ELECTRICAL REGULATIONS ARE RESCINDED

Government Takes Action On Complaint Of Citizens Regarding Operation Of New Electrical Inspection Rules.

At a meeting yesterday of the Provincial Government the regulations were rescinded which had previously been passed under authority of the Electrical Inspection Act, 1932.

The Act, passed at the last session of the Legislature, had been introduced at the request of the Board of Fire Underwriters for the alleged purpose of minimizing fire hazards and other risks arising from electrical inspection. It provided for conformity to the Canadian Electrical Code of all electrical installation and electrical work done in the province, for the appointment of an inspector, recommended by the Board, to carry out the provisions of the Act, and for regulations by order-in-council governing electrical inspection, the qualification of mechanics and contractors engaged in electrical work in the Province, the issuing of licenses and permits thereto, etc.

Action to rescind the regulations was taken after many complaints had been received and considered from citizens in various parts of the province of alleged inconvenience and expense out of proportion to the benefits received.

(By C. R. Blackburn, Canadian Press Staff Writer)
OTTAWA, Aug. 7.—Direct benefit to those engaged in the Canadian fishing industry is practically assured through the deliberations of the Imperial Economic Conference, it was stated in well informed circles today. With the conference rapidly drawing to a close, and a considerable time having elapsed since the Canadian suggestions were laid before it, there is a strong feeling that the request for a higher preference on fish and fish products within the Empire will be granted. A number of representatives of those engaged in the fisheries as well as government officials

Canadian Gov't. Offers Proposal Re Tuber Embargo

Dominion Will Bear Expense Of Two Experts From England To Thoroughly Investigate The Handling Of The Canadian Potato Crop

OTTAWA, Aug. 15.—(By The Canadian Press)—The Canadian Government is hopeful that the embargo which the United Kingdom placed against Canadian potatoes will be lifted this fall. A new proposal has been made to the United Kingdom delegation. It would provide for British experts coming to Canada to see the potatoes harvested.

The reason given by the British Government for the embargo is the danger of Canadian potatoes carrying the Colorado beetle—the plain, ordinary potato bug into the United Kingdom. When the conference opened the Canadian Ministers at once urged that this embargo be lifted. The contention of Canadian entomologists all along has been that potato bugs are not carried on potatoes shipped in the fall. The bugs burrow into the ground after the tops of the potato die.
