

# A HOME CURE.

Consumptives Need not Leave Their Own Homes to be Cured.

The Slocum System of Treatment is Offered you Absolutely Free.

A consideration not to be overlooked in the treatment of consumptives is the expense in quest of health. Some of our medical men are now advising their patients to go long distances in the hope that change of air will do them good. A lot of solemn nonsense is being said, and written, about change of climate, and its influence on the patient. "Stick to low altitudes," says one. "Go the mountains," says another. How is a poor perplexed sufferer with sore lungs, to decide among these different authorities? The art is people die of consumption in all climates. They recover from it too, in all climates if they are treated properly. The only positive cure for the disease is to kill the germs that produce it. This is accomplished under the Slocum system of treatment. The disease must have nothing to feed on. That is the principle underlying the Slocum system. You can try it at your home.

**POSITIVELY FREE.**  
Of your sick friends can have a FREE course of treatment. Simply write to THE T. A. SLOCUM CHEMICAL CO., Limited, 179 King St. West, Toronto, giving post office and express office address, and the free medicine (The Slocum Cure) will be promptly sent.  
When writing for them always mention this paper.  
Persons in Canada, seeing Slocum's free offer in American papers will please send for samples to the Toronto laboratories.

## EYES OF ALL NATIONS.

France has one blind person to every 500 inhabitants. In Egypt twenty one natives were killed because of defective vision, during the first week's operations of an electric railway.  
In Germany and England there is one blind person to every 1,000. China has more blind than all other countries. Spain comes next. America averages only one in every 1,500, the lowest per cent of any country. This is explained in the fact that scientific adjustment of glasses has reached its greatest perfection in this country.  
Many eyes have been saved through the timely use of glasses. We test eyes for glasses. Any eye we cannot fit should have the attention of a doctor who is an eye specialist.
