Local Sea Cadets Leave For Camp

Forty sea cadets from the R.C.S.C.C. "Kent" Camp in charge of Lieut. Joseph Gillen left by bus yesterday morning for Camp Brock which is located 30 miles outside of Saint John, N.B.

The exercises of two weeks' duration will provide the youths with all forms of naval training, squad and rifle drills. Although strict discipline is in force at all times, the boys will have ample opportunity for recreation with water games predominating. They were accompanied by their own drum and bugle band.

Also in attendance at Camp Brock will be twenty boys from each of the Moncton and Fredericton divisions.

Other officers of the local corps will go over to Camp Brock before the boys return home on July 19th. Capt. J. J. Connelly, chairman of the local Sea Cadet Committee of the Navy League of Canada and Commanding Officer of the "Kent," John N. Kenny are leaving Friday for the training camp.

The Navy League of Canada which during the war provided fifty bags and other comforts for the men in the naval service, have devoted their principal efforts to the promotion of the Sea Cadet Movement. It is under the sponsorship of the League that such camps are being held.

Boys Camp To Open Wednesday

The Boys' Memorial Camp at North Rustico will get under way Wednesday with about sixty boys attending. Prospects for a most enjoyable outing for the boys is in the offing. Mr. and Mrs. Leo Carragher are now at the camp...

S'IDE R.C.M.P.

(Continued from page 1) erty direction "at very great speed and appeared to land about a quarter-mile from our home. I called to my husband to look but before he understood what I meant, it was gone out of sight. I would say from five to ten seconds from the time I saw it until it disappeared."

James MacLeod, employee on the farm of Mr. J. P. Crockett at Argyle Shore said he saw a strange object in the sky last week with a stream of light following behind.

And from Summerside came a new report. Edward Gallant, King Street an employee at the Hall Mig. and Cold Storage Co. Ltd. said that he saw objects in the sky Sunday night. He went out in the yard at his home about 10.45 for a smoke. The sky was cloudy, with no stars visible. He saw an object flash across the sky, giving off a dull light as though it was being seen through clouds. It was oval shape. It came from the northwest and then about 30 seconds after it disappeared another one flashed back in the opposite direction. He said he saw the object four times before they finally disappeared. They did not follow the same track each time. He heard no noise.

AT SAINT JOHN SAINT JOHN, N. B., July 7.—(CP)—Another "flying saucer" has been seen over Saint John, N. B. time. Mr. and Mrs. William Oram saw the strange object shooting across the sky about 10.10 p.m. tonight.

"It streaked across the sky in a blaze of bluish-white light and disappeared into a bank of clouds in the west," said Mr. Oram. He and his wife were sitting on the porch of their home when Mrs. Oram first saw the saucer high in the sky, travelling at high speed.

"It looked like an oblong ball of light and went very fast," Mr. Oram said. It moved without noise and apparently kept a straight course.

Mr. Oram is an employee of the Marine Branch of the Department of Transport. A similar object was reported over this area last Thursday night.

Congratulates City On Price For Bonds The following letter from Bell, Gouinlock and Co., Ltd., stock-brokers, Montreal, was received yesterday by Mr. James A. Fullerton, city clerk for the City of Charlottetown.

"I thought I would drop you a line to congratulate you on the excellent price the City received for their recent issue. I was at the time the bid you received was at all-time high. But only regret is that our tender was not successful." (Signed) W. G. Pall.

The issue of \$169,000 of three per cent bonds was bought by A. Daley and Co., Toronto, at a price of 102.02. It will be used for general civic purposes.

RCA School At Camp Borden

CAMP BORDEN, July 7.—Representing nearly every university in Canada, 180 officer cadets are now receiving general military training and special instruction in the fighting and maintenance of tanks and armoured cars at the Royal Canadian Armoured Corps School, Camp Borden, Ont.

Adequate pay for serious military training—\$125 per month—is allowed the officer cadets while serving at summer camp. On return to university they will take in addition to their ordinary courses forty hours lectures per year covering military history, science, geography and war economics.

Students enrolled at the R. C. A. F. School include: Craig, C. R. Bedeque, (Mount Allison); MacKinnon, F. V., Charlottetown (St. Dunstons); Mahar, J. J., Charlottetown (St. Dunstons).

Italy — The Government began working out the Italian approach to the conference. Communists gave Italy's participation a conditional endorsement.

Finland — The cabinet met to discuss whether Finland should accept French sources in Paris said Finland had given a "provisional" negative reply "for political and geographic reasons."

Norway, Sweden and Denmark are to confer Wednesday on a common policy.

Game Act And Migratory Birds Cases Pending

The R. C. M. Police game officer dropped in on the Tignish district over the weekend and it is understood that 10 charges have been laid after the patrol that extended from Saturday evening until Monday morning. Six non-resident and two resident anglers were caught fishing without licenses. Three were from Amherst and one each from Sydney Mines, Massachusetts and Maine respectively. The two residents hailed from Tignish and St. Louis.

The ninth who lives near Round Pond, faces dual prosecution. One charge of hunting on Sunday under the Game Act and the other for shooting gulls which are protected by the Migratory Birds Convention Act. In addition he was relieved of a high grade 10 gauge double barreled shotgun. Police have not ceased up in their drive to boost the funds to be made available for game improvement that is floating around in the form of non-resident license money. Fishing licenses may be purchased from all R.C.M. Police Detachments in the Province.

Area Covered By 'Flying Saucers' Is Broadened

The game of spotting "flying saucers" was broadened Monday to include Massachusetts and Vermont as stories about the discs from many parts of Canada and the United States continued to swirl just as rapidly as the objects themselves.

