

Nervous Indecision

Put to the Test

If your memory is failing,
If you find it difficult to concentrate the mind
And to come to a decision,
You may conclude that
Your nervous system is run down
And nerve force is lacking.
To help you to decide
One very important matter,
Perhaps the most important for you,
We shall send you, free,
Enough of Dr. Chase's Nerve Food
For a five day treatment.
Clip out this ad., and mail it to
The Dr. Chase Medicine Co. Limited, Toronto,
And you will receive this liberal sample
In an attractive aluminum box
Suitable to carry in the pocket or hand bag.

MASTERS MUST TAKE DRILL

LONDON, May 27.—The protest of 10,000 schoolmasters against the dismissal of a teacher because he refused to allow his class of senior boys to be examined by a woman inspector of physical training is likely to be followed by an important change of educational policy under local authorities.

Board of Education officials have begun an investigation into the incident, which occurred at Fareham (Hampshire) County Senior Boys' School.
Probably a circular will be sent to local authorities "advising" them to follow the practice of the Board of Education allowing only men to examine boys of eleven years and more in physical training.

IMPERIAL PUPPY FOOD

It is extremely important to give puppy foxes a right start by early supplying nourishing food. This start can be given by feeding IMPERIAL PUPPY FOOD, which is especially high in food values as it is made from carefully selected ingredients universally recognized for high standard nutritional content.

IMPERIAL PUPPY FOOD formula is prepared with a view to the development of pups into active, sturdy foxes with pelts of highest sheen and faultless color.

To accomplish these results "Imperials" must be fed early and regularly throughout the whole season.

Secure from your local dealers or direct from factory.

CHURCH OF SCOTLAND—Rev. Ewen MacDougall will preach in Peoples Church, City, Wednesday 28th, at 7.45 P. M. L-7513-5-28-11.

THE PROTESTANT ORPHAN-AGE gratefully acknowledges receipt of a generous cheque for \$50.00 from Prowse Bros., Ltd., the result of their Anniversary Sale. L-7534-5-28-11.

FOXMEN—Start those Vixens on Sunglo Vixen & Puppy Ration 10 days after whelping. L-5681.

ANNUAL MEETING—The Prince Edward Island Hospital Annual Meeting tonight St. Paul's Parish Hall at 8 o'clock. L-7592-5-28-11.

BEST SILVER FOX FELT, March London Sale out of 80,000 skins, was from a 1934 Pup Fed exclusive, on Sunglo as cereal part of Ration, from weaning to pelting, according to owner, E. S. Coffin. Sat-Tues-tf.

C. W. L. LOT 65—The Annual Meeting of the Catholic Women's League of St. Ann's sub-division, Lot 65, was held on Sunday, May 27th. It was attended by our Rev. Chaplain, Father Herrell, and a goodly number of members. The meeting was opened by prayer followed by the President's report, which outlined the activities for the year. The Treasurer's report was then read and adopted. This report showed that a substantial amount of money was to this sub-division's credit in the bank. The regular monthly lottery took place, the prize being won by Miss Mary Trainor. The Rev. Chaplain, who is always ready to give his assistance at all times, tendered a vote of thanks to the President on work which was done during the year. He also congratulated the members on the spirit of co-operation which existed among each other. Then followed the election of officers which are as follows:—President, Mrs. J. J. Murray, 1st. Vice-President, Mrs. Joseph Duffy, 2nd. Vice-President, Mrs. Peter Costello, 3rd. Vice-President, Miss Mary Trainor, Recording Secretary, Mrs. F. J. Trainor, Corresponding Secretary, Mrs. Mathias Flood, Treasurer, Mrs. F. J. Trainor. The meeting was then adjourned.

DISCARDS BARROW AS REGISTRY PORT

(By The Canadian Press)
BARROW-IN-FURNESS, England May 27.—Barrow's pride has been shocked by the news that this Lancashire shipbuilding town is being discarded in favor of London as a port of registry. For years the stately ships of the Orient Line have been registered at Barrow and the name of the town has been carried in big letters on the stern of 20,000-tonners to the remote parts of the Empire, and also to many foreign ports.

Now, however, with the building of the latest and biggest ship, the Orion, which is to start her career this summer, it has been decided that London shall be the port of registry. This break with tradition has been decided upon because Barrow is not so well-known overseas as London, or even Liverpool, Glasgow or Southampton.

Trade Improving For Steel

(By The Canadian Press)
LONDON, May 27.—Steel production today, compared with a year ago, is higher in Britain, America, Germany and Russia; about the same in Belgium and lower in France and Luxembourg. Export trade is better in Germany and France, about the same in Belgium and Luxembourg (combined Customs Union), and slightly worse in America. Russia does not figure as an exporter.

