KILLED BY SCRATCH FROM A HATPIN

Scottish Chief of Boston Victim of Spinol Meningitis

BOSTON, Mass., Dec. 17—A scratch on the temple, caused by a hatpin and thought too insignificant to consult a physician about, caused the death of James A. Sinclair, chief of the Boston Caledonian Club, at the City Hospital.

Sinclair attended a surprise party at the residence of Peter and Mrs. Miller, Mattapan, last Monday night, and it was he and Mrs. John Green, who had been guests, were bidding the Millers adieu that Mrs. Green, in turning, caused the point of the hatpin to come in contact with Sinclair's skin.

A little blood oozed from the tiny wound, but Sinclair dismissed it, apparently, thinking it was "but a scratch."

Tuesday Sinclair went to his place of business, the store of the W. B. Cutter Hardware Company, in Roxbury, where he was employed as salesman. Tuesday afternoon he complained of headache.

He went to his home, where a few hours later he took to his bed, suffering from a high fever. Dr. Myles Martin of the Hotel Westminster was summoned by George Scott, with whom Sinclair boarded, the physician diagnosing the affection as spinal meningitis.

Dr. Philips of Norfolk street later made an examination of the patient and corroborated Dr. Martin's diagnosis.

Sinclair was sent to the ward for patients with contagious and infectious diseases at the City Hospital and the residence of Scott was thoroughly fumigated. Sinclair was given the treatment usually accorded those suffering from the dreaded "spotted fever."

After nearly fifty hours of delirium, he became unconscious and died in that condition.

DIZZY HEADACHES CURED IN ONE NIGHT

If Troubled With Head-Fullness, Ringing Noises, Specks Before the Eyes, the Stomach is at Fault.

Quick Relief and Certain Cure Came From Dr. Hamilton's Pills.

"I had terrible pains in my head. My appetite faded away and when I did eat anything it disagreed and made me very sick for hours after each meal. the pains in my stomach and the dizzy headaches I had to endure almost set one wild. Sometimes attacks came on so severely that I had to go to bed. I would feel so worn, depressed and utterly miserable that for hours I wouldn't speak to my family. My system was poisoned with wastes and nothing helped me till I used Dr. Hamilton's Pills. Without this grand system-cleaning remedy I would be sick, but each day brought me better health and spirits. I was cured and made strong, ruddy and healthy, and will always use and recommend Dr. Hamilton's Pills.

"MRS. B. C. CURRAN,
"Westport, P. O."

Thousands who are in an ailing, low state of health need nothing else but Dr. Hamilton's Pills. 25c. per box, or five boxes for $1.00, at all druggists and storekeepers, or the Catarrhozone Company, Buffalo, N. Y., and Kingston, Ont.

"What would be nicer than a dress length of Whip cord serge, put up in 4 yd lengths for $3.80, per length, in either brown, navy, black, Alice blue, green or tan? Or a suit of our reduced serges, diagonial or tweed in 4½ yd lengths worth $4.50, for $2.90? At Patons. 12-20M3i.

International Stock Food

DON'T let your horses run down during the winter and get so soft that they will lose flesh badly when you start your spring plowing. If horses are not worked regularly during the winter, they need the splendid tonic effects of INTERNATIONAL STOCK FOOD, to tone up the digestive organs, enable them to get all the good out of their feed, prevent the blood from becoming overheated, and thus ward off disease.

79 LANGHAM, SASK., Jan. 26th, 1912.

"I have fed INTERNATIONAL STOCK FOOD for many years. I always have a 25 pound pail standing in my barn. I bought a pair of three year old colts and they were so worked down that my neighbors said I had been beat. When I bought the colts, they weighed 2400 lbs. I ploughed 25 acres and they weighed 2650—then I harvested 163 acres and threshed and hauled one carload to town, 6 miles. I weighed them again and they weighed 2850, and I said "They shall weigh 3000 before spring". Now, the Neighbors want to buy them but there's no chance". J. G. REMPEL.

