifford, Governor of the Bahamas, paid a call to the Nourmahal shortly after its arrival and obtained for some time with the President and other members of the party. Roosevelt stood on the bridge of the yacht with Astor as the salute was fired. H. M. S. Danae is in port here for a few days.