Lewis, a student of the phenomena, ranged from the theory that they were radio controlled flying missiles sent aloft by United States scientists to the suggestion that they might be merely sun light reflected on wing tanks of jet-propelled planes.

With New England getting into the game, the Harvard University astronomical observatory took note of the reports but said it had no luck so far in photographing one.

The mysterious saucers first were reported June 25 in the state of Washington, but Charles T. Hamlet, superintendent of the Kingsport, Tenn., Times News composing room, said on Monday he had seen the discs two years ago.

They were "of a bright, aluminum color" and "were going at terrific speed," Hamlet said, explaining he kept quiet about them because of the Oak Ridge atomic bomb plant, then a war secret.

Lester Bevilow, of Stamford, Conn., internationally-known explosives inventor, advanced the theory that the objects were radio-controlled flying missiles.

Reports persisted that the United States Army was looking into the phenomena but Gen. Carl Spaatz, Army Air Forces commandant, said he knew of no air forces plans to search for them.

The United States Navy and the Atomic Energy Commission in Washington said they had no connection with the mystery.

Charles Odom, 23-year-old former B-17 navigator expressed the theory at Houston, Tex. that the objects might be a version of radio-controlled "crystal balls" used by the Nazis in the war.

These balls, which flew to the altitude of the bomber and apparently were magnetized to fly along with the planes sent back to radar screens data on the bombers, he said.

FOREIGN COMPETITORS

NORTH SYDNEY, N.S.—(CP)—Foreign fishing vessels of more modern design than the craft used by the majority of Newfoundland and Nova Scotia fishermen were expected to provide "serious competition" on the rich Grand Banks members of the Newfoundland National Convention said here.

Held Distinguished Rank As Engineer

Following are additional details of the career of the late Mr. William S. Lea who died suddenly Saturday morning at his summer residence at Senneville, Quebec. Mr. Lea was born at Victoria, Prince Edward Island in 1877 and was educated at Prince of Wales College in Charlottetown and at McGill University. While at McGill he was prominent both as a scholar and an athlete. He was Medalist on graduation in Civil Engineering in 1908 and was a member of the Intercollegiate rugby team. He retained a lively interest in athletics throughout his lifetime and was an active supporter of Montreal teams and players.

After three years teaching experience in the Faculty of Engineering at McGill, followed by two years as Engineer-in-charge of the Department of Waterworks and Bridges of the City of Vancouver, he joined his elder brother in the firm of R. S. and W. S. Lea, Consulting Engineers, until the latter's retirement in 1930. The consulting practice has been continued since 1930 under the name of W. S. Lea.

His advice has been sought by municipalities in every Province of Canada, as well as by Provincial and Dominion Governments and industrial organizations, including many pulp and paper firms and power companies. He appeared as an expert before the International Joint Commission on questions of pollution of boundary waters, of water storage and of run-off control. He was responsible wholly or in large measure for design and construction of large scale sewerage and sewerage treatment schemes for Montreal, Winnipeg and Vancouver; for water supply systems or extensions in these cities and in scores of others; and for hydro electric developments on the Winnipeg River, Lake of the Woods, Coaticook, Pont Rouge and elsewhere. At the time of his death he was

consultant to the City of Montreal on the St. Pierre River Sewage pumping plant design. He was a member of the Engineering Institute of Canada, Corporation of Professional Engineers of Quebec, Association of Professional Engineers of Manitoba, American Society of Civil Engineers, and the American Water Works Association also of the University Club of Montreal, the Senneville Golf Club, and the McGill Graduates Society.

Surviving are his wife, formerly Miss Mildred F. Parkins, of Montreal, and a sister, Mrs. J. T. Windsor of Charlottetown, Prince Edward Island. He was predeceased by a sister and four brothers including R. S. Lea, and the Honourable Walter M. Lea, Premier of Prince Edward Island.

The funeral service will be held at Christ Church Cathedral, Montreal today (Tuesday) at 2 p.m.

Ferry Charles A. Dunning Goes On Service Today

The ferry Charles A. Dunning, rebuilt until she is practically a new ship, goes on the Wood Islands-Caribou route today, it was announced last night by officials of Northumberland Ferries Ltd.

The ship will sail from Caribou at 11 a.m. A new schedule goes into effect today (see ad elsewhere in this issue) providing for three round trips for each boat daily. A fourth trip by the Prince Nova in effect since June 27, is now being discontinued.

Company officials said traffic on the route was heavy—ahead of last year. In fact, they said, it was so heavy that it was about all the Prince Nova could handle up to the present. With two boats on the run, however, there would be plenty space for automobiles and trucks, they predicted.

Considerable work on the Dunning was done by Bruce Stewart Co. Ltd., in Charlottetown during the winter. Then on April 20 the ship was towed to Picou to have oil burners installed under her boilers.

Picture Butte, Alta.—(CP)—A parade, with prizes for the best displays, a rodeo, baseball game, dance and carnival were among the features of Picture Butte's "Western Day" held recently.

Fort St. Marie, historic Residence of the Jesuit Mission to the Hurons, near Midland, Ont., as it will look when restored. Painted after the architect's drawings, based upon excavation of the ruins by the Royal Ontario Museum of Archaeology, the restoration is as close to the 300-year-old fortress as scientific research can make it. Abandoned and burned when the Iroquois obliterated Huronia, in 1649, Fort St. Marie was one of the early French strongholds and the first permanent white settlement in what is now Ontario. Below, a mystery foundation by the upper right bastion which originally was believed to be a fifth bastion. Complete excavation disclosed, however, that it was the supporting layer of a high stone wall. This was the back of a shed lean-to by a courtyard open-air fortress. Courtesy Canadian National Railway.

Moths, Sir Edward, MOTHS!
