DR. MANION

(Continued from page 5)

Total, \$112,000,000; "Or \$10,000,000 per month," the minister commented, "certainly a huge sum for the government of Canada to raise."

The deficit of \$56,000,000, Dr. Manion said, was the deficiency in operating earnings necessary to pay operating expenses plus interest on funded debt owing to the public.

"The magnitude of the problem is easily seen," the minister went on. "It impinges upon our whole financial structure and our financial standing. This is easily realized when one remembers that in 1900 our whole Dominion revenue was for the first time just over \$500,000,000."

"The whole question of financing is complicated by the fact that two-thirds of the interest is owing in the United States and that now all Canadian National loans must be raised in Canada instead of, as in the past, in the United States."

"The fact that in 1931 the gross earnings of the railways were the worst since 1919 showed the seriousness of the problem, he stated. For national self-preservation, the minister continued, certain economies had to be insisted upon.

Some of the changes made were as follows: 1. Switching of amounts has been permitted. A million dollars might be voted for a railway need in the west and be switched to the east...

2. A finance committee was appointed by Order-in-Council, the committee consisting of Sir Henry Thornton, the legal Vice-president, and the Deputy Minister of Railways, representing the Government.

This finance committee must pass upon all expenditures suggested by the management before they are dealt with by the directors, and they have done excellent work. First they cut down the expenditures on additions and betterments in 1931 from an estimate of \$20,000,000 to an expenditure of \$7,000,000, thereby saving \$13,000,000.

3. Another \$13,000,000 was saved by dispensing with some highly-paid supernumerary officers; by cutting down services on losing branch lines; by curtailment of passenger trains and services; by salary and wage adjustments; by discontinuing the triangle steamship service on the Pacific coast which was losing heavily on operating; by cutting out club dues, entertain:nt fees and general expenses of officers, and by cutting out a big steamship subsidy paid by the Canadian National to an Atlantic steamship line.

This latter \$13,000,000 will be added to by another \$15,000,000, in the coming year, according to a statement of the railway company, making 1932 expenditures less by \$28,000,000 than the 1930 expenditures, and these are of course not the ordinary lessened expenditures due to lessened operating returns.

PERSONALS - Mr. Daniel Gorman, teacher at Waterville, Mt. Stewart, spent the holidays at his home in Kensington.

-Mr. Hermas Myers, of Tryon, who underwent a serious operation in the Prince County Hospital last week, is doing very nicely.-S.

-Miss Jean Nicholson of Summerside is the guest this week of her grandmother, Mrs. Daniel McKinnon, of North Wiltshire. Miss Nicholson will also visit friends in Charlottetown before returning home.-S.

GREAT BETWEEN SMOKES

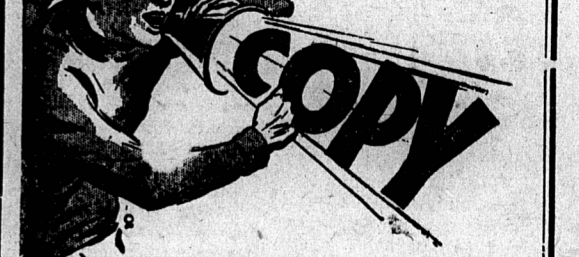

Keeps the mouth cool and moist. Inexpensive Satisfying.. Ask for WRIGLEY'S

"In addition to the above," the minister said, "the C. N. R. and the C. P. R. at the request of the government, cooperated remarkably well, making many economies. "There is no doubt much yet to be done, but I claim that these savings in expenditure were a splendid achievement during the past year, with which achievement surely no one can find fault."

Canadian National that if their rates were the same as the American rates they would have taken in \$15,000,000 to \$26,000,000 per annum greater revenue during the past few years.

"Canada cannot have the lowest rates in the world, unnecessary services of all kinds, extreme luxury in passenger services, branch lines everywhere and duplications innumerable, and the railways prosper. Each of us must do his bit to correct this condition. Remember that in better times, better services."
