

PEPS

will promptly STOP your CHILD'S COUGH

WHEN a child starts coughing, mother's duty is to give the little sufferer a Peps tablet, and thus prevent any weakening of the lungs. As the tablet dissolves in the child's mouth, the soothing medicinal fumes given off pass through the tender breathing passages straight to the lungs and bring immediate comfort and relief.

Peps contains no opium or other harmful drugs, and can be given to children of any age, either whole or crushed in tea powder, with the assurance of absolute benefit.

One little Peps at night will clear the breathing passages and let the little one sleep broken by coughing fits. A Peps before starting for school in bad weather is also an invaluable safeguard for the children's throats and chests. All dealers, etc. box.

FREE TRIAL
Send this advertisement of paper and 1c. stamp (for return postage) to Peps Co., Toronto, and free trial package will be sent you.

Western Guardian

—GONE TO BOSTON.—Mr. J. W. Croke, who conducted a lunch room on Spring Street for the last couple of years, has disposed of his equipment and stock, and left on Friday morning for Boston, where he intends to remain. H.

—GONE TO MAINE.—Mr. Edward McKenna, who recently disposed of his farm at Dock Road, Lot 4, left here on Friday morning for Rumford, Me., where he intends to locate for the present. H.

—PRODUCE MOVING.—Traveling conditions on the public roads have improved in the last few days and produce has again started moving to market; roads have again become firm and smooth. H.

—BRIDAL SHOWER.—A variety shower was held at the home of Miss Addie MacMurdo, Kelvin Grove, Friday evening, November 10, in honor of Miss Annie MacMurdo, who has since been the principle of an interesting event. As the clock struck nine Annie was conducted to the dining room by Miss Jean Jardine, and presented with two tastefully decorated baskets of gifts. She was assisted in opening them by Miss Muriel MacMurdo and Miss Jean Jardine, while Miss Carrie Woodside, read the accompanying verses. The large number of gifts goes to show the high esteem in which Miss MacMurdo is held in Kelvin Grove and the surrounding districts. Ice cream and cake was then served, after which games were played and enjoyed by both young and old. After singing "She's a Jolly Good Fellow" and wishing the bride-to-be the future happiness, all departed to their respective homes.

Resume of Agricultural Instruction Work

IN PRINCE EDWARD ISLAND
1913-1922 BY W. J. REID,
B.S.A. DIRECTOR

In the nine years during which the Agricultural Instruction Act has been in effect the province of Prince Edward Island has received from this source the sum of \$279,220.94. This makes an average of slightly less than \$30,000 per annum, and is the amount available in connection with the Act. This grant has been carefully expended in Prince Edward Island for the furtherance of agricultural education and practical demonstration work. The results that have followed such work have been far-reaching in many respects.

In all departments the funds received from the Agricultural Instruction grant were devoted, directly to the work for which they were intended. A considerable part of the various lines for which money was apportioned will give an idea of the value of such work to the province.

Agricultural Buildings and Representations.
The province of Prince Edward Island is divided into three large counties, with a natural centre in each county, which has long been

NR TABLETS

To Give an overtaxed and tired system a night of refreshing rest and a bright tomorrow is the work of NR Tablets. Nature's Remedy keeps body functions regular, improves appetite, relieves constipation. Used for over 20 years.

Chips off the Old Block

NR JUNIORS—Little NRs—One-third the regular dose. Made of same ingredients, then, c. n. d. z. coated. For children and adults.

WINTER COATS

of Exceptional Value

NATIONAL FISH COMPANY LTD.
NATIONAL FISH IS THE NATIONAL DISH

Ironized Yeast Will Ironize Your Nerves

To Produce Great Natural Nerve Strength, Yeast Should Be Ironized and Not Merely Mixed With Iron. There is Only One Ironized Yeast in the World.