British steel output is more than 2,000 tons per working day higher than a year ago, and more than 1,000 tons per day above the average for 1934, which was greatly above the 1933 daily average. In the short working month of February, this year, production was 130,000 tons above the monthly average for 1933.

Avoid Embarrassment of FALSE TEETH

Dropping or Slipping
Don't be embarrassed again by having your false teeth slip or drop when you eat, talk, laugh or sneeze. Just sprinkle a little FASTEETH on your plates. This new, extremely fine powder gives a wonderful sense of comfort and security. No gummy, goopy taste or feeling. Get FASTEETH today at all drug stores.

Big Telescope Fulfills Dream of Many Years

(By The Canadian Press)
TORONTO, May 27.—On the highest ridge of Richmond Hill, 18 miles north of Toronto, modern science has erected the largest telescope in the British Empire—an achievement which will be officially recognized May 31 with the formal presentation of the Dunlap Memorial Observatory to the University of Toronto by its donors, Mrs. D. A. Dunlap and her son Moffat Dunlap. The dedication ceremony will bring together most of Canada's leaders in the field of astrophysics, who will assemble not only to participate in the history-making ceremony but also to honor the veteran director of the observatory, Professor C. A. Chant who will celebrate his 70th birthday the same day.

For Dr. Chant, however, his birthday will be "just another milestone," while the dedication of the telescope marks the fruition of a dream he has cherished for years. Since 1907 when he first assumed the role as head of the astrophysics department of the University of Toronto, Dr. Chant had hoped that some day he would have a telescope sufficiently powerful to widen the scope of his department's research programme. But the mammoth telescope with its 74 inch lens which has been placed under his direction far transcended his fondest dreams.

Dr. Chant and his corps of experts will now join the select circle of North American astronomers who have devoted their lives to the more baffling problems of the heavens, which hitherto have been confined to the giant telescope at Mount Wilson, Calif., and the Victoria, B. C., observatory. Dr. Chant has already announced that his preliminary programme will be devoted to spectroscopic photography. But he is looking forward to the next eclipse of the sun, a phenomenon which he claims "affords the greatest thrill of a lifetime."

The dedication ceremony will be marked by a special convocation at which honorary degrees of Doctor of Laws will be conferred on Dr. Chant, Mrs. Jessie D. Dunlap, one of the donors and Sir Frank Watson Dyson, former astronomer-royal of Great Britain. Honorary degrees of Doctor of Science will also be conferred on Vesto M. Slipher, director of the Lowell Observatory, William E. Harper, acting director of the Dominion Astrophysical Observatory, and Harlow Shapley, director of the Harvard College Observatory.

The Dunlap observatory has been years in the making, with most of the time absorbed in the production of the giant lens for the telescope. Nearly two years have elapsed since the glass for the disc was first poured into its mould at the factory in Corning, N. Y. Since then the "eye" has undergone a delicate process of grinding and polishing in England. Two weeks ago, the lens, insured at more than \$20,000, was successfully mounted, but it will be several months yet before final adjustments are completed to give the telescope its maximum efficiency.

"The long wait has been well worthwhile," Dr. Chant chuckled for the first test. "Now, I know we are going to do things."

Plants Poisonous To Cattle

Poisonous weeds and plants are usually most dangerous to cattle during May and June when forage plants are scarce and most poisonous plants are very succulent. These poisonous plants are known to be on the increase and many losses are reported annually.

A careful examination should be made of all pastures before cattle are allowed to graze on them, and suspicious plants destroyed. Doubtful specimens should be sent to the nearest Experimental Station in the Maritime Provinces or to the Dominion Botanist, Central Experimental Farm, Ottawa, Canada, for identification. Send the whole plant packed so that it will remain green.

A determined effort should be made to rid our farms of these harmful species. Some of the most deadly of these plants are water-loving and grow in swampy areas and along brooks in the pastures.
The following brief statement concerning some plants that are poisonous to cattle in the Maritime Provinces is given in accordance with methods of eradication:
Purple cockle, cursed crowfoot and damel are annual poisonous weeds and may be destroyed by hand-pulling or cutting when in bloom.
Bracken, jarkspur and ragwort are perennial ferns, flowers and weeds, respectively, that once established are difficult to eradicate. They usually occur in waste places

and near to old gardens and require hand labour, or chemicals to destroy both stalks and roots. The work should be thoroughly done and occasional follow-up work during the year is necessary to destroy all plants.

Poison hemlock is an erect, much branching biennial with hollow stems, from two to six feet high, leaves delicate, flowers small, white, in large, loose umbels with circles of small leaves at base of umbels. The plant smells like a parsnip and blooms in June and August. This plant is very poisonous to cattle and is responsible for killing more cattle than any other plant growing on dry waste places. The green leaves are very poisonous early in the season and later the seeds are more poisonous.

