Engineer Corps, when seen at the Windsor last evening. "The people of Japan, contrary to what the people of the eastern nations think, are a peace-loving people. They are prosperous now, and do not wish to be mixed up in an international tangle. The recent war scare was due to a lot of professional agitators to whom none of the better class of my people pay any attention. Yellow journalism is responsible for a great deal of the war talk," concluded the visitor.

Mr. Tomita has been sent to this country by his government to study engineering work done here. He is specially interested in tunnel and bridge work, and, according to him, the Japanese officials believe this is a good country to get pointers from. The visiting engineer spent three weeks in New York before coming to this city.