For sale by dealers everywhere. Our $1,000.00 Stock Book—sent free when we receive your name and address. INTERNATIONAL STOCK FOOD CO. LIMITED, TORONTO.

MAN KILLED OTHER INJURED

TORONTO, Dec. 18—While guiding a grindstone weighing about a thousand pounds, James Humple, a married man, 40 years old, was killed instantly and another man, William Davidson, had his left leg broken and was also injured about the arms. The derrick chain which held the stone broke on Friday at the machine shop of the Massey-Harris Co.

The grindstone was being moved by means of the derrick, and the two men were walking along under it and guiding its course when a link of the chain broke. Humple was crushed to death when the heavy stone fell, and Davidson, who was holding the guide rope, had his leg caught when the large wheel turned over.

It was a few minutes before the stone could be moved, and when Humple's body was taken out there was no doubt that he had been killed instantly. Davidson, though injured severely, retained consciousness and after receiving medical attendance was taken home in the police ambulance.

OSTRICH TIPS ARE IN AGAIN.

Ostrich feathers have come into their own again. They are used for hats, for boas, and in a myriad other ways.

For hat trimming one plume, full and long, is considered sufficient, and in almost every instance the tip of the plume is placed toward the back of the hat, or resting on the hair at the back of the head.

Those who have ostrich feathers tucked away in boxes waiting for fashion to demand them again will find that the plumes are probably not in such excellent condition that they can be used in this way, nor should they be willowed, for the willowed plumes are quite out, and the style of feathers now used is so full of little points of fashion that one with careful eyes can soon detect the repaired and reclaimed from the new ones. For instance, the long, narrow feather is completely out also; the new ones have short, broad tips.

But one's old feathers can be done over in some remarkably clever ways, so that they are not merely repaired, but present the effect of new goods, and the prices charged for such work are moderate, says the New York Times.

Quite charming are the tailored ornaments made from old tips and bits, and these find a place on the plain hats. Hat bands of ostrich feathers are also to be made of old plumes, though these are not as uncommon as many other things which may be done with them.

Willowed plumes, by the way, may be unwillowed and recurled. And in connection with the recurling notion, it is generally supposed that black plumes are always the best investment, for they can be redyed so easily; but this is a fallacy, for there is no tone so hard to make over as rusty black, as the process takes much from the natural feather, which must then be added to with new material.

The little Pierrot ruffs may be made out of old feathers. These are formed of a row of curly tips, beneath which is a band of satin in five folds, which lies flat against the colar, and below this falls a line of ostrich flues, Flues are the soft, feathery part of the plume which extends from the center stem, backbone, or quill. The ruff measures about sixteen inches and is finished with an immense bow of satin matching the feathers unevenly tied, and standing up and down.

"An "Paton's Quality" Christmas gift is always appreciated—the recipient knows that it is good. 12-7Mtf.

STRIKERS GO OUT WILL NOT ACCEPT

OTTAWA, Dec. 19—A serious hitch in the settlement of the dispute between the C. P. R. and the Canadian Brotherhood of Railway Employees developed Monday when President A. R. Mosher, of the Brotherhood, announced that the men would not accept the basis of settlement outlined in a statement issued from the Labor Department this morning.

The statement reads in part:—

"The department has been advised by the company that the men who left the company's service as the outcome of the recent strike will be given opportunity for re-employment if application is made during the next two weeks, the fact that these men had left the company's service not acting as a bar to their re-employment."

"The men will not return on such a flimsy promise as is contained in that statement, and they are able to stay out indefinitely," declared Mr. Mosher.

"We want to know if the company means to accept the board's findings, and, if not, what the department intends to do."

SURPRISE PARTY AT UIGG.