Water hemlock and water parsnip are perhaps the most deadly of our poisonous plants in Prince Edward Island and throughout the Maritime Provinces. These are very similar in appearance, in height and shape to the poison hemlock, so that only their differences will be described. They both are found in wet places, in swamps and along streams. The umbels of white flowers on the water hemlock have no leaves at the base of the compound umbels and the water parsnip has numerous narrow bracts or leaves at base of timber. The leaves of the water hemlock are compound and the leaflets are saw-toothed. The leaves of the water parsnip are nearly sessile at the top of the plant but long stalked on the lower branches. These should be dug entirely out and destroyed as the roots are as poisonous as any part of the plant.—J. A. Clark, D. Sc., Superintendent

and near to old gardens and require hand labour, or chemicals to destroy both stalks and roots. The work should be thoroughly done and occasional follow-up work during the year is necessary to destroy all plants.

Women Are Few As Architects

(By The Canadian Press)
LONDON, May 27.—Women's lives are much more closely bound up with houses than men's. Why, then, do so few women go in for the profession of architect? This question is asked by the News-Chronicle.

Only 13 are women of 102 exhibitors at the show of photographs and models of work executed during the past three years by young architects trained by the architectural Association.

Those in authority say women lack the physical stamina to stay the course—only one woman to six men graduate each year. The woman who does succeed executes work indistinguishable from a man's.

Miss Elizabeth Scott, who in competition with men, secured the designing of the Shakespeare Memorial Theatre at Stratford-on-Avon, shows designs for a conference hall, the Marie Curie Hospital, and two country houses.

Remarkable success in the field of speculative building has been achieved by Miss Frances Barker, a girl architect, who graduated from the school only three years ago.

Miss Barker recently won a competition for the design of a small villa on the Sunnyfields Estate, Mill Hill, the first competition of the kind to be won by a woman.

Use Mincard's for Bites

How Classics Losing Place

(By The Canadian Press)
TORONTO, May 27.—With reference to the discussion about Latin as a matriculation subject, it is recalled Lord Oxford and Asquith in his Memories and Reflections says apropos of children's education in Tudor times, that Dean Inge quoted from a treatise of 1530 the author's recommendation that a child should begin Greek at seven, and "in the meantime" use Latin as a "familiar language." Aristophanes, Homer, Virgil, Ovid, Hesiod, etc., "will suffer until he pass the age of thirteen."

This, says Lord Oxford, enables one to understand how Lady Jane Grey (at 16) was conversant with Hebrew, how Mary Queen of Scots wrote passable Latin verses, and how Queen Elizabeth could talk with the foreign ambassadors in at least four different languages. And he comments: "What a falling off we show!"

Other national officers to take part in the program are the honorary president, Mrs. W. F. Cameron, Regina, Sask.; vice presidents Mrs. H. McGregor, Penitont, B. C. and Mrs. W. R. Shaw, Cornwall, P. E. I.; secretaries Mrs. A. H. Ross, Ft. Saskatchewan, Alta.; Mrs. Allan Lanchfield, Aldershot, Ont.; and Mrs. J. P. Price, Vancouver, and treasurer, Mrs. Fred Fenwick, Millstream, N. E.

Women to Meet In Charlottetown

Ninth biennial in the history of the organization, the convention of the Federated Women's Institutes of Canada will be held at the Prince of Wales College here June 24-28. Mrs. A. E. Walker of Bartonville, Ont., national president, will

preside. Reports will be presented, many in person, by the following: national conveners: Mrs. E. Noble, Hatis, B. C.; education: Mrs. S. E. Petch, Hemmingford, Que.; child welfare and public health: Mrs. G. E. Telford, Pelly, Sask.; legislation: Mrs. C. A. Good, Nietaux, N. B., agriculture: Mrs. J. Macgregor Smith, Edmonton, Alta.; home economist: Mrs. T. A. Cohee, Pilot Mound, Man.; League of Nations: Mrs. W. H. T. Penke, Transcona, Man.; immigration, colonization and national affairs: Mrs. H. McGregor, Penitont, B. C. and Mrs. W. R. Shaw, Cornwall, P. E. I.; secretaries Mrs. A. H. Ross, Ft. Saskatchewan, Alta.; Mrs. Allan Lanchfield, Aldershot, Ont.; and Mrs. J. P. Price, Vancouver, and treasurer, Mrs. Fred Fenwick, Millstream, N. E.

Other national officers to take part in the program are the honorary president, Mrs. W. F. Cameron, Regina, Sask.; vice presidents Mrs. H. McGregor, Penitont, B. C. and Mrs. W. R. Shaw, Cornwall, P.