Now, Mr. Man, tighten your fist and clamp your jaws. Tighter. Now still tighter. How tight is the tightest you can go? Vitamins and iron in your body made it possible for you to do these two things. If you had still more vitamins, ironized, you could tighten your fist and your jaws still tighter. Ironized Yeast will enable you to do it—because ironized yeast combines concentrated vitamins with natural organic iron, in such strength that it gives amazing power to nerves and organs in half the usual time. It is the most powerful reconstructive in the world today for tired, exhausted men and women. It is not a mere mixture of yeast and iron, but a substance all by itself. Give your nerves the natural food-strength that you need. Natural force. Here it is, Ironized Yeast! This will give you great blood power, great nerve power, an avalanche of energy, brain clearness, stronger muscle, firmer flesh, a clear eye and memory—and you'll smile the smile of health and power. Ironized Yeast is sold at all drug stores, at \$1.00 a package. Each package contains 60 tablets, each tablet sealed. They never lose their power. Harold F. Ritchie & Co., Ltd., Toronto, Sales Agts. Try it. It will prove itself.

County Court

At the County Court house on Thursday, Judge McQuarrie presiding, a paragon of justice, charged with an offence against the prohibition Act, was convicted and fined \$200 and costs or three months. The case of another party from Wellington on a similar charge, was dismissed for want of sufficient evidence. At the Police Court on Friday a young lad charged with breaking and entering was up for trial but was honorably discharged as there was no evidence to show that he was implicated.

Western Personals

—Mrs. J.A. Brennan, of Tignish, is visiting friends in Summerside.

—Mr. John A. Burrows, Wilmot Valley, paid a business trip to town on Saturday.

—Mr. Patrick Kelly, Emerald, was a visitor here during the week-end.

—Mr. Michael Farmer, Kinkora, spent Saturday in town on a business trip.

Demonstration Work

Another important work, the inception of which is due to the Agricultural Instruction grant, is the promotion of land drainage. This has been carried on since 1916. At that time an investigation of soils from several localities were conducted to locate material of a nature suitable for the manufacture of drain tiles, which at that time was not being manufactured in the province. This was found in sufficient quantity in one place to warrant the establishment of a plant. The plant has been operated during the past two years under the direct supervision of the Provincial Department of Agriculture. First estimates made it can be stated that many thousands of acres in Prince Edward Island are in need of under-drainage. This work is being conducted at the discretion of the land owners, and in any case is finding a reliable advocate in its adoption in the one who has had the work done.

Investigations have also been conducted in locating limestone deposits for the use of those who are in need of ground limestone as an improver of soil conditions. This would apply more particularly to the western part of the province where a limestone deposit of some extent exists. At this deposit a limestone pulverizing plant has been installed, and has been in operation for two seasons. The outcome has been the secure recognition of the beneficial effects of limestone, especially when applied to acid soils.

Attention has been directed from time to time to the culture of particular crops for the benefit of those who are making a specialty in some particular line. Clover growing has perhaps received the most attention and, for the benefit of the growers of this crop, two hullers were purchased and placed at their disposal.

Rural Science

This department was established and is being conducted in connection with the Provincial College for the purpose of interesting teachers-in-training in the development of other agricultural activities among the students of their prospective schools. The one in charge of the teaching is also responsible for the conducting of a number of school fairs through out the province during each season. In 1915, three school fairs were held, while in 1922 there were fifty. Each year is showing an improvement not only in numbers but in the interest manifested by teachers and pupils. The work is also responsible for the inauguration of such activities as poultry clubs and, in several instances, pig and cat clubs.

Women's Institutes.
In the Women's Institutes of the province we have one of the most influential organizations for

the educational and social betterment of the community. Their inception and maintenance is entirely due to grants apportioned from Agricultural Instruction funds. The first institute was organized in 1913; in 1922, 62 institutes were in existence. The original object of establishing Women's Institutes was for the giving of instruction relating to domestic economy and its various branches, but they have since developed into a valuable medium for rural organization and social up-building.

Agricultural and Technical School
The establishing of the Agricultural and Technical School was the outcome of the request of many young men throughout the province who were desirous of obtaining instruction in the elementary grades of academic work and in agricultural studies of a practical and particularly scientific nature. The money for the development of this school was apportioned from the Agricultural Instruction grant and from the Dominion grant for Technical Education. The first course was con-

Master WORKMAN SMOKING TOBACCO