At Uigg, on Thursday evening, Dec. 12th, when Rev. Frank P. Dresser and wife from Eldon came to hold the usual prayer meeting in the Baptist Church they were informed the meeting would not be held as usual and were requested to make their way to the hospitable home of Mrs. La Trobe's. Arriving there they were greatly surprised to find the house full of friends, some having travelled miles to attend, Rev. H. S. Erb of Hazelbrook being one of the number. Rev. Mr. Wilson of Montague was expected but unfortunately could not be present. During the evening a very interesting program was given by the following ladies and gentlemen:—Miss Martha Irving of Cherry Valley, very kindly gave two recitations and one reading. In these Miss Irving proved herself to be an artist of no mean ability, one who well understood the art of Elocution; these were highly appreciated. There were also selections, given by Mrs. Irving of Cherry Valley on his beautiful graphophone, which were greatly enjoyed and caused much laughter. M. F. McLeod gave several selections on the violin, accompanied by Miss Mary Chisholm, both of Uigg. These also were much enjoyed and added to the enjoyment of the entertainment. Next on the program came refreshments. These need on praise. The people present expressed their high appreciation in a way that could hardly be mistaken; yet when all were filled, there yet remained baskets, full to the brim. Rev. H. S. Erb then took the floor and after expressing his pleasure in being present, his high appreciation of the selections given, he spoke at the high estimation in which Pastor Dresser and wife were held in the hearts of the people, assuring them of the deep sympathy the people had for them in their work, and as a small evidence of this, it was his great pleasure, on behalf of the people, to present a pair of driving mitts to Pastor Dresser and a Buffalo robe to keep both he and his wife warm, as they drove from place to place. Mrs. Dresser was also given a small purse of money. Mr. Dresser then, in a few well chosen words, expressed on behalf of himself and wife, their deep gratitude for this great and unexpected kindness, but perhaps even more than the gift of this beautiful robe, purse and mitts, did they prize the thoughfulness and kindness that had prompted Catholics, Presbyterians, Methodists and Baptists to unite in giving so valuable and acceptable gifts. A vote of thanks was then given to Mrs. La Trobe for having so kindly opened her home for the occasion and the trouble she had been to in making the evening's entertainment such a decided success, to which she graciously replied. Prayer was then offered by Pastor Dresser. So ended a very pleasant and well spent social evening.

WINTER EGG PRODUCTION.

With the extreme cold weather almost here and fresh eggs approaching the sixty cent mark in the large cities, the question of winte egg production is one which is important to all successful poultry raisers. This is the time of year when a few precautions and a little added care and management may add many dollars to the pocket book of the poultry man.

If the poultry houses and roosts have not already been thoroughly cleaned and disenfected this should be done at once. All old hens should also be marketed. Nothing keeps down the egg production so much as over crowded quarters, and moreover, the hen over two years old is unprofitable as an egg producer. Twenty-five young hens will lay more eggs, take less care and less feed than fifty old hens. As the pullets are the mainstay of the flock for winter egg production they should receive special attention at this time of year. May-hatched pullets should begin to lay in December, and with this end in view they should be handled accordingly. It is not wise to encourage pullets to lay earlier than December, as when the cold weather sets in they are very apt to stop laying, and once stopped they are hard to start. The pullets should be removed to their winter quarters, and slowly placed on winter rations, the amount of grain fed being gradually increased. Wheat, corn and oats are common grains on almost every farm, and there are none better for poultry. As these grains are all contained in the daily rations fed at the Ontario Agricultural College, Guelph, farmers and poultrymen cannot do better than follow the system in vogue there, namely, one part of corn and two of wheat for breakfast. Clover or alfalfa leaves and mangles for dinner with a rebash of breakfast for supper. In addition to this the fowls have crushed oats in the feed hopper at all times, and abundance of sour milk to drink. This system is simple, requires little time, and is recognized throughout Americ as the leading ration for egg production. It is one which is easily applicable by every farmer.

Two handfuls of grain is usually sufficient feed for a hen, but the poultry man must use his own judgment in handling his flock. Close watchfulness, will, in a short time reveal the correct quantities to feed.

Exercise is an essential in the production of eggs. All grain should be buried in six to eight inches of straw. Mangles should be placed on nails requiring effort on the part of the hen to reach them. The hen must be made to work for every particle of food she gets. Exercise stimulates the circulation. Increased circulation means greater vigor and more robust health which is the herald of high egg production.

