Monthly Meeting Of Agricultural Institute

The monthly meeting of the Prince Edward Island Branch of the Agricultural Institute of Canada was held at Birch Court Experimental Station, Charlottetown on October 27. Following brief reports by the chairman of the membership and marketing committees, a committee was elected to prepare a booklet depicting various agricultural and historical scenes of Prince Edward Island. This booklet is to be distributed to members of the Agricultural Institute throughout Canada prior to the national Convention which is to be held here during the summer of 1950.

The guest speaker of the evening was Mr. Hadden MacLeod, chief of plant inspection service. British Columbia spoke briefly and stated that preparations for the national convention to be held in Vancouver in 1949 were well advanced and that a hearty welcome awaited all members of this branch that might find it possible to attend.

Mr. McColl also pointed out that during the past thirty years many changes had occurred in education. These changes, however, have not affected rural education. The Rural Education Act of 1947, which will induce rural children to remain in school. This coupled with the scarcity of farm labour and the fact that the parents do not believe an education is necessary for farm workers has resulted in about only 28 per cent of rural youth of high school age attending school.

The partial solution to these problems, said Mr. McColl is the building of composite high schools, where, instead of courses being given primarily for the 5 per cent that will eventually attend university as is being done now, vocational training courses will be given in practical agriculture that will benefit the students who intend to return to the farm.

Mr. McColl also pointed out that it is commonly accepted that the brightest students should go on to prepare themselves for the various professions while only the more backward students return to the farm. It is time this traditional outlook was changed, he said; yesterday's methods are not good enough to compete with today's problems and that we need the best brains available on the farm.

A lively discussion was held on many of the points raised by the speaker, at the conclusion of which a motion thanking the speaker for his interesting and timely address, was moved by Dr. Clark and unanimously accepted by all present.

JOHANNESBURG — (CP) — A man who is believed to operate from a dilapidated car and has trained a dog to steal, is being sought by the police in Johannesburg's northern suburbs in connection with a large number of thefts from unattended delivery cycles.
