BUSINESS WOMEN.

One in four women who are in business life are married. It is an astonishing discovery that the very woman who is interested in something outside her home is that alert creature who gives keenest thought to the improvement of her home. It is she who is always looking for a better breakfast food or more beautiful window curtain. She is trying to get the most out of life and better her condition. It is nice to know that the home instinct does not die in business women, but that they are using the gains from outside their homes to improve the inside.

INSIDIOUS EYE STRAIN

We use this adjective advisedly.

Sufferers from Eyestrain may have perfect vision and therefore do not suspect the presence of any eye defect.

The motive power of the entire human organism is Nerve Energy.

Normal eyes, it is computed utilize about 20% of this Nerve Energy, but when Eyestrain is present, a much larger proportion is required. Hence defective eyes, through their consumption of an excessive amount of Nerve Energy may seriously affect the functioning of other organs of the body and produce ill health.