Delicacies are much appreciated by poultry and should be given whenever possible. They should, however, be supplied in limited quantities as the hen cannot control her relish and will over eat, resulting in disastrous results. Meat scraps, bread crumbs, boiled potatoes, crushed bones and any other scraps from the table serve as a change and stimlus to the appetite of the hen.

In no case must any serious change be made in the daily ration fed. If it is essential that a change be made it must be effected slowly and cautiously. The digestive organs of the hen, like those of animals, are upset by the introduction of new foods into the ration.

The hens should have some form of dust bath. Ashes answer very well for this purpose. All drinking utensils should be kept clean. The buildings should be well lighted, airy, dry and free from draughts. Careful management, proper food, exercise, pure air, cleanliness and dry, draftless buildings are details which if neglected result in low monetary returns.

FIREMAN KILLED CLEANING WINDOW

TORONTO, Dec. 19—An attempt on the part of Cecil J. Kribs, a fireman on the G. T. R. to clean the windows of the engine cab while the train was running, resulted in the young man meeting instant death at the foot of Abell street near King Street subway, on Sunday morning. Kribs, who had just passed his 22nd year, was reaching out of the window to clean some glass in the forward part of the cab. He failed to notice his danger until too late and his head struck the corner of a box car shunted on the Abell siding.

Engine No. 2587 was running light from Mimico toward Bathurst street. Besides the engineer there were the brakesman and the conductor on board.

The fireman noticed that the windows were not very clean and forthwith put his head and shoulders out so as to reach them better. The cars on the Abell crossing are very close to the track. In addition to this Kribs was looking upwards and not ahead. Just before they came to the cars the man saw his danger. It was too late.

His head struck the car and death was instantaneous.

ROYAL PURPLE Stock & Poultry Specifics

FREE We will send absolutely free, for the asking, postpaid, one of our large 64-page books (with insert), on the common diseases of stock and poultry. Tells how to feed all kinds of heavy and light horses, colts and mares, milch cows, calves and fattening steers, also how to keep and feed poultry so that they will lay as well in winter as in summer. It contains 360 recommends from all over Canada, from people who have used our goods. No farmer should be without it.

You can fatten cattle and hogs in a month's less time by using our Royal Purple Stock Specific than you could possibly do without it, thereby saving a month's feed and labor and the cost to you will not be more than $1.50 for six pigs or $1.00 for one steer. It will keep your horses in show condition with ordinary feed. If you have a poor, miserable-looking animal on your place try it on this one first and see the marvellous result which will be obtained. Our Stock Specific will increase the milk flow three to five lbs. per cow per day, while being fed in the stable. A 50c package will last a cow or horse 70 days.

ROYAL PURPLE POULTRY SPECIFIC will make your hens lay just as well in the winter as in the summer, and will keep them free from disease. These goods are pure and unadulterated. We do not use any cheap filler to make a large package, entirely different from any on the mar'et at the present time.

Royal Purple Stock Specific, 50c pckgs.; four 50c pckgs., in an air-tight tin, for $1.50.
Royal Purple Poultry Specific, 25c and 50c pckgs., and $1.50 air-tight tins that hold four 50c pckgs.
Royal Purple Lice Killer, 25c and 50c tins; 30c by mail.
Royal Purple Gall Cure, 25c and 50c tins; 30c by mail.
Royal Purple Sweat Liniment, 50c bottle; 60c by mail.
Royal Purple Cough Cure, 50c tin; 60c by mail.
Royal Purple Disinfectant, 25c and 50c tins.
Royal Purple Roup Cure, 25c tins; 30c by mail.
Royal Purple Worm Powder, 25c tins; 30c by mail.

BOY MURDERER SERVING TEN YEARS

Sore Chest Cured In One Night

BROKE UP A HEAVY COLD, RELIEVED PAIN IN THE SIDE, STOPPED AN IRRITATING COUGH.

"Anyone that goes through all that I suffered last winter will anpreciate the value of a remedy that cures like Berviline cured me." These are the opening words of the solemn declaration of E. P. Von Hayden, the well known violinist. "My work kept me out late at night, and playing in cold, drafty places brought on a severe cold that settled on my chest. I had a harsh, racking cough and severe pains darted through my sides and settled in my shoulders. I used different liniments, but none broke up my cold till I used Nerviline. I rubbed it ony my neck, chest, and shoulders, morning and night, and all the pain disappeared. Realizing that such a heavy cold had run down my system, I took Ferrozone at meals, and was completely built up and strengthened. Since using Nerviline I have no more colds or pleurisy, and enjoy perfect health."

Nerviline Cures Chest Colds

It's because Nerviline contains the purest and most healing medicinal principles, because it has the power of sinking through the pores to the kernel of the pain—these are the reasons why it breaks up colds, cures lumbago, stiffness, neuralgia, sciatica, and rheumatism. Refuse any substitute your dealer may suggest—insist on Nerviline only. Large family size bottles, 50c; trial size, 25c; all dealers, or The Catarrhozone Co., Buffalo, N. Y., and Kingston, Ont.

Youthful Matricide Patiently Going Through Routine in Penitentiary

BOSIE, Idaho, Dec. 18—James Whittaker, scarcely eleven years old, is serving a term of from ten to fifteen years in the Idaho State penitentiary for the murder of his mother. Clad in the regulation prison garb of a striped suit made with knee trousers, the child is confined not far from the cell of Harry Orchard.

The young convict is not allowed to associate with the convicts in the prison yards, but is kept in the library, where under the direction of the warden and the librarian, the little fellow daily studies and recites his lessons in much the same manner as he did before he was taken from the school room. The librarian, who is known as a "trusty", is the only prisoner with whom the boy is permitted to associate.

Whittaker has been a prisoner at the institution only two months, but he has unusual privileges. Although Bertillon measurements have been taken and he has been photographed and numbered "1949," the warden and the guards do not believe for a moment that the boy prisoner will try to escape. The ordinary prisoner must have served the greater part of his sentence before receiving the freedom of the prison grounds outside the walls, but Whittaker's case is a singular one, and when the boy is not studying or reciting his lessons, he may be seen about the outside of the walls playing hide and seek with the warden's children or amusing himself by teasing the bloodhounds.

Not every liberty has been granted to the boy, however, for promptly at five o'clock, when the gong sounds, he flies through the great iron gateway. In a clear, shrill voice he gives his number to the turnkey, who counts him as one among the 260 prisoners.

NOX A COLD NOW

Don't Let A Cold Take Hold Of You. "Nox A Cold" Will "Nox" It Now.

"108" known as "Nox A Cold," is a safe and effective specific for weak lungs and bronchial troubles. Use it as prescribed by a leading English physician, whose prescription it is, and quick relief will come to you. Dr. A. A. Hall, Detroit, says: "I have used 108 in my practice and have found it gave beneficial results." Sold at Hughes Drugstore, 25c per bottle.

"Knowledge Comes But Wisdom Lingres"

How well those lines of Tennyson exemplifies the management of the fox business today on P. E. Island.

All interested has **knowledge** to discern the profits in fox breeding, but many sadly lack the wisdom of breeding for best results.

Every breeder of common farm stock instinctively guards against the propagation of their herds from immatured species. Their **knowledge** tells them that if followed it tends to weaken constitutional Vigor and leads to ruinous results. But when purchasing for breeding purposes the most valuable animal in existence they lack of **wisdom** to apply the same well known rule, and buy their stock regardless of the fact that for several generations back they have been bred from immatured ancestors.

Last year only about 20 per cent of the young foxes had litters, did that come by accident, or can you now discern the probability of a solid reason?

Think it out; run no risk, but enquire about options on foxes from Eldorado Black Fox Co., Limited, who owns the most vigerous and productive fox on record, as proven by 45 pups in several years; also her best last year's daughter mated with the pick of Dalton's ranch.

We invite inspection, and respectfully solicit correspondence from intending fox purchasers.

G. Albert Mutch,
Treasurer, Eldorado Black Fox Co.,
Box 302,
Charlottetown, P. E. I.
